Groundless Fear.
"People are worried about having wireless aerials about their homes when these big electrical storms come," said a Detroit radio engineer, "but it really amounts to nothing. They never remember they also have telephone wires running into their houses, and they are theoretically more dangerous than the wireless aerial, because they are strung over a much greater space along the streets than the ordinary aerial."

A Natural Query.
"Aaron A. Piffer has had to sell his dry goods store and move to the city," related the landlord of the tavern at Tomhicken. "He made money in a modern way here, ever since he started twenty years ago. But about six months ago he married a handsome young second wife. Well, she said she preferred death to living in a small town like this."
"But," returned a hypercritical guest, "couldn't she have enjoyed both privileges by remaining here?"

Aurora is a good town to live in and there is room for you.

KNOWN AS 'ELECTRIC GHOSTS'

Scientist Explains Action of Electrons, Fastest Moving of All Terrestrial Objects.

In an address to electrical engineers in London a distinguished scientist thus defined an electron. An atom is ordinarily associated with a charge, and force is required to separate the charge from the atom. The atomic charge when separated is called an electron. In an electrolyte—i. e., a substance decomposed by an electric current—there is a bodily transfer of atoms with their charges; in a metallic conductor the charges are handed on as electrons from atom to atom. In the discharge through highly rarefied gases the electric current is in its most simple form, for here there is a flow of electrons, traveling by themselves, of disembodied charges or electric ghosts. Electrons, it should be added, are the fastest moving of all known terrestrial objects, their speed being one-tenth that of light, which is 186,300 miles per second.—Washington Star.

Is Separation Right?

The French senate has voted to transfer to the pantheon, France's hall of fame, the remains of Renan, Edgar Quinet and Michelet. This is a high honor from the state. But in 1898 Michelet's wife opposed the transfer of her husband's body. She had been the historian's intimate literary helper—almost a collaborator—and knew all his thoughts. When the proposition was made to her she said: "No! He would not have wished it. He chose his grave himself—in Pere-Lachaise, beside his son's. Let him sleep there in peace." But there may be no one today to interpose a veto on the senate's resolution, if it also passes the chamber of deputies.
