CORKS HAVE DISEASES.

Caused by a Small Worm Which Spoils the Flavor of the Best Wines.

"To the average person a cork is a cork," said a well known restaurant man the other day. "But smell this cork! Would you believe it?" And he held up a bottle supposed to have the bouquet of cherries all the way from the blossom to the pit. The odor was musty and altogether unpleasant—in fact, it was decidedly bad. He continued:

"Now, the man paying 20 cents for his tiny glass of cordial after dinner is entitled to have it free from impurities. If he bought a bottle of wine with that flavor, he would say the wine was bad, for ninety men out of a hundred know nothing about bad corks. He would want another bottle of wine or his money refunded, and he would be right.

"The defect is in a tiny worm in the cork that is often invisible to the man cutting corks and sometimes cannot be seen after the cork is drawn. A customer will taste the wine and say, 'Bad wine.' You explain about the cork, and he will say: 'Impossible. That was a beautiful cork—beautiful!' And yet we know that the contents of the bottle never could have that flavor under other conditions.

"I tell you there are millions of dollars waiting for the man who can invent a perfect cork that will stand the test of years for flavor and preserving qualities. If it could be proved that his invention was perfect, he would make millions in a month."—New York Herald.

Roads and the R. F. D.

Notice is being sent out from the postoffice department to many rural communities that unless roads are repaired and placed in condition for uninterrupted service during the year the rural service will be discontinued. This is work for good roads that will doubtless have a wide and wholesome effect, says the Atchison Globe. The rural mail service has become so much a part of the farmer's life as to be regarded as a necessity, and he isn't likely to let it lapse for the sake of a little time and energy needed in road building.

The Empire for Durability

That cream separator that you are going to buy, ought to be durable. You cannot afford to buy a new one every year. Buy the best; get one that has a record for durability. Read the following:

"I am pleased to say that the Empire No. 5, which I purchased from you 12 years ago has given perfect satisfaction in every respect. I cannot recommend it too highly. It is very simple and has proven durable. I have not paid out a cent for repairs in all the years I have used the machine. I would not trade the Empire for any machine I have ever seen. To my brother farmers I would say: 'If you are thinking of buying a separator be sure and look up the Empire.' Iver Furness, Norman, Washington."
