

ESCAPING TAXATION

The idea of tax-exemption for any class of citizens at the expense of another class, should be repugnant to every American.

And yet there are today some \$15,000,000,000 worth of tax-exempt bonds and securities outstanding in this nation and hundreds of millions of new bonds of this character being issued by cities, counties and states each year.

Tax returns show that these issues are absorbed by the wealthy who pay not a penny's tax on many millions of income. Amounts thus lost being made up by the average citizen and business man whose tax burden is doubled.

Here is the first place to start to equalize the tax bill and President Harding has urged upon Congress the necessity of amending our laws so as to do away with this inequality in distribution of tax load.—Industrial News Bureau.

Oregon Agricultural College, Corvallis.—"Farmers should use more printer's ink. Those who have used it, both in advertising in their home paper, and in letterheads, envelopes, posters and catalogs find that it increases their business and offers a convenient way of marketing their produce at home."

Names for farms are becoming as popular as the use of advertising and printed matter, it is shown. The grower of produce is taking a tip from national advertisers and giving his products a mark of identification, which results in increased business and stimulates a local market, as well as serves as a trademark.

Professional cards run regular in the paper are \$1.00 per month, or \$10 per year when in advance.

WHY NOT?

The idea that trade unions should be incorporated is growing stronger. The known members of an incorporated body must behave themselves or it costs them collectively more than their violence is worth.

The trade union makes no secret of its membership nor the millions collected in dues but it remains unincorporated. It seems therefore that neither the members nor the organization can be held liable for damage or atrocities caused by the leaders or the members of the organization.

"Would the Herrin murders have occurred if the relatives and dependents of the men slaughtered could have sued the United Mine Workers of America for damages?" says Leslie's magazine.

How long would the people of the United States stand for the operation of a great industry or railroad that was not liable to an injured party for damage caused by the acts of its employees or managers? These corporations are responsible to the public.

How much longer will the American public stand for financial loss, property damage and death caused by powerful labor organizations which incite these acts but which escape all responsibility by keeping their affairs in such shape that it is impossible to secure compensation from them?

Mystery Tied with Red Tape

The time has long passed when a bank was surrounded with so much mystery and red tape that customers felt ill at ease every time they went to the bank to transact business.

Today the progressive bank is a FRIENDLY INSTITUTION—designed to give service cheerfully and as a BUSINESS DUTY rather than as a favor.

At least, that is how this bank regards it.

Perhaps that is one of the good reasons why so many refer to this bank as "my bank" based on the spirit of friendliness and cooperation they encounter whenever they call. Perhaps, too, it is another reason why people like to save where they think they are welcome, and where, in addition, they know their money is absolutely safe. Whether you wish to open a savings or checking account, or wish to transact business in one of the other departments of this bank, you will appreciate this spirit of friendliness which we believe is good business.
