Cherokee Myth Tells of Bravery of Spider

Lucky was it for all the animals that there are spiders that have egg sacs resembling bowls, for otherwise all the creatures of the forest would have had to go without fire, the Youth's Companion remarks. At least so we are assured in a Cherokee myth. Natural History thus tells the pretty story in which a spider played the part of Prometheus:

In the beginning there was no fire, and the world was cold. In time, however, the thunders placed fire in a hollow tree on an island. The animals gazed enviously at the smoke that curled upward from the concealed bonfire, knowing that there was warmth there, yet at a loss how to obtain it. So they held a council, and as a result the raven set out on the quest. He reached the island and the tree, but all that he bore back with him as a result of his adventure was scorched and blackened feathers. The little screech owl next made the trial. He reached the tree, but while he was hesitating what to do next a blast of fiery air arose and nearly burned out his eyes, which are red to this day. Other owls tried in their turn, but with no better success. Then the black snake tried, and today he bears a covering of sooty scales as a badge of his ineffectual hardihood.

Daunted by the failure of their fellows, the remaining animals managed to find the weightiest of reasons for not venturing to go. Not so the spider, however. She wove a little tust-bowl of her silk and, fastening it to her back, set forth on her adventure. Reaching the island, she crept through the grass to the tree and snatched up a little ember of fire, which she placed in her bowl and returned with it to the expectant animals.

Years Have Brought Changes in Meaning

If we wish to label anything strange or barbarous we say it is "outlandish," but when the Bible speaks of an "outlandish woman" it means a foreigner.

Another curious expression in the authorized version is "The other basket had very naughty figs." That means fruit which was good for naught. Today the word "naughty" means "ill-behaved." In the prayer book the word "presently" means "at the present time," but today it always means a future time, though not far distant, says London Tit-Bits.

When the authorized version of the Scriptures was first printed, the word "careful" meant "full of care and anxiety," as in "careworn," but if a man were said to be careful it would today be a good testimonial. Thus, when the New Testament tells us to "be careful for nothing," it is not enjoining wastefulness and speaking against thrift, but simply telling us not to worry about anything.

Beginning of Y. M. C. A.

The Young Men's Christian association was founded in England by Sir George Williams, a London merchant. Williams' organization grew out of meetings he held for prayer and Bible reading among his fellow workers in a dry-goods business in London, and the association was founded in 1844. On the occasion of its jubilee, its originator was knighted. Similar associations had been in existence in Scotland at a much earlier date. In 1824 David Nalson started the Glasgow Young Men's Society for Religious Improvement, a movement which spread to various parts of the United Kingdom, France and America. Later the name was changed to the Glasgow Young Men's Christian association.

His City of Refuge

The train came to a grinding stop at a small town in the South, and the head of a gentleman of color protruded from a window at the end of a car. Seated by his side could be seen a brown-skinned maiden.

"Does yo' know a cullud pusson by de name o' Jim Brown what lives here?" he asked of a station lounger.

"Ah! nevah heerd o' no Jim Brown hyah, an' Ah lived in dis town fo' ten yeahs."

"Is yo' right suah dey ain't neveh been no Jim Brown aroun' hyah?" "Positively."

"Den," announced the arrival, reaching for a suitcase, "dis is whah his new son-in-law gits off."—The Continent.

Lost Talent

A great deal of talent is lost in the world for the want of a little courage. Every day sends to their graves a number of obscure men who have only remained in obscurity because their timidity has prevented them from making a first effort; and who, if they could have been induced to begin, would in all probability have gone great lengths in the career of fame. The fact is that, to do anything in this world worth doing, we must not stand back shrinking and thinking of the cold and danger, but jump in and scramble through as well as we can.—Rev. Sydney Smith.

Will-o'-the-Wisp

"Will-o'-the-Wisp" is a popular name for a phenomenon called Ignis fatuus, which in Latin means "foolish fire." It is a light which appears floating in the atmosphere a few feet above the ground in marshes or other places where there is decaying animal matter. When approached it appears, as a rule, to recede. It has been attributed to phosphorated or carbureted hydrogen escaping from decaying substances.

