

S.S.S. HEALS SORES AND ULCERS

Sores and Ulcers are indications of impure blood. They show that the circulation has become infected with germs and poisons, which are being constantly discharged into the open place to irritate the delicate nerves, tissues and surrounding flesh and keep the sore in a state of inflammation and disease. Whether these impurities in the blood are the result of some debilitating sickness, an old taint from a former disease, or whether it is hereditary bad blood, there is but one way to cure sores and ulcers, and that is to purify the blood. Washes, salves, lotions, etc., are often beneficial because of their cleansing, antiseptic effects, but nothing applied to the surface can reach the blood, where the real cause is, and therefore cannot cure. S. S. S. is the remedy for sores and ulcers of every kind. It gets down to the very bottom of the trouble and removes every trace of impurity or poison, and makes a lasting cure. S. S. S. changes the quality of the circulation, so that instead of feeding the diseased parts with impurities, it nourishes and heals the irritated, inflamed flesh and causes the ulcer to fill in with healthy tissue by supplying it with pure, rich blood. Book on Sores and Ulcers and any medical advice sent free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

Putting His Foot in It.
"It's good to see you again, Smidley, after all these years, and talk over old times. By the way, I remember there was a pretty school teacher that was a good deal stuck on you at one time. She got over it, didn't she?"
"I hope not, Gunson. I married her about ten years ago."

FITS Dr. J. H. Jones and Dr. J. H. Jones recently cured by Dr. J. H. Jones's Great Nerve Remedy. For FREE \$2.50 trial bottle and treatise, Dr. J. H. Jones, L. A. Arch St., Philadelphia, Pa.

Explained.
"They don't care for expense here," said the regular summer boarder at the summer resort hotel. "When you call for lemonade they give you a stalk or two of macaroni with it instead of a straw."
"I was just wondering," observed the new boarder, after a pause, "why this baked macaroni tastes so strongly of lemon juice."—Chicago Tribune.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Professional Crookedness.
"Pardon me," said the doctor, who was taking a downtown luncheon with the professor; "but why are you cutting your steak in that zigzag fashion?"
"I am trying," answered the professor, "to follow along its loin of least resistance."

Catarh Cannot be Cured
with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarh Cure is taken internally, and acts directly upon the blood and mucous surfaces. Hall's Catarh Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarh. Send for testimonials free.
F. J. HENRY & CO., Props., Toledo, O.
Sold by Druggists, Pharmacies, etc.
Take Hall's Family Pills for constipation.

There is an altar society in Brooklyn composed of night policemen. The members contribute a certain amount every month which pays for lights and flowers on an altar of perpetual adoration.

Habitual Constipation

May be permanently overcome by proper personal efforts with the assistance of the one truly beneficial laxative remedy, Syrup of Figs and Elixir of Senna, which enables one to form regular habits daily so that assistance to nature may be gradually dispensed with when no longer needed as the best of remedies, when required, are to assist nature and not to supplant the natural functions, which must depend ultimately upon proper nourishment, proper efforts, and right living generally. To get its beneficial effects, always buy the genuine.
Syrup of Figs and Elixir of Senna manufactured by the CALIFORNIA FIG SYRUP CO. ONLY SOLD BY ALL LEADING DRUGGISTS one size only, regular price 50¢ per bottle.

Conforming to Tradition.
"Uncle," said the little girl from the city, feeling that something of the kind was expected from her, "which is the tree that grows the leaf lard?"
Having thus complied with the conventionalities and asked the usual artless question, the little girl from the city ran out to the barn, saddled the chestnut sorrel, and galloped him all over the neighborhood.

The Real Thing.
"There are no literature games in this age. Where do you find nowadays the words that burn?"
"In the books of corporations when wanted on the witness stand."—Baltimore American.

To Break in New Shoes.
Always shake in Allen's Foot-Powder. It cures hot, sweating, itching, swollen feet. Cures corns, ingrowing nails and bunions. At all druggists and shoe stores, etc. Don't accept any substitute. Sample mailed FREE. Address Allen & Gimatel, Le Roy, N. Y.

Overcautions.
Capt. Kidd, the pirate, was burying his treasure.
"I could lock it up in a safety deposit vault, of course," he said, "but I want to put the stuff where the personal property assessor will never hear of it."
So well did he do the job, in fact, that it hasn't been turned up, even yet.

