God of the Lower World.

In one temple of Japan the image is a Japanese conception of the god of the lower world. The figure has an unusual history. An image maker, it is said, died. When he appeared before the lord of the other world, he was told that in his lifetime he had never represented the lord of the world properly, and that he must return to earth and make a correct likeness. The figure is pointed out as the result of the order. It is so horrible with its red face and malevolent glare that the story seems plausible.

Story of the Mirror.

From the twelfth to the fifteenth century small mirrors, carried in the pocket or attached to the girdle, were regarded as indispensable adjuncts to ladies' toilet. The pocket mirror was a circular plaque of polished metal fixed in a shallow box and covered with a lid.
