

If You Want a Placer Mine

HERE IS THE OPPOR TUNITY OF A LIFETIME

THE property consists of 420 acres, two and one-half miles in length, along a stream the entire distance. Two reservoirs, three miles of ditches, 500 feet of pipe, good cabins. Sufficient water to run two giants four months in the year, and from six to seven dollars a day per man can be taken out by drifting, eight months in the year.

From less than one-quarter of a mile, near the center of this two and a half miles, \$35,000 in gold was taken out in two seasons, by primitive methods.

Can begin hydraulicking in March and everything is ready for work.

Strong ledge of free milling ore carrying good values, entirely undeveloped, runs through the ground.

The owners are dissolving partnership and this is a forced sale.

\$10,000

WILL buy this ground. The profits of operation will pay for it in two seasons, in eight months work. The proposition will stand for the closest investigation, and personal examination is urged.

Demonstrate that you mean business and liberal terms will be given