System.
Mrs. Homer—Isn't it terrible to have to cross the street at one of the busy corners?
Mrs. Storer—Yes, indeed. You never know when one of those big policemen is going to grab you by the arm and scare you half to death.—Chicago Tribune.

Flattery in Art.
Artist—Whose portrait is that?
Artist—Mrs. De Scudds. What do you think of it?
Critics—It's a splendid picture, but it doesn't look anything like her.
Artist—Of course not. I need the money.

By Default.
"Does your husband ever praise your cooking, Bertha?" asked the young wife's elderly aunt.
"O, yes, indeed, auntie?"
"Well—er—he doesn't say much, you know, but I can always tell when the cooking pleases him. He doesn't swear at it."

The Hemisphere Seasons.
Since the earth is much farther from the sun when it is summer in the northern hemisphere and winter in the southern than when the seasons are reversed, it might be supposed that the climate would be more extreme in the southern half of the earth than it is in the northern. The actual difference is made slight by the fact that the proportion of land to water is much greater in the northern hemisphere.

The Value of Literature.
Wife—May I kindle the fire with the first act of that old play of yours?
Author—Better try the second. It's more fiery.—Transatlantic Tales.

Fashions Reversed.
Mabel—How do you like my new gown, grandma?
Grandma—I don't. In my day girls wore one button gloves and gowns buttoned up to the neck. Now they wear one turtleneck gowns and gloves buttoned up to the neck.—Judge.

DEATH LIST IS NOW THIRTY

Damage From Southern Floods Was Greatly Underestimated.

Total Loss in Augusta Alone is Now Estimated at \$1,500,000—Other Sections Have Suffered Heavily Also—Call for Aid is Issued by Stricken City.

Atlanta, Ga., Aug. 29.—Loss of 30 lives, most of the victims colored, a call for assistance, damage estimated at \$1,500,000 in Augusta alone, \$1,000,000 in other parts of Georgia, and \$1,500,000 in South Carolina, summarizes the flood situation in the South. The temperature is falling and threatens suffering to people without shelter.

Reports of damage from points in South and North Carolina are coming in slowly. Bridges have been washed away in South Carolina along the Southern Railway, and until midnight last night it was impossible to secure communication with any point out of Atlanta. In Augusta, the principal suffering is along deep gullies known as Bridwells Bottoms and Perrys Bottom. Here the houses were covered to the eaves. The water also damaged business blocks in the city, and the total damage in this city will be a million and a half dollars. It is not expected that the loss of life will be increased. Most of the killed by high water were caught in their homes on the outskirts of the city.

There are many rumors of others killed, but these have not been verified. In South Carolina the loss of life will reach probably 20. In North Carolina possibly half a dozen whites and as many negroes have been killed. The flood water at Augusta is receding rapidly, and it is apparent that the loss has been underestimated.

LARGE MOB BILL.

Springfield Victims Begin Their Suits Against City.

Springfield, Ill., Aug. 29.—The wife of Scott Burton, the first negro lynched in the recent riots here, has made no attempt to settle with the city for the death of her husband heretofore, but today filed suit for the \$5,000 which the law allows to the heirs of persons who are killed by mobs. It is announced also that a similar suit will be filed by the heirs of William Donnegan, another negro who was lynched.
The heirs of four other negroes killed during the rioting cannot obtain the money because they were killed by stray bullets or in open battle, and were not slain by the mob. Property owners continue to file suits for damages against the city, and the sum of the claims already made is over \$50,000.

It is expected that these cases will be given preference in the courts and will receive quick action. The general sentiment among the citizens is that the survivors of the families of the mob victims should be paid at once and that the city should pay for the damage done by the rioters.

ANOTHER CLOUDBURST.

Fifteen People Drowned by Storm in New Mexico.

Trinidad, Colo., Aug. 29.—A flood in the Cimarron river, following a cloudburst, washed away a number of dwellings at Folsom, N. M., last night, and 15 persons are reported to have been drowned. Twelve bodies have been recovered. Two miles of track and 12 bridges on the Colorado & Southern Railroad were washed out. Trains will be laid out 48 hours.

