Is Your Hair Sick?

That's too bad! We had noticed it was looking pretty thin and faded of late, but naturally did not like to speak of it. By the way, Ayer's Hair Vigor is a regular hair grower, a perfect hair restorer. It keeps the scalp clean and healthy.

"I am well acquainted with Ayer's Hair Vigor and I like it very much. I would espe-cially recommend it as an excellent dreasing for the hair, keeping it soft and smooth, and preventing the hair from spiriture at the ends." BINNIN FRITZ, Vendum, Mich.

4e by J. C. Ayer Co., Lowell, Mas er's SABBAPARILLA.

Two large paintings and seven water colors by Ibsen, painted while he was oung, have been discovered at Nit-Da-Sweden, in the possession of the widow of one of Ibsen's friends. It is well known that the dramatist during als youth was interested in drawing and painting. So far only two paintings end two water colors were known, be onging to a private collection. They all were painted during his youth.

"They say," remarked Uncle Allen parks, "that the corporations are not going to contribute anything to the campaign funds this year. Then we won't have as much campaign oratory as usual.

NEW ROAD FILES ARTICLES.

Astoria, Seaside & Tillamock Line is Incorporated.

Astoria.—Articles of incorporation of the Astoria, Seaside & Tillamook Railway company were filed in the county clerk's office here yesterday, by F. L. Evans, E. Z. Ferguson, H. G. Van Dusen and W. E. Buffum, as incorporators. The capital stock is \$2,000,000 divided into 200,000 shares of \$10 each. The principal office of the company is to be in Astoria, and according to the The principal office of the company is to be in Astoria, and, according to the articles its object is to construct and operate an electric railroad and telegraph and telephone lines from Astoria to Tillamook via Warrenton, Hammond and Seaside. It is also authorized to creet and maintain elevators, docks and warehouses, and to operate steamers on the Columbia and Willamette Rivers. Fillamook Bay and the Pacific Ocean. Fillamook Bay and the Pacific Ocean,

Josephine County Going Dry.

Grants Pass - Judge Jewell, of the Josephine county court, has ordered that all salioons be closed in Josephine county on and after July 1. The liquor dealers have been notified, and so far as now appears no objections will be made to the order. The 10 saloons of this city, and nearly all the country and mining camp saloons of the out-side precincts are already preparing to close. The goods on band are being disposed of as rapidly as the thirsty will buy, and it is evident that after July 1 there will be very little liquor on hand in this county.

Salem.—The election of Robert G. forrow to the office of circuit judge in Multnomah county will create a vacancy in the position of supreme court re-porter, which Morrow has held for a porter, which Morrow has held for a number of years. There are already four or five candidates for the place. The supreme judges select the court re-porter. His duty is to arrange copies of supreme court decisions for the printer and to write syllabi to be pub-lished at the head of the decisions. His lished at the head of the decisions. His compensation is \$500 per volume, which means about \$750 per year. The work does not interfere with private practice.

St. Johns Must Go Dry.

Portland.-St. Johns will go dry in secordance with the vote at the last 683,75; election. Judge Gantenbein, in the court yesterday morning, up-held the motion of County Judge Webster and Commissioners Lightner and Barnes to dissolve the temporary injunction which had previous. held the motion of County Judge Webster and Commissioners Light-ner and Barnes to dissolve the temporary injunction which had previously been issued against them compelling them to refrain from declaring St. Johns and University Park dry until a hearing was had in court.

OPENING LAKE MINES.

velopment Begins. Lakeview.-It is now more than farming. recent election give Chamberlain a plurality of 1,522 over Cake for United States senator. While the official can vass has not been made, Secretary of State Benson has tabulated the figures from the different counties, and the result is definitely known. There are some of the abstracts yet to be corrected by the county clerks before the official canvass can be made. The official canvass can be made. The official canvass can be made. The official returns gave Chamberlain a gain of 100 votes in Crook county, as compared with unofficial reports.

The discoveries of the discoveries of the secretary of gold were made in this section, but still no mine has been quite gold were made in this section, but still no mine has been opened up. Copy the secretary of the good prospects are owned or gold with but 9 to 10 inches. The average annual precipitation for southern Idaho is 12.95 inches. Dry farming should be successful in Idaho or all soils that are 4 to 5 feet deep this has not been the case, some of pared with unofficial reports. not familiar with mining, and have held onto their claims, expecting that some one would make a rich strike and that they could then dispose of their possessions at a big price. Since this has not been the case, some of them are letting go now, and the properties are passing into the hands of practical mining men. This sorries

SETTLERS IN HARNEY.

