Now comes a story of kidnapping from our own town of Salem which sounds like a chapter from Fairy Tales. Shall we let him get away with it or nominate him for the Ananias Club.

The big strike still continues. Labor cries out that capital is unfair. Capital says labor is unfair. It looks to us as if for the public it is a case of Hobson's choice. We get it in the neck either way.

The death of Lord Northcliff, August 14th, brings regret not only to the people of England, his birthplace, but to the people of this country as well. He was an outstanding figure during the world war. As a journalist he undoubtedly influenced the course of the war. As a representative of his country at Washington he maintained the dignity of his country while meriting the esteem of our own people.

Politics take strange turns. Some time ago Mr. Hall charged irregularities in connection with the primary election which chose Governor Olcott as republican nominee to succeed himself.

A recount of the votes for some time showed first a gain for one and then for the other till at last an apparent fraud was discovered, raising Governor Olcott's majority beyond the question of a doubt. Verily, to challenge the correctness of an election count is a good deal like buying "A Pig in a Pole."

More effective methods of handling gumbo soils are being developed by some of the farmers on the Milk River reclamation project in Montana, says the United States Department of Agriculture. One conclusion is that in irrigating this kind of soil the water should be applied frequently and in small quantities. Much trouble in getting crops started may be overcome by adopting a regular habit of fall plowing. The seeding of such soils to either yellow or white sweet clover in some cases is proving a means of supplying humus and for getting grain or alfalfa started later.

The road approaching the bridge over the Pudding River on the Pacific Highway is in a sad state of disrepair. Hundreds of vehicles travel this road daily and it is not an unusual thing for the occupants to be bounced almost to the point of going through the top in the case of the automobile.

We boast of our magnificent highway, and indeed it is fine for the most part. But why, will some one tell us, are these little patches neglected till the rainy season comes, putting the rest of the road to shame and causing discomfort, if nothing worse to countless hundreds?
