IS NOW ON THE MARKET TO BE SOLD AT
TEN CENTS PER SHARE

As Soon as This Amount Shall Have
Been Disposed Of The Price Will
Again Advance. ❁ ❁ ❁ ❁ ❁

SEND FOR PROSPECTUS

We will send you our new prospectus from which you can learn much. We would further suggest that you write to a few of the legitimate mining men, business men or bankers about Highland, or if you would rather come and look for yourself let us know, we will furnish you with transportation from your home and return to the Highland mine; prove to us that you have some money you would like to invest and we will bring you to the property and show you something which you will be proud to invest your money in.

We are anxious to have men with money to come out and look over and examine the Highland because we know they will be pleased with the property. We know we have the making of a large gold producer and dividend payer.

TWENTY-FOUR REASONS WHY YOU SHOULD PREFER HIGHLAND STOCK FOR YOUR INVESTMENT

1. It has high grade ore on the surface and in the underground workings.
2. The ore bodies show strength, width and length.
3. The ore can be mined and milled at the lowest possible cost from the Highland.
4. It has the best tunnel sites, and the ore can and will be run out on cars, and the cars will not have to be hoisted, nor any water to be pumped.
5. No expensive hoisting plants will ever have to be installed and high priced pumping plants will not be needed, as the mine is self-draining.
6. Nearly 1000 feet depth will be gained by driving on the ledge, and an additional 1000 feet can be gained by driving a crosscut tunnel.
7. The Highland Company owns a water power which will drive all the milling machinery.
8. There is abundance of timber on the property to last the company many years.
9. The mine is only twelve miles from the main transcontinental railroad, and the county road passes through the Highland ground; all the road building has been completed.
10. The Highland is only five miles from the fertile Powder River valley where all kinds of fruits, vegetables, grain, hay, etc., grow in abundance.
11. Supplies can be had direct from the producer.
12. The Highland is on the Mother Lode system of veins in eastern Oregon.
13. The Highland is located between the North Pole mine and the Baisley-Elkhorn.

14. The Highland vein has been thoroughly tested on the surface and is now being thoroughly explored at depth, with wonderful results.
15. The Highland ores contain enough gold per ton to pay for all mining, milling and incidental expenses, with enough money left to pay good dividends to stockholders.
16. On account of the favorable location, the cost of developing and equipping the Highland will be much less than for most of the mines.
17. The Highland Gold Mines Company absolutely owns and has good title to twelve (12) claims, 240 acres, and has no indebtedness.
18. The Directors will not run the Highland Company in debt, and are handling its affairs conservatively.
19. The management is active and the development is going on continually; ore reserves are being blocked out every day.
20. Last sample taken from the mine on June 3d assayed \$202.35 per ton.
21. We are willing to allow you to make a personal examination of the Highland Mine at our expense in order that we may verify every statement made.
22. You may ask anyone in Eastern Oregon if the above statements are not correct.
23. Every stockholder is regularly informed regarding the development at the mine, whether it be favorable or otherwise.
24. The books of the company are open at all times for inspection by any stockholder.
