So far our splendid crops are unmoled by the lurking foes that have wont to trouble us. The aphid has not visited us this year. The aphid and the German spy whose presence fretted us so last year, were really working to our gain—the aphid quietly rooting out a harmful growth among the stalks of growing grain, and the spy sending secret messages to Hunland revealing the vastness of resources and preparations, which heightened German alarm and hastened the Armistice. Today we are reaping the benefit of the work of aphid and spy, which reminds one of the admonition that adverse circumstances are often a blessing in disguise.

A woman doesn't mind showing the white feather if white feathers happen to be fashionable.

We don't know why it is, but a man would rather hear you roast his enemies than hear you praise his friends.

You wouldn't get many lines in your forehead if your troubles didn't worry you any more than your troubles worry your friends.

When you get in bad don't waste any time trying to explain how it happened. People have already drawn their own conclusions.

If a man takes up physical culture he is worried about his health. But if a woman takes it up, she wants to reduce her circumference or increase it.

It may not be of much interest to anybody, but Judge "Fatty" Rawson is willing to back his rheumatism against all the weather forecasters in the country.

A girl can wear a dog collar around her neck and nothing on her chest and get away with it. But if a man tried it he would get free board in the football house.
