Deportation is the remedy which a Colorado paper suggests for the knocker evil. In some camps that which is most looked for, and consequently most endeavored, is money; but the mine should be divided between those who do not want it at all and those who are ready to pay for it. On the other hand, the mining industry is not only a source of great wealth to the state, but it is also the most important occupation of the state's population. It is the only real satisfactory method of determining the worth of ore. If the mining company has been a failure, this can be determined by a careful examination of the mine. If the mine is a success, it is the only real way to measure the value of the ore.
