The United States Council of National Defense Says--- Buy Only What You Need, But Buy It Now

The re-employment of returning soldiers, sailors and marines, is the patriotic duty of the whole people.

Industry cannot absorb these men and take care of men already employed, unless there is a demand for industrial products.

All commerce rests finally upon the individual purchases of the people.

When people buy, business is good, when people cease buying, industry slackens.

The nation is in a period of transition from a war to a peace basis—to make this transition quickly, it is necessary that the people of the United States understand the necessity of **BUYING WHAT THEY NEED NOW.**

Hoarding is dangerous, so is waste.

Take the middle course.

Buy now, but buy carefully.
