About the usual amount of Halloween mischief occurred Tuesday night. How it should be apportioned between the marauding Halloween children and the prominent young society matrons, it is impossible to state. It is only fair to say, however, that the latter did not place the "For Sale" sign on the Observer door, erect the ladder at the town watering place, tip over the "municipal dog house," hang Capt. Miley's sign on the highest telegraph pole in town, or filled Geo. Miller's S. P. flue with pett icats.

MARKET NOTES

Potato dealers find themselves unable to take advantage of the high Eastern markets on account of the impossibility of securing cars for shipment of Oregon potatoes. Until the car shortage is overcome, Oregon growers will get little benefit of the high Eastern prices.

This year's potato crop is 59,000,000 less than last year, according to the latest estimates of the department of agriculture. The crop is the poorest since 1911, taken as a whole throughout the United States. Hence a firm market with advancing prices may be expected for the rest of the season.

Gehlhar Will Use

Good Judgment

Max Gehlhar is gaining votes every day. The people know he is able, honest and accommodating and will use good judgment in conducting the office. He will discourage bringing neighborhood and family rows into courts and thereby save much money to the taxpayers. He deserves your support and you will be glad you gave it to him when you see what a good official he makes.—Ed. Jefferson Review, Oct. 20.

We would rather be known as "particular" printers than as cheap printers. We have noticed that the so-called "cheap" printers never get very far, and their customers do not seem to get very far either. No business has ever reached and held the position of permanent success by the use of cheap printing. The printing of an eminently successful business is distinguished by its high quality, however, and the inference is so plain that every one who reads may easily apply the inference to his own business.
