**EDITORIAL**  
Opinions of the  
Observer.

In these modern days every rule and precept regarding the sanctity of human life as well as all thought for human suffering seems to have gone by the board. The day of the automobile is at hand. Swift is the word. Let him who can not keep out of the way take what he gets. It's coming to him. Such is the apparent theory of most of those who travel our highways in this third year of Warren G. Harding the First. But we read in this monstrous carelessness for the rights of others more than a passing neglect by an individual. If the present general trend continues, it means the downfall of our civilization, the failure of our boasted progress and a repetition of history. Carthage went the same way and her palaces have long mouldered in the dust. Rome could not live fast enough for her citizens and Nero fiddled while the city burned. Wake up! Oh my fellow citizens! Put an end to such accidents as happened only a little over one week ago when the stage driver was killed at Barlow and repeated on our own Main Street only last Thursday night when the Salvation lassie fell before the onrush of a speeding car. Let us have evidence of an aroused public sentiment which will stop the open and flagrant violation of our laws. Put the fear of God into the heedless citizen who ignores the rights of others and lives for the gratification of his own selfish pleasures.

In the prize fight fiasco at Shelby, Montana, we see at least one good for the human race. To those who have lost thousands in this speculation we say Good Enough. Any man who is foolish enough to spend his good dollars in helping in any manner to promote this relic of barbarism deserves to lose them. Nothing on this mundane sphere with so much of harm and so little of good as the prize fight has ever occupied the attention of the sporting fraternity. All healthy sports which are sanely enjoyed, even though in their train they bring something of wrong, are to be sanctioned, but in the prize fight there is absolutely nothing of good.

**America Faces Rubber Crisis Because of British Tax Laws**

Akron, Ohio, June 27.—The withdrawal of Harvey S. Firestone, president of the Firestone Tire & Rubber Co., Akron, Ohio, from the Rubber Association of America, has caused quite something of a stir in rubber circles.

With motor vehicles now owned by nearly twelve million Americans the fight now being waged by the Firestone interests for cheaper raw rubber and for a supply always assured for the future instead of being dependent on Great Britain, is being watched with interest on every hand.

The cost of raw rubber affects the pocket of the consumer, Mr. Firestone points out, because higher prices for rubber means higher prices for tires and many other every-day things made of this product.

It is Mr. Firestone's idea that America should produce its own rubber and that in the Philippine Islands there are thousands of acres of land usable for growing all the rubber this country can consume.

Mr. Firestone has retired from the Rubber Association of America, according to his letter of resignation, because of that organization's failure to cope with the major problems of the association, more especially in the rubber crisis created by Great Britain's rubber restriction act which already has boosted the price of tires.