Significant Words on First American Coin

After the American colonies had achieved independence, the provision of a coinage became their own sovereign right. The devices for the first coin struck by authority of congress were prescribed by a committee of that body in the following terms: "On one side of which piece . . . thirteen circles linked together, a small circle in the middle, with the words 'United States around it'; and in the center 'We Are One.' On the other side of the same piece the following device, viz, a dial with the hours expressed on the face of it; a meridian sun above, on one side of which is to be the word 'Eugio,' and on the other the year '1787'; below the dial, the words, 'Mind Your Own Business.'" The types of this piece are very similar to those of the dollar pattern of the proposed continental currency, which bears date of 1776, and which were probably designed by an artist, who on the earlier piece placed the signature E. G. Felt. The types are interesting as a commentary on the state of mind of the times. The political hope, for it could be only a hope still at that time, of an inseparable union, expressed in the obverse type, was probably not less prevalent than the caution so graphically set forth by the other that "Time is Flying," so "Mind Your Business" affairs. This terse expression of practical sense, because so much in the spirit of Poor Richard, has won for the coin the name of "Franklin cent," but Franklin probably had nothing to do with the designing of it.

Early New Englanders Fond of Their Beans

In the absence of positive information on the subject of the origin of Boston baked beans and their place on New England breakfast menus this conjecture is offered: In the early days of the Plymouth colony people did their baking in brick ovens. These ovens were heated on Saturday and enough baking for the week was done at that time. As the oven cooled off the temperature was just right for beans, which need long, slow cooking, so they were thus ready to be eaten on Saturday night and were probably put back into the oven to keep hot and these were eaten for breakfast on Sunday morning. Many New England people reheat them and eat them for breakfast each morning until they are gone, and some people who bake them on Wednesday continue to serve them for breakfast until the Saturday beans are baked. In northern New England beans have been baked from time immemorial in a hole in the ground, the hole having first been lined with stones and the stones made very hot with a fire built in the hole. In lumber camps the beans are usually put in to bake the night before they are to be served for breakfast.

Truth Prevailed

The criminal lawyer believed in being absolutely frank with his clients, and accordingly when a man came to him charged with stealing a pig he said:

"Now, I will be perfectly open with you. If I take your case you must in the first place tell me honestly: Did you or did you not steal this pig?"

"Well, yes, sir, I did," the man admitted; "but I have a big family and no money, and I was in need of meat for them."

"That's all right," replied the lawyer. "You bring me half that pig and I'll take on your case."

When the case came into the court the lawyer addressed the jury thus: "This man did not get any more of the pig than I did."

The verdict was "Not guilty."

Inventor Unknown

The history of the monkey-wrench is obscure. Even the origin of the term "monkey" in the name is unknown. It is commonly believed, however, that a London blacksmith named Moncke (pronounced "Munke") made some of the first wrenches with movable jaws adjustable by a screw. Such wrenches were called Moncke wrenches. Owing to ignorance of the origin and spelling of the name it was easily corrupted into "monkey." But this story is not supported by any definite information. The United States patent office says it can find no record of a patent having been granted by the British government to Moncke for such a wrench.—Pathfinder Magazine.

Works of Art in Copper

Copper ornaments that were made between 6,500 and 9,000 years ago are dug up near Ur, city of ancient Babylonia. Made thousands of years before King Tut was born, these copper ornaments are among the earliest works of art. They express the infancy of the creative spirit. The Babylonian copper objects represent men and oxen. In addition to being art, they were intended as a history of accomplishment—main motive of which is vanity.—Farm and Fireside.

Honey Once Main Sweet

It is only within the last few centuries that sugar has become known, and within the last generation or so that refined sugars have become so low in price that they may be commonly used in the poorest families. Formerly honey was the principal sweet, and it was one of the items sent as a propitiatory offering by Jacob to his unrecognized son, the chief ruler of Egypt 3,000 years before the first sugar refinery was built.