Meager advices received here today say that the entire city was swept by the floods caused by the cloudburst. Many houses were swept completely away, and nearly every house in the town was damaged to some extent. The advices say searching parties have been formed, and that it is expected many more bodies will be found before night.

Folsom is in the northeastern part of New Mexico, near Raton, on the Santa Fe Railroad. Its elevation is about 7,000 feet, and it is constantly in danger of floods, which sweep down from the surrounding mountains whenever there is a cloudburst or heavy rain in the hills.

See German Maneuvers.

Berlin, Aug. 29.—General Da Fon Seck, the Brazilian minister of war, and General Mendez Moraes, of the Brazilian army, will arrive tomorrow at a Berlin hotel as the guests of Emperor William. The party has come out from Brazil to witness the fall maneuvers. The invitation extended to them and its acceptance are regarded as political acts rather than a pure military proceeding, with the object of drawing the two governments into more agreeable relations.

California Oil Merger Planned.

Los Angeles, Cal., Aug. 29.—Plans are being made today for a \$30,000,000 merger of Southern California oil interests, according to the statement today of an official of one of the companies concerned. The merger was first proposed at a meeting of the representative of the principal operators of the Whittier district. Combination is believed to be the best means of regulating certain business of the companies and the merger will be effected.

Sage Was Worth \$64,153,800.

New York, Aug. 29.—Russell Sage's estate is valued at \$64,153,800. This fact became known today through the signing of the order for the transfer tax payable to the state.

BLACK ALKALI.

Professor Elliot Makes Suggestions for Overcoming Trouble.

From Washington State College, Pullman.
In a letter addressed to a farmer residing near Walla Walla, Professor Elliott discussed black alkali, and its interference with the growth of alfalfa; plants which are tolerant of alkali; grasses and plants which tend to crowd out alfalfa, and means preventive of this; and a certain pest which is damaging the leaves of apple trees grown by this farmer. Briefed somewhat, the letter follows:

"I understand from your letter, that you are having difficulty with the black alkali, which interferes with the starting of alfalfa. The land in question is undoubtedly so supplied with water near the surface that there is considerable evaporation, which has caused the alkali to rise to the surface. This trouble would be observed in all such land, and the best way to prevent it is by surface draining. This would permit the washing out of the alkali from the surface through the drains, and I think you would have sufficient rainfall in the winter to accomplish this. The drains should be from two to three feet below the surface, which would not interfere with the cultivation of alfalfa, as the water level would be at the distance beneath the surface of the lower level of the drains.

"I suspect that if you are able to get a start of alfalfa, it would be able to overcome the effect of the alkali, which I assume is strongest near the surface; but with the water level so near the surface as it is, the roots would not have any encouragement to penetrate deeply, and would probably stop at the water table. It might be possible to counteract the effect of the alkali by the use of considerable manure, or some chemical fertilizer, but I very much doubt the value of such treatment.

"We have seen some excellent stands of alfalfa secured by seeding alfalfa in the fall. Fall seeding should be done early enough to secure the full benefit of the fall rains, and thereby make a growth, which would insure that the alfalfa would pass safely through the first winter, while the plants were somewhat tender. I think that in the warm section of the state, where you are located, that this would be perfectly possible; and it would have the further advantage of starting during the time when the alkali would be less abundant, due to its being washed out by the winter rains.

"Regarding plants which might be tolerant of alkali, the station would inform you that there are several, but that it is quite difficult to obtain the seed of such in any quality. There is a plant known as salt grass (*Dactylis Maritima*), which has a small seed, and is very coarse, which is somewhat common, but which seeds very sparingly; consequently, getting a start of this grass is very difficult. It does not make first class forage but stock will eat it. Its chief value is its ability to grow in alkaline places, thereby absorbing the alkali.

"It is said that the Australian salt bush will do the same. This plant resembles tumble weed, and the station has been informed that it is becoming quite a pest in the neighborhood of Walla Walla. Therefore the experiment station does not advise you to try it.

"The salt grass to which you refer is entirely different from the Iowa quack grass. You will find that blue grass, as well as other grasses, will frequently crowd out alfalfa; in fact, throughout this region we find that after six or seven years the alfalfa becomes so crowded out by other grasses that the ground has to be worked over, or plowed up. Frequent disking will control this to some extent. I doubt if alfalfa will grow in any soil where the water table is as near as three feet to the surface.

