## FARMERS WEEK IS SLATED FOR DEC. 26 TO 31, '21.

### Winter Short Courses in Many Lines Have Been Scheduled to Meet Needs of Farmer

Farmers who want to mix more science with their farm work in production of the most profitable crops in the most economical way, will be offered the latest and best proved information at O. A. C. Farmers week this year—Dec. 26-31.

Getting idle lands to work, and working lands into larger and more profitable production through choice of crops, soil management and wise use of produce, is the man-size problem many Oregon farmers are wrestling with. Labor and science are the two solutions—and the more the science the less the labor needed, say the Farmers week announcements.

Short courses will be run in some special phases of farming and related subjects as follows:

Two weeks course in fruit and vegetable growing, Dec. 3-17.

Four weeks course in beekeeping, Jan. 30 to Feb. 25.

Four weeks course in grain grading, Jan. 9-21.

Eleven weeks course in tractor mechanics, Jan. 2 to March 18.

Eleven weeks course in dairy manufacture, Jan. 2 to March 18.

Five months dairy herdsman course, Jan. 2 to June 10.

Five days homemakers conference, March 20-25.

The Oregon grower who has just won second place in the nation-wide celery production contest, half acre lots, has never missed an O. A. C. Farmers week or short course in farming.
