

You are Invited to Consider
 THE PROPOSITION OF THE
Standard Consolidated
Gold Mines Company

We believe our proposition has such excellent merits that it will appeal to the judgment of the most conservative investor.

WE HAVE THE PROPERTY

WE HAVE THE ORES

WE HAVE THE VALUES

Three groups of mines—the Standard, Willie Boy and Copper Ridge—comprising 26 claims in all, constitute our holdings. Any one of the groups would be sufficient to insure a large and long-lived producer. These several groups are so located that one general plan of development, which is now in operation, will open the consolidated property. This insures economy of operation and large results. Almost one mile of underground workings has quite thoroughly exploited the property and placed a half million dollars worth of ore at our immediate command. Our policy, however, is to create large ore reserves and install a concentrator of at least 100 ton daily capacity. We are planning to spend a good many thousand dollars in further development before erecting our plant. While we would be justified in placing a small mill today, we believe the above plan to be the most practical, conservative and productive of best results.

Our values are in Gold, Cobalt, Silver and Copper. Some of the ledges are free milling gold, while the rest are an excellent concentrating proposition. Assay values run as high as \$2,400, but the average ore will run over \$50 per ton.

We regard this an almost ideal mining proposition. You still have an opportunity to get the stock at the initial price, Ten Cents per share. In less than 30 days it will take a decided advance. Reserve your stock today, if you want it at the present price. Our booklet, giving all the details of the property, with a number of views, is just off of the press. Let us send you one.

**STOCK WILL PROBABLY BE ADVANCED
 JUNE 15**
