

For that Dandruff

There is one thing that will cure it—Ayer's Hair Vigor. It is a regular scalp-medicine. It quickly destroys the germs which cause this disease. The unhealthy scalp becomes healthy. The dandruff disappears, had to disappear. A healthy scalp means a great deal to you—healthy hair, no dandruff, no pimples, no eruptions.

The best kind of a testimonial—

Libby's Food Products

Libby's Vienna Sausage

You've never tasted the best sausage until you've eaten Libby's Vienna Sausage.

It's a sausage product of high food value. Made different. Cooked different. Tastes different and is different than other sausage.

Libby's Vienna Sausage, like all of the Libby's Food Products, is carefully prepared and cooked in Libby's Great White Kitchen.

It can be quickly served for any meal at any time. It is pleasing, not over-flavored and has that satisfying taste. Try it.

Libby, McNeill & Libby, Chicago.

RATE INCREASE CONTRARY TO LAW

Railroad Agreement is an Illegal Pool, Says Commissioner.

Chicago, July 18.—A special to the Tribune from Washington says: In the opinion of John Clements, a member of the interstate commerce commission, the proposed general increase in freight rates discussed in New York yesterday by the presidents of many eastern railways in the Trunk Line association would constitute a violation of the Sherman anti-trust law and would render all the railroads concerned liable to severe penalties. Mr. Clements explained that the interstate commerce commission as a commission is not at all interested in the Sherman anti-trust law, the execution of which is entrusted to the department of justice, but he expressed his opinion as a lawyer and cited a recent instance where the supreme court had so decided.

"As a lawyer," he said, "I am willing to hazard the opinion that such an increase in rates as was contemplated by the eastern railways at their meeting in New York would be in direct violation of the anti-trust law. When practically all of the eastern roads, and, for that matter, all of the roads in the country, by a mutual agreement raise rates, it is to my mind a procedure which brings them under that clause of the anti-trust law which prevents 'pooling' and illegal combinations.

"Whether or not there is any necessity now for an increase of rates, I am not prepared to say. If the increase should come, the commissioners would have ample time to decide that point. I am convinced, however, that the railways will give the anti-trust laws careful consideration before they consider a general increase in rates.

"A similar case came up in Georgia some time ago during some lumber hearings. Federal Judge Speer decided that the railroads had formed an illegal combination in increasing the rates, and the supreme court affirmed the decision."

FIRE ON STRIKEBREAKERS.

Alabama Miners Kill Deputy Sheriff and Wound Dozen Men.

Birmingham, Ala., July 18.—Robert Gardner, a deputy sheriff, was fatally wounded and at least a dozen miners more or less seriously hurt as the result of an attack on a train bearing strike-breakers to take the places of striking union miners at Jefferson near here, yesterday. The train was in charge of 13 deputies, and was en route to Adamsville. It is said the union miners attempted to induce the strike-breakers to leave the train, and threatened to kill them if they went to work.

Governor Comer has ordered a company of cavalry from Montgomery to the scene, and troops already on the ground are under arms, and will patrol the district tonight, preventing further disorders. Deputy Gardner, mortally wounded, was brought to Birmingham last night. Deputy George Smith, accompanying him, estimates that no less than 1000 shots were fired on both sides in the attack at Jefferson.

According to Smith the engagement was opened when a train bearing 50 strike-breakers attempted to leave Jefferson for Adamsville. Prior to this a number of union miners had made overtures to the strike-breakers to join their ranks, threatening at the same time to kill them in case they attempted to work the mines of the operators.

Doesn't Mind the Fleet.

London, July 18.—Criticism by the British press of Australia and New Zealand for the expenditure of enormous sums in preparation for the entertainment of the American fleet is not finding favor with the general public here. Sentiment of the people generally is with the colonies in their stand on the question, and editorial utterances on the subject are much milder today than they have been in the past. On the continent there has been no criticism of the world voyage of the United States men-of-war.

Marshall is Indicted.

New York, July 18.—A. G. Marshall, manager of the Standard Protective society, who, with Henry G. Cooke, president of the Oregon Rancheing & Timber company was indicted on a charge of conspiracy to defraud the United States by violating the law in relation to sale of timber land in Oregon, surrendered himself to United States Marshal Henkel yesterday. He was later arraigned in the United States circuit court.

Will Use Great Northern Track.

Billings, Mont., July 18.—It is announced that with the completion of the line of the Billings Northern railroad from Billings to Great Falls, Mont., about September 1, the Burlington line, now using the Northern Pacific line to the coast, will proceed over the Billings Northern to Great Falls, from which place the tracks of the Great Northern will be used.

DRY TICKET CHOSEN.

Chafin and Watkins Will Carry Banner for Prohibition Party.

