It is a matter of general comment that the climate of Oregon is constantly improving. A few years ago we had rain from October till June, with comparatively few fair days. Now it is no uncommon thing to have a week of sunshine during intervals of rain in the winter. This is probably due to the denudation of the forests. It is a well known fact that great forests attract an abnormal rainfall, and with the disappearance of these forests the rainfall becomes less. The same principle operates conversely in the arid regions of the Middle West. With the development of irrigation and production of trees, many of the arid regions of the West are now receiving a rainfall never heard of before.

Now is the time to visit **California**  
When summer has passed in these northern states, the sun is only mild under the bright blue skies of the Southern California. This is one of nature's happy provisions—eternal summer for those who cannot endure a more severe climate.  
California has been called the "Mecca of the winter tourist." Its hotels and stopping places are as varied as those of all well regulated cities. Visitors can always find suitable accommodations, congenial companions, and varied, pleasing recreations.  
**Southern Pacific Company**  
Will be glad to supply some very attractive literature describing in detail the many delights of winter in California. Very low round trip excursion tickets are on sale to California. The rate from Canby or Aurora to Los Angeles and return is \$55.00. Limit six months, allowing stopovers in either direction. Similar excursion rates are in effect to all California points.
