15 CENTS PER SHARE MINING

We have decided to place upon the market 100,000 shares of the treasury stock for the sole purpose of preparing the "STORM KING" group in condition for a mill in the early spring. We will quote you extracts from the reports written by the best mining authorities in Oregon, which will show conclusively the wonderful richness of the STORM KING group of seven claims situated in the Cable Cove Mining District of Eastern Oregon, operated by the FOREST MINING COMPANY of Sumpter, Oregon

"In making my report I will commence with the Eureks and Honest Dollar claims. The development on these consists of an adit Ninety-seven feet in length; showing two feet and ten inches of ore in the top; and a little over three feet wide in the bottom. With assays ranging from \$9.68 to \$70 per ton in gold. About four hundred feet in a southwest direction there is a shaft on the vein ten feet deep, showing the vein to be twelve inches wide in the bottom, from which I dug average samples from which I secured from \$9.76 to \$40 in free milling ore.

"Considering the shallowness of the work done. I confidently expect this ledge to develop into a fine producer.

(Signed) CAPTAIN A. M. PAUL, Mining Engineer. Salt Lake City, Utah.

"Wish to call your attention to the fact that on the Eureka, Honest Dollar, Storm Kink and Ozone, I find true fissure veins.
"The character of these veins vary in width from THREE FEET to TWENTR-THREE FEET as found in the bottom of the shaft on the Eureka ledge (See Note) 'Minerology', the pay quartz is characterized by arsenopyrite, and also by pyrite in minute

shaft on the Eureka ledge (See Note) Annexonally, particles.

"The ore contains sulphrets both in arsnopyrites and pyrite form.

"Gold predominates in the FOREST properties, and is of almost universal occurrence. The free milling gold being that part amenable to plate amalgamation and will vary from 40 per cent to 60 per cent per ton.

"I find some gray copper, and considerable cuprite, or oxide. The copper which this ore carries is valuable; and with depth there is little doubt but these values will increase. In the many assays made the copper was found to run from 5 to 30 per cent.

"Ore values from the Eureka and Honest Dollar ledge, assayed as follows:

No. 1 Sample—Gold \$79.08; Silver \$2.20; Total \$81.28

No. 2 Sample—Gold \$79.08; Silver \$2.20; Total \$81.28

No. 3 Sample—Gold \$79.08; Silver \$2.20; Total \$1.28

No. 3 Sample—Gold \$79.08; Silver \$2.20; Total \$1.28

No. 4 Sample—Gold \$79.08; Silver \$1.25; Total \$1.51

No. 4 Sample—Gold \$8.48; Silver \$1.25; Total \$1.50 No. 5 Sample—Gold 12.40; Silver 3.50; Total No. 6 Sample—Gold 70.28; Silver trace; Total No. 7 Sample—Gold 62.68; Silver 1.25; Total "From the Jessie and Golden Rule ledge:—No. 8 Sample—Gold 4.48; Silver 55; Total 63.93

-Gold 4.48; Silver 55; Total 5.03
Professor W. S. EBERMAN, Mineralogist and Geologist. (Signed)

We will not bother you with theories, nor fanciful language to support our contention. Plain facts is what you want, and plain facts is what we will offer you, to induce you to become identified with us in the making of one of the finest properties ever offered to the public. Organize a club, then send an expert to examine the "STORM KING" MINES, he will easily satisfy you of the richness

of our property.

"Note"—The increased depth of the shaft mentioned in Professor Eberman's report was done in the interval between his examination and that of Captain Paul. It was only done to prove conclusively the permanency of our ledges.

All the ledges can be easily worked by tunnels, thereby saving vast sums of money.

FORCE INCREASED AT STORM KING.

T. J. Costello, manager of the at work during the past week, which there never has been in the minds of additional force will be of vast help the mining men who are handling in getting the poperty in good shape this proposition intelligently. This by spring.

The Honest Dollar adit, says Mr. Costello, is rapidly showing that it is only a matter of work to prove the MORMON TEMPLE AT LA extreme value of the Eureka ledge. The width is still about seven feet in the clear with stronger indications that the fault which has been such a bother has about run its course. This is a most encouraging sign, presaging the near approach to an ore body.

The Storm King crosscut is rapidly approaching the ledge as indicated by the change in the formation, which is becoming heavily oxidized. It is an