Stock Ranges Are Disappearing Before the Plaw.

Burns - The recent beavy rains Burus—The recent beavy rains have insured the farmers and stockmen large crops of grain and improved the wild hay crop, which was almost a failure, owing to the light snowfall last winter. More people are farming in this county this year than ever before. Localities where a few years ago only cattle grazed are now occupied by progressive settlers, who are turning land that had never produced anything but sagebrush and bunchgrass into grain fields, orchards and alfalfa meadows.

There has been a heavy immigration to this county during the past year. Most of the new settlers are well pleased with the country, stating that the land is better than they ever expected to find open for entry under the homestead laws.

The 60,000 acres held under the Carey act by William Hanley, of this count, and some Fortland business men is being contested by the Pacific Livestock company in the general land office on the grounds that the

Livestock company in the general land office on the grounds that the land sought is not desert land and will produce crops without irrigation.
If this tract is reopened for settlement, it will be the means of increasment, it will be the means of increasing the population of the county by several thousand people, besides bringing under cultivation the best farm land in Harney valley.

Wins Oratorical Contest.

University of Oregon. Eugene -In Criversity of Oregon. Eugene—In the Failing-Beekman prize oratorical contest last evening in Villard hall. Bert W. Prescott, of Baker City, was accorded first place, and the Failing prize of \$150 cash. Miss Miriam Van Waters, of Portland, won second place, and the Beekman prize of \$100 cash. Bert Prescott is president of the associated students, and this year won the intercollegiate oratorical won the intercollegiate oratorical contest. Miss Van Waters is editor of the Oregon Monthly.

Warehouse for Canby.

Carrly.—Work has begun on the new warehouse of W. H. Bair, and the new building will be one of the best and most complete warehouses in the valley. The structure will be 50x100 feet in size, with concrete cellar, and two floors, with some lined air spects in the walls. with paper-lined air spects in the walls, making the building frost-proof. This makes four warehouses of this kind at Canby, and makes Canby the best market along the Southern Pacific, in this vicinity.

DRY FARMING IN IDAHO.

Resume of Idaho Experiment Station Bulletin No. 62.

By Elias Nelson, Irrigationist county and throughout southern Idaho the precipitation is small and arid citizen, cordially. "So have L" conditions there prevail. Farming without irrigation in those portions of

two years since the first discoveries of . In Idaho dry farming has been quite

Dry farming has been practiced sucecssfully on various soils ranging from heavy clay to sundy. The depth of the soil is of more importance than the kind. The average soil in southern Idaho is capable of absorbing 3 inches of water for each foot of depth. Of this amount 2 inches is available water and may he used by crops. The remainder is not given up by the soil. To absorb 12 inches of rain and hold it as available moisture requires 6 feet of soil. While a deep soil is a great advantage, dry farming has been successful on soils of lesser depth than that. The equivalent of an inch of rain stored is the soil is eapable of producing 21/2 bushels of wheat per acre if it he utilized.

With good methods it should be pos sible to conserve at least one half of the precipitation to do duty in crop production. In actual practice not much more than one fourth is generally utilized, the three-fourths being lost by and shouted upstairs: surface evaporation or by run-off.

The amount of moisture that is absorbed by the soil and retained very largely determines the yield. Deep percolation is therefore to be desired and surface cultivation to prevent unnecessary losses by evaporation should be practiced. Deep plowing favors the storage of water in the soil. Maintaining a dust mulch over the surface tends to conserve that which the soil has absorbed. It is important to preserve this dust blanket over fields by harrowing and especially on the summer fallow should this be done. That will prevent the soil below the mulch from drying out. Leaving the summer fallow lie rough during summer allows the soil to dry out. With such practices there is a large loss of moisture and no

there is a large loss of moisture and no particular gain in fertility for the elaberation of plant food does not take place in a dey seil.

