SUNDAY SERMON

Next Sunday at 11 a. m. divine services at the Presbyterian church. The pastor was highly pleased with the fine appreciative audience last Sunday evening. The singing was very good. The pastor from the beginning had faith in the fine lot of Aurora people that they would value a regular English service every Sunday when once installed. No community in this great land of ours can afford to be without it. Putting it on its lowest basis it is an economic proposition, and placing it on its moral and spiritual point of view, God alone can measure the results to the present and on-coming generation. Let us be wise and stand together with the pastor in this the greatest of our American institutions. Though not legally connected with our Government, it is the most vital thing to the people of America to-day. It has the panacea for all human and national ills. Had Christ the right of way in the heart of every man, woman and child, we would have heaven on earth, no wars, no strikes, no labor troubles, peace and plenty and joy indescribable. How can any one's mind be so benighted as to be indifferent to God's Holy church, and His Divine Son, Jesus Christ.—L. S. MOCHEL.

Two Days in One.

Chatham Island, lying off the coast of New Zealand, in the south Pacific ocean, is peculiarly situated, as it is one of the few habitable points of the globe where the day of the week changes. It is just on the line of the demarcation between dates. There at 12 noon on Sunday Sunday ceases and instantly Monday meridian begins. Sunday comes into a man's house on the east side and becomes Monday by the time it passes out of the western door. A man sits down to his noonday dinner on Sunday, and it is Monday noon before he finishes it.—London Globe.

We would rather be known as "particular" printers than as cheap printers. We have noticed that the so-called "cheap" printers never get very far, and their customers do not seem to get very far either. No business has ever reached and held the position of permanent success by the use of cheap printing. The printing of an eminently successful business is distinguished by its high quality, however, and the inference is so plain that every one who reads may easily apply the inference to his own business.
