FREAK WINS HIS BET

Found Dead in Police Station as He Had Predicted.

Fifteen years ago "Tattooed Jack," a well-known steeple jack and circus sideshow character of former years, bet "the best drink in town that I'll be found dead some night with my clothes on in this police station," with Sergeant Hutchinson of the North side jail at Pittsburgh.

The other night an aged man was found dead in a cell of the station. No one knew his identity until Hutchinson was called. It was "Tattooed Jack," and he had his clothes on. He had won the bet.

Vogan's MARSHMALLOW WHIP

HOW CLEOPATRA'S NEEDLE WAS SAVED

New Process Invented to Preserve Surface of Monolith in Central Park.

HIEROGLYPHS OBLITERATED.

Rigors of Western Climate Caused Khedive's Gift to Disintegrate. Painting Ancient Obelisk With Special Preparation Stopped Decay—Ruined Portions Restored.

New Yorkers awoke one morning to find in their breakfast headlines the news that a zealous park employee had discovered signs of disintegration on the surface of the city's most treasured antique—Cleopatra's Needle. Photographs revealed that the monolith was peeling, large pieces of sandstone having fallen from the tall shaft, carrying with them part of the prized hieroglyphs.

London's twin sister of Cleopatra's Needle was reported as resting comfortably and enduringly on the banks of the Thames, and the rival port wondered whether a preparation would be found to stay the attacks of their harsher climate.

Such a preparation was soon forthcoming. A new paint combination as a preservative for stone was invented

THE OBELISK.

The Obelisk was presented to the City of New York by the Khedive of Egypt.

Lieutenant Commander Goring, U. S. N., after a three years' effort, obtained possession of it and moved it to its present position, at an expense of nearly \$100,000. It was finally swung into position at noon, January 22, 1881.

The height of this monument, from base to tip, is 69 feet, 2 inches. The measurement of the base, square through its axis, is 3 feet, 3 1/2 inches. The entire weight of the monolith is 219 1/2 tons.

Since it was quarried near the desert zone, it has traversed the entire length of Egypt, most of that of the Mediterranean Sea and the width of the Atlantic Ocean—a distance of 6,400 miles—proving itself a first rate traveler for one whose age has exceeded thirty-five centuries. In the course of its existence it has seen Pharaoh and his host going to their destruction in the Red Sea, Shishak marching to the conquest of Jerusalem, Cambyses desolating the land, Herodotus, Plato and other Greek students engaged in pursuit of Egyptian lore; Alexander the Great on his victorious expedition through the land of Goshen; six and a half centuries of Roman sovereignty and Christian struggle at Alexandria; all the long line of Moslem rulers since Caliph Omar; and now, leaving altogether its native land, it stands looking upon the million dwellers in this metropolis, whose site was unknown to the Eastern world at a time when the Obelisk had been in existence for two thousand years.

by Dr. William Kuckro, chemist of the Metropolitan Museum of Art. Many years previous coating with paraffin had been tried, but the application had not entirely accomplished its purpose. The new painting process, however, proved a success. Disintegration was halted and the damaged parts restored. New York breathed easily again.

HOW SOME PRECINCTS VOTED ON ROAD BONDS

The road bond measure Tuesday proved a winner by unexpected majorities. The vote in the following precincts shows its popularity.

	For	Against
Aurora	59	40
Butteville	32	21
Donald	54	17
Champoer	51	8
West Woodburn	135	39
East Woodburn	92	46
West Hubbard	53	26
East Hubbard	27	26
East Gervais	66	45
West Gervais	18	25
Salem, 12 precs.	913	298
St. Paul	173	16

The vote throughout the county ran much the same as the above precincts and the total vote shows about 2 to 1 in favor of the bonds.

The county agricultural agent was voted down by an equally decisive vote. Marion county turned down the entire reconstruction program except the parts relating to roads.

Save Half Your Tire Expense and All Tire Worry

Cut your bills in two---minimize your outlay for repairs---increase the comfort and security of your motoring, and improve the appearance of your car.

All this is accomplished with a tire that has the advantage of 20% oversize, yet costs only 1-2 as much as ordinary tires.

Charles C. Gates, E. M., has made it possible with the invention of an improved principle of tire construction.

Because of this principle, 500,000 motorists, including the largest business houses in the country are now getting 5,000 to 15,000 puncture-proof tire mileage, and at the same time are cutting their tire bills in half.

Many of these motorists are business men that you know---ask them about Gates Half-Sole Tires---they are sold under a stronger guarantee than the tires now on your car.

Come in and let us show you.
