

THE PULASKI GOLD MINING AND MILLING COMPANY.

CAPITAL STOCK \$150,000.
 PAR VALUE 10 CENTS PER SHARE.
 TREASURY 500,000 SHARES for DEVELOPMENT ONLY

INVESTORS

Early in May we called your attention to the fact of the issue of the first block of 100,000 shares of Treasury stock, and that the same was placed on the market

AT 4 CENTS PER SHARE

We stated that we presented as SURE a paying investment as is offered in any mining district. We called attention to our capitalization, gave our average assays up to that time, and the opinion of our General Manager, W. E. Sanders, who stated, "I consider the Pulaski equal to any property I have ever had anything to do with, and with development believe it will become a mine." The last contract of fifty feet is about completed and although still 200 feet from the main lead, with a depth of thirty-three feet, average assays gave \$1.20, \$1.60, \$1.90, \$2.30, \$1.70, \$2.40, \$3.10, \$2.20, \$4.60 and \$4.00. Assayers—Robbins & Robbins, McEwen & McEwen. The foregoing justify the opinion of the management that we will make a mine of the Pulaski.

A new contract for fifty additional feet will be let in a few days. The mine has been furnished with all necessary equipment up to date. A large number of citizens of Sumpter have visited the property, only one mile from town, sampled the dumps, had their own assays made, and showed their confidence in the outcome by buying blocks of stock.

For further particulars write for our "Epitome of Facts." Stock may be purchased on the installment plan by paying thirty per cent down, balance in two monthly payments. Wishing to establish agencies, those applying for same should send reference with application. All orders for stock should state the amount of shares to be purchased, whether on the installment plan or not, and should be accompanied by bank draft or post office order.

BURNT RIVER ROAD A GO.

Viewers Appointed and Report to be Made Within Few Days.

At the meeting of the county commissioners held last week the survey for the road between Sumpter and the Burnt River valley was ordered, and V. R. Mead and John Doan were appointed as viewers to co-operate with County Surveyor Foster in formulating a report to the commissioners.

The work of viewing and surveying the route is to be taken up as soon as the county surveyor completes a few other matters now on hand. This it is stated will be within the next few days, and it is the intention to start building the road at the earliest possible moment. Outside of the assistance which the Burnt River people will render Sumpter is putting up the main bulk of the funds for the construction of the highway. This money has practically all been raised, and work can be started as soon as the viewers' report is in.

Improvements At Greenhorn City.

Mining Engineer Haas, who returned a day or so ago from a trip

through the Greenhorns, says that great improvements are being made in the Greenhorn City in the way of planking and grading streets. The main thoroughfare of the town has been graded, and other work done. The presumption is that Greenhorn is getting ready to celebrate the Fourth.

CONTRACT LET.

Four Hundred Feet of Tunnel Work at Alpine in Cove.

H. W. Nelson, superintendent of the Alpine mine in the Cable Cove district, closed a contract yesterday for 400 feet of tunnel on the lower levels.

The No. 2 level is now in 325 feet, and it is estimated that there is yet about 200 feet to drive before the main ledge of the group is reached. Superintendent Nelson was in the city a couple of days this week and reports satisfactory progress at the property. The mill which was ordered by Colonel Gayson, general manager of the company, in San Francisco some time ago, is expected to arrive soon.

Preached In Baker City.

Dr. William H. Heppie, D. D., filled the pulpit of Rev. J. R. N. Bell, of the first Presbyterian church, Baker City, Sunday, in the absence of the latter who delivered the baccalaureate sermon at the commencement exercises of the Weston State normal school on this date.

SAWMILL.

Machinery For Alamo Will Arrive in a Few Days.

J. P. McGuigan, superintendent of the Alamo, returned yesterday from Spokane, and left at once for the property. While away he ordered the machinery for a saw mill of 10,000 feet a day capacity. It is expected to arrive the last of the week, and Superintendent McGuigan states that he will have the mill running within the next ten or twelve days. The plant is to be operated by water power, furnished by water conducted by a ditch one and a quarter miles long from Clear creek. A force is now at work clearing the right of way.

The specifications for the stamp mill to be erected have been submitted to the different machinery companies and bids are now being received. This will be ten stamps in the beginning with a frame for twenty, and this plant will also be operated by water power.

WORK AT IMPERIAL.

Ready to Ship When Roads Are in Condition.

Captain Paul, superintendent of the Imperial, was in from the property this week. He has a force of men doing outside work at the mine, and will put on a full crew within the next ten days. The first

work to be done, he states, when the full crew is put on will be to sink a winze on the Imperial tunnel.

He is ready to ship and will do so just as soon as the Cable Cove road is repaired so equitable freight charges can be obtained. During his visit last week County Commissioner Brooks went over the road, and help from this direction is expected.

WORK ON CALIFORNIA MILL.

Will be in Operation by July 25, Says Manager Bellman.

Work was started yesterday on the construction of the reduction plant at the California, and Manager Bellman states that he hopes to have the plant in operation by the 25th of July. The machinery has been on the ground for some time, and it is the purpose to place it as speedily as possible.

High values continue in the No. 1 level which is being driven for the rich shoot opened on the surface some time ago. It seems evident that an immense zone of enrichment will be encountered at this point, which is the theory long held by Manager Bellman.

Visits Tribe.

L. B. Reeder, of Pendleton, Great State Sachem of the Red Men, visited the local tribe this week. Monday evening the lodge in conjunction with the Degree of Pochonats gave a social session in honor of the visitor.