Columbus, O., July 17.—For president, Eugene W. Chafin, of Chicago. For vice-president—Aaron S. Watkins, of Ada, Ohio.

The above ticket was nominated yesterday by the Prohibition national convention, both men being chosen unanimously. The full endorsement of the convention was not, however, given to Mr. Chafin until after three ballots had been taken.

Chafin, who was a delegate to the convention, was escorted to the platform. He was formally declared by Chairman Scanlon to be the presidential nominee, and in a speech returned his thanks for the honor which had been thrust upon him, declaring that he would rather be the nominee of the Prohibition party than the successful candidate of any other party.

Both the presidential and vice-presidential nominees are candidates for governor in their respective states on the Prohibition ticket.

Engene W. Chafin, who leads the Prohibition party this year is an attorney residing in Chicago. He is a native of Waukesha, Wis., and for some years practiced law there. He was at one time candidate for governor of Wisconsin on the Prohibition ticket, and was this year placed in the running for the same position in Illinois by Prohibitionists of that state.

The forenoon session of the convention was devoted to the discussion and adoption of a brief platform, which is possibly the shortest on record, containing not more than 350 words.

TRIES NEW EXPERIMENT.

Fleet Maneuvers Controlled on Land by Use of Wireless.

London, July 17.—England tried yesterday a new experiment in naval warfare, the conducting of a battle from land by wireless. Over 300 vessels are now maneuvering in the North sea, engaged in a sham battle, the movement of every vessel being controlled by wireless by experts in the admiralty office in this city.

As each ship changed her position or fired on the "enemy" the move was reported to a map showing the situation at every minute. Markers were moved about on the map, such as pieces would be moved on a chess board, the moves being flashed to the vessels by wireless.

It is claimed that this system would be better in the controlling of vessels than by an admiral in action, as the men on land can receive reports from the front and work out the problems while removed from the exciting scenes of battle.

The experts who conducted the battle from the admiralty office would not comment on the result. They simply said it was satisfactory.

DREADED ARGENTINE ANT.

Will Destroy Orange and Fig Crops of California if Not Killed.

Oakland, Cal., July 17.—Professor C. W. Woodworth, head of the department of entomology of the University of California, has reported to Governor Gillett that the dreaded Argentine ant has made its appearance in California in East Oakland.

Professor Woodworth states that unless measures are taken at once to drive out the pest it will utterly destroy orange and fig crops in the state.

The Argentine ant is a small insect only an eighth of an inch long, but is of a fighting nature, and has driven all other ants from East Oakland.

It is one of the most dangerous pests that has ever been brought to the United States from a foreign country. According to a report by the Louisiana crop pest commission, the ant has destroyed millions of dollars' worth of property in that state.

Express Train Goes Into Ditch.

East Stamford, Conn., July 17.—One person was killed and several others injured when the fast White Mountain express was derailed a few miles east of here yesterday. Physicians and a wrecking crew were rushed to the scene on a special train. Dashing along at a rapid rate of speed the engine struck a defective rail. The injured passengers will be brought to this city, and it is believed that prompt medical attention will prevent more deaths, although some of those injured are said to be in a precarious condition.

Millions to Lower Grade.

New York, July 17.—According to a statement made yesterday by an official of the Chicago, Milwaukee & St. Paul railroad, the cost of the Pacific coast extension of that system will be about \$5,000,000 more than the original plans called for. This increase in the cost of work is due, it is said, to a decision to run the road at a lower grade over the mountain division than the officials first figured on. The whole work now calls for the expenditure of \$77,000,000, but there will be no shortage of funds.

Striking Miners Buy Guns.

Birmingham, Ala., July 17.—Father H. E. O'Grady, a priest of St. Catherine's Catholic church, is heading a committee which will make an effort to bring about a settlement of the coal miners' strike.

Mosquitoes Kill Cattle.

High Island, Tex., July 17.—Mosquitoes are killing cattle by droves on ranches around the Gulf coast region. Great clouds of the insects hover over pastures where cattle feed, and literally drain the animals of their life blood, causing them to die from weakness. One ranchman has lost 200 head in ten days, and pastures are strewn with the carcasses of dead cattle.

POPULAR SCIENCE

Messrs. Palermo and Ciungoloni, the inventors of "tachyol" (fluoride of silver), an antiseptic employed in surgery, have found that a solution of 1 part in 500,000 of water will destroy all germs, including bacillus subtilis, its germicidal effect being much greater than that of chlorine, bromine or ozone.

To lessen risk of loss of submarine, torpedoes used in naval practice and other objects liable to sink in the sea, a French oceanographer attaches a vessel of oil having a long and short time tube one-tenth of an inch in diameter. When submerged the oil rises from the long one drop by drop, locating the sunken object by the film on the water's surface.