Summer fallowing alternate years is recommended for all localities with less than 15 inches of annual precipitation. Where there is more than that it is generally possible to grow a crop every year. Growing a cultivated crop every other year is more profitable than a single crop system. For every year crapping the plawing should be in the fall. For the bare summer fallow the plawing may be either in the spring or in the fall. The former has been most successful in the Columbia basin upsuccessful in the Columbia basin up-lands, the latter has proven the better system in Utah.

With full plowing the soil settles dur-

Ing winter and good capillary connec-tion with subsoil is thus ensured with spring plowing the lower part of the furrow slice does not become firm enough. Packing to close up the air spaces is therefore an advantage. Either the sub-surface packer or the corrugated roller may be used for that

et along the Southern Pacific, in this icinity.

"I was absolutely out of mest," he pleaded, "and I couldn't shoot a canvas-back duck without getting into trouble with the game warden."

Let us not blame Samuel Taylor Cole ridge, however, for taking liberties with this bald narrative when he worked it up into a Poem You Ought to Know.

YOU'RE TOO THIN.

Even Slight Catarrhai Derangements of the Stomach Produce Additor mentation of the Food.

It's Stomach Catarrh

Some people are thin and always remain thin, from temperamental reasons. Probably in such cases nothing can be done to change this personal peculiarity.

But there are a large number of people who get thin, or remain thin, who naturally would be plump and fleshy but for some digestive derangement.

Thin people lack in adipose tissue. Adipose tissue is chiefly composed of

Fat is derived from the oily constit-

uents of food.

The fat-making foods are called by the physiologist, hydrocarbons. This citizen saw the point at once and was class of foods are not digested in the profuse in his thanks at being set right, stomach at all. They are digested in the duodenum, the division of the alimentary canal just below the stomach.

The digestion of fat is mainly, if not wholly, the work of the pancreatic juice. This juice is of alkaline reaction, and is rendered inert by the addition of acid. A hyperacidity of the digestive fluids of the stomach passing down into the duodenum, destroys the pancreatic fluid for digestive purposes. Therefore, the fats are not di-gested or emulsified, and the system is deprived of its due proportion of oily constituents. Hence, the patient grows thin.

The beginning of the trouble is a catarrhal condition of the stomach which causes hyperacidity of the gastric juices. This hyperacidity is caused by fermentation of food in the stomach. When the food is taken into the stom-ach, if the process of digestion does not begin immediately, acid fermenta-tion will take place. This creates a hyperacidity of the stemach juices which in their turn prevent the pan-creatic digestion of the cils, and the emaciation results.

A dose of Peruna before each meal hastens the stomach digestion. By hurrying digestion, Peruna prevents fermentation of the contents of the stomach, and the pancreatic juice is thus "No. papa—truly! All Ethel and I only remains for the patient to cata did was to try to sing him to sleep with your luilaby."

preserved in its normal state. It then only remains for the patient to cata sufficient amount of fat-forming foods, and the thinness disappears and the company of the patient to cata the patient to c preserved in its normal state. It then only remains for the patient to eat a ness takes its place.

Two Little Slips.

Admission slips to the hospitals are pretty likely to be matter-of-fact records and more or less trugic, but occasionally, the New York Sun reports, a bit of unconscious humor is found in them.

A slip at Gouverneur recently reported that a driver of a hausom had received his injuries by "falling off a Another Gouverneur slip announced that the patient was hurt by "falling off water wagon"—a fall, it might be added, which is always dangerous.

"With Shining Morning Pace." "This luminous plant," said a young father, according to the Philadelphia Record, "ought to be an excellent thing among families."

"How so?" asked a friend.

"Why," said the young father, "you just touch up the buby's face with it before retiring, and then you can see to give him his bottle without making a light."

General Demand

of the Well-Informed of the World has always been for a simple, pleasant and efficient liquid laxative remedy of known value; a laxative which physicians could sanction for family use because its component parts are known to them to be wholesome and truly beneficial is effect, acceptable to the system and contla in action.

In supplying that demand with its excellent combination of Syrup of Figs and Elixir of Senna, the California Fig Syrup Co. proceeds along ethical lines and relies on the merits of the laxative for its remarkable SUCCESS.

That is one of many reasons why Syrup of Figs and Elixir of Senna is given the preference by the Well-Informed. To get its beneficial effects always buy the genuine-manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists. Price fifty cents per bottle-