"The pest which you mention is undoubtedly the aphid, or apple lice, which affect the leaves. They are sucking insects, and absorb so much of the sap that the leaves curl up and ultimately die. It is difficult to control wire worms when they once get a start. It is possible that a treatment of air-slacked lime around the plants, or even an application of salt, might have a beneficial effect. Either of these applications would need to be made with great care."

Query—Will you kindly advise us concerning the use of dust sprayers in the fruit raising sections of the Pacific slope? Has their success been uniform, or otherwise?

Ans.—There is a peculiar condition existing at the present time relative to the use of dust sprays in the several fruit growing sections of the Northwest. Quite a number of orchardists are using the dust sprays at the present time, and are successful to the extent of keeping their fruit almost entirely free from insect pests, reducing the amount of injury to less than one per cent. Other experiments have failed entirely. Where successfully used, this method of spraying is very satisfactory, especially in hilly orchards where it is almost impossible to get around with a gasoline outfit. In the opinion of W. S. Thorner, horticulturist of the state experiment station of Washington, the matter of dust sprays is a good field for further exploitation. — From the Washington State College, Pullman.

Her Generosity.

He—I wish that you were poor, so that you would be willing to marry me.
She—Evidently I am far more generous than you. I wish you were rich, so that I might be willing to marry you.

Sad Oversight.

How many persons who go Away on vacations to roam Take trunkfuls of perfectly useless things And leave their manners at home!

John Has Become a Sightseer.

"John Chinaman, as a race, has become fired with municipal zeal," said a New Yorker who likes to watch the sightseeing wagons. "Also John has become financially reckless. Several times this spring I have seen 'rubber-necks' go by with two or more Chinamen among the passengers. I don't remember ever to have seen that phenomenon until this season, except, of course, in the case of traveling Orientals. But the sightseeing Chinese that I have noticed lately are residents of New York out for the first time in their lives probably to see something of the town they live in."

Conscientious About It.

"Mr. Glizzard," asked the caller, "are you carrying all the life insurance you can afford?"

"No," answered the man at the desk. "I can afford more, and I had expected to take out more, but from a note I got from my employer this morning I have begun to suspect that I'm carrying a good deal more than I am worth."

A Sporting Event.

Mrs. Peck—Henry, do you see anything in the paper about Blaker running over his mother-in-law?

Mr. Peck—Not yet. I haven't come to the sporting news.—Pack.

HOWARD E. BURTON.—ASSAYER of U. S. Chemical Leadville, Colorado. Specimens priced: Gold, silver, lead, zinc, copper, tin, iron, nickel, cobalt, manganese, platinum, cyanide tests. Mailing envelopes and full price list sent on application. Control and license work solicited. References: Carbonate & Local Bank.

WHEN YOU COME TO PORTLAND

ARRANGE TO STOP AT THE CORNELIUS PARK AND ALDER STS.

A New and Modern European Hotel, catering particularly to State people. A refined place for ladies visiting the city, close to the shopping center. Rates reasonable. Free Bus.

H. K. CLARKE, (late of Portland Hotel) Mgr.

KASPARILLA

This sterling household remedy is most successfully prescribed for a "world of troubles." For derangements of the digestive organs it is a natural corrective, operating directly upon the liver and alimentary canal, gently but persistently stimulating a healthful activity. Its beneficial influence extends, however, to every portion of the system, aiding in the processes of digestion and assimilation of food, promoting a wholesome, natural appetite, correcting sour stomach, bad breath, irregularities of the bowels, constipation and the long list of troubles directly traceable to those unwholesome conditions. Kasparilla dispels drowsiness, headache, backache and despondency due to inactivity of the liver, kidneys and digestive tract. It is a strengthening tonic of the highest value. If it fails to satisfy we authorize all dealers to refund the purchase price. HOYT CHEMICAL CO. Portland, Oregon

Quality IS OUR MOTTO

said an Employer: "Stick to quality. It will win out in the end." We do "stick to quality." That is the reason our graduates are so thorough and in such demand. Investigate our claims to superiority.