The German government more than a year ago imposed what seemed to be a moderate tax on railroad tickets. The result of it has been a diversion of travel from the higher to the lower classes, to such an extent that a decrease of about \$2,500,000 in the passenger earnings of the Prussian state railroads alone is attributed to it. Nearly at the same time a new schedule of charges for passengers and baggage was introduced, which on the same railroads reduced earnings about \$1,500,000. But this was expected.

Dr. H. C. Stevens, of Seattle, reports recent experiments which show that objects seen by indirect vision ordinarily appear larger in the right half of the field of vision than in the left. With a smaller number of persons this is reversed. From these facts he deduces a possible origin of right and left-handedness. Right-handedness, or its reverse, develops at about the age of seven months. Dr. Stevens suggests that they may be due to the phenomena of vision just described. By a reflex effect the infant reaches after the objects best seen with the arm nearest to them.

In his book on the great veil of German East Africa, Herr C. G. Schilling gives a vivid description of the shimmering, undulating sea of light which bathes that country, causing light-colored objects often to appear black, and making distances so deceptive that when but a few hundred paces away it is sometimes impossible to distinguish a rhinoceros from an ostrich or a termites' nest. Water on this veil is often the greatest of luxuries, "as precious as life itself, ever when obtained from small mud pools." Yet the country, when viewed from hill tops or from tall trees, exhibits a wonderful panorama of wild life. Elephant there are not dependent upon grass but will strip trees of their bark or branches when hard pressed, and they are sometimes found in company with giraffes. In some of the small lakes of the Kilimanjaro region hippopotamus may be watched by a concealed observer at as close quarters as in a zoological park.

ORDER OF THE GOLDEN HORSE SHOE.

How many persons have ever heard of the Order of the Golden Horseshoe, the first order founded in America?

In 1724, when Virginia extended from the Atlantic into the unknown West, few of her colonists had crossed the Blue Ridge or the Alleghenies. So full of dangers from savages and wild beasts and so full of natural difficulties was the passage of these terrible heights, that Governor Spotswood, setting out to discover a pass, looked on the expedition as so hazardous that he took with him a guard of "soldiers, gentlemen, and pioneers," armed and carrying provisions. These scaled the pass with great hardships and perils, and returned after the Governor had cut the name of King George in the rocks on the highest peak.

He then constituted the society, or order, of the Golden Horseshoe. Each man who had scaled this high pass was made a member of it, and to each one he presented a golden horseshoe. On the side was inscribed in Latin: "So it pleases him to cross mountains."

Any men thereafter who could prove that he had read with his own eyes the name of the King on the height was entitled to become a member of this order.

DEVOUTS DEFINITIONS.

Call: The only thing that will tackle a baby without first considering the consequences.

Chimeras: The food of indolent theorists.

Humor: An anvil upon which to crack a smile.

Matrimony: The sea that swamps many a courtship.

Sympathy: A convenient thing for a silent partner.

Miser: One of the things that will keep in any climate.

Dude: The excrescence of insufferable conceit.

INCOMPLETE SIGNALS.

The ingenious Charleston News and Courier suggests that the new spring hats would gain in distinction if they sported a neat two-foot flagstaff.

And right away somebody will want to suggest a sign language for the flag in the hat.

Of course the flag at half mast might indicate that its owner was a widow, and a reversed flag would mean that the lady was in distress.—Cleveland Plain Dealer.

One quiet cooking lesson beats two noisy music lessons.

S.S.S. OLD SORES CURE

No old sore can heal until the cause which produces it has been removed. External applications of salves, washes, lotions, etc., may reduce the inflammation and assist in keeping the place clean, but cannot cure the trouble because they do not reach its source. Old sores exist because the blood is infected with impurities and poisons which are constantly being discharged into the place. The nerves, tissues and fibres of the flesh are kept in a state of irritation and disease by being daily fed with the germ-laden matter through the circulation, making it impossible for the sore to heal. S. S. S. cures chronic sores by its purifying action on the blood. It goes down into the circulation, and removes the poison-producing germs, impurities and morbid matters which are responsible for the failure of the place to heal. S. S. S. makes the blood pure, fresh and healthy; then as new, rich blood is carried to the spot the healing process begins, all discharge ceases, the inflammation leaves, new tissue begins to form, the place fills in with firm, healthy flesh, and soon the sore is permanently cured. S. S. S. is purely vegetable, the safest and best blood purifier for young or old. Book on Sores and Ulcers and any medical advice free to all who write.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a ringing sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be removed and this tube restored to its normal condition, hearing will be destroyed forever; it is not true that deafness is incurable, but it is incurable unless the inflammation can be removed by Hall's Catarrh Cure, send for circulars, free.
