

WE MEAN WHAT WE SAY
WHEN WE SAY THAT
The Standard Consolidated Mines
Company

Owns what promises to be one of the biggest Mines
not only in Eastern Oregon, but in
the United States.

OUR REASONS ARE:

FIRST—That we own 26 claims, covering the entire mountain.

SECOND—That we have over 3500 feet of tunnels, shafts, winzes and upraises on the property.

THIRD—That there is over half a million dollars' worth of ore actually in sight now.

FOURTH—There are two systems of veins on the property, either one of which will make a big mine.

FIFTH—Over 1500 feet of vertical depth can be gained by tunnel.

SIXTH—The five veins in the Standard system converge at the top of the mountain forming an immense body of ore.

SEVENTH-- A half million dollars has been actually offered for the property.

EIGHTH--The values in the veins consist of gold, cobalt copper, silver and nickel.

NINTH--It is the only gold-cobalt mine in the world.

TENTH-- The company is officered by some of the best business men in Oregon.

ELEVENTH--The assay values are unusually high. Send for the list.

TWELFTH--We have Five Great Metals--Gold, Cobalt, Platinum, Copper, Silver.

The Stock is a Snap at 12 and 1-2 Cents Per Share

You will not have many more days to secure it at this figure. We have just opened a Rich Body of Platinum in one of our veins. This, with the Exceptionally Rich Ore that is being constantly blocked out, justifies an Advance In Price. The Price of Stock will be materially advanced on the First of August.
