\$985⁰⁰

for the New Model

DORT

Quality Goes Clear Through

This is not only one of the most beautiful cars in America, but one of the most economical to operate. It is not at all surprising to get from 23 to 25 miles to a gallon of gasoline. The mileage on tires is equally high. This along with the fact that the New Model DORT has unlimited power makes it your kind of a car.

And think of it—you may own one of these remarkable motor cars at \$985 factory. And on our easy payment plan, too. Write us direct—today—or see your local Dort dealer.

Some very desirable territory still open to responsible parties who would like to act as dealers. Very attractive proposition.

WANT U. S. PACKING PLANTS

Uruguay Representatives Propose South American Expropriation of Plants.

Montevideo, Uruguay.—A proposal that the governments of Uruguay, Argentina, Brazil and Paraguay take over by expropriation the packing houses in those countries has been made by a committee of the Uruguayan house of representatives. Most of the packing houses in those coun-

tries are controlled by foreign capital, a large part of which is North American.

It is estimated that the total cost of such an undertaking would be over \$100,000,000 and that the cost in Uruguay alone would be \$22,000,000.

The committee recommended that a convention of delegates of the four South American countries be held to arrange joint action and suggested the issuance of domestic and foreign loans to raise the funds necessary to acquire the packing houses.

Much Good Road Building.

Last year recorded unthought of road building activities throughout the United States. A few years ago some narrowly bounded community might have done something to make the roads within its confines better. Such an act, however, was little cause for comment except locally. The automobile, with the range of travel it has brought within everyone's reach, had not been developed and could not have been used if it had. This means that the advent of the automobile has forced good roads.

Something to Think About

By F. A. WALKER

DEPENDENT ON OTHERS.

DID you ever stop to realize how dependent you are upon the thoughts and efforts of your fellow men?

Did you ever try to imagine just what would happen to you if you were left alone on this round globe with all its wealth, all its resources and all its possibilities?

It might teach you a lesson in humility if you gave it the proper consideration.

The money would be worth nothing to you for there would be no person from whom you could buy.

You could not even be charitable and give it away for there would be none to accept it.

What would happen to you then happens in a lesser measure every day now.

Let us suppose you are a millionaire with plenty of money and a desire to spend it, we will say, for a beautiful home.

Suppose again that the masons and the carpenters and the plasterers and the hundred and one other artisans whose handwork go into a fine home, refused to accept your money or do your work. How would you get your home?

You might by dint of hard work build yourself a shelter, but it would not be at all what you wanted nor in the least what you could afford.

You see, then, that although you were a millionaire, you are dependent for your home comforts upon the willing efforts of others.

Suppose, on the other hand, that you are a poor man, not poverty-stricken, but poor in the sense of modern fortunes.

You have saved a few hundred dollars, bought a bit of ground and wish to build yourself a home.

In order to do it you have to borrow money. Suppose the bank, or the building association, or whatever organization you apply to just plainly and bluntly refuses to loan you a penny.

You will find yourself in the same predicament that the millionaire was in. You cannot have the kind of home you want and can afford. You are dependent on others for that.

Every morning when you eat your breakfast you are eating, in part, the labor of hundreds of men and women. The clothes you wear, the shoes you walk in, the hat that shelters your head, all the necessities, to say nothing of the luxuries, you enjoy are the fruit of your dependence upon other people.

If you could analyze your needs for one day and count the human beings that labored to satisfy them with either toil or money, you would find that scores and scores of people had been indirectly in your employ and working in your behalf.

And, on the other hand, you have the satisfaction of knowing if you do an honest day's work that you have labored to help scores of others.

It is the lack of recognition given to the fact that we are all dependent each upon the other that leads to our greatest troubles. It is that that pits capital against labor and labor against capital. It is that that causes the war between classes and the wars between nations.

If you fully recognized your indebtedness to your fellow man, you would want to help him because by doing so you would be indirectly helping yourself.

If everybody in the world set out to gouge and cheat everybody else in the world, it would be only a short time before there would be utter chaos, commercially, and morally.

It is because only a comparative few try at one time to get all they can regardless of methods or results that keeps the world on an even keel and society from toppling to destruction.

The more we recognize that we must rely and depend upon each other, the higher consideration we have for the good of the world as a whole and the more nearly we come to being truly civilized.

God in His wisdom made no one absolute.

The only such power that has ever been bestowed has been placed and recognized by subjects who thought they needed to be ruled, which was a conclusion not very complimentary to themselves.

It is really worth while for you to think for a few minutes on what an inefficient and incompetent being you are when you divorce yourself from all outside aid. It will help you to be meek and in the greatest sermon ever preached it was said, "Blessed are the meek for they shall inherit the earth."

(Copyright.)

The Ostrich Is Shedding a Toe.

The common ostrich has only two toes, but certain individuals, it appears, are tending to lose one of these. Possibly, in time, there will arise a one-toed form, analogous to the present day one-toed horses, whose ancestors had as many toes as the ancestors of the ostrich.

Suspense.

The moving picture audience was watching a bathing beauty scene, and stood it pretty well. A five-year-old girl was also watching and stood it about as long as she could. "Say, mother," she piped, in a voice heard all over the theater, "when are they going to put their nighties on?"—Film Fun.
