BEST FOODS MAYONNAISE AND RELISH SPREAD—For perfect salads and sandwiches.
pints 35c; half pints **20c**

Games Come and Go—Refreshments Stay!

It is no longer "to bridge or not to bridge"—it's simply whether it will be auction or contract! Just now, the vogue for some of the older games has been revived and you'll find young things and old bent double over the chess or cribbage board, or even in a study over the familiar games of Flinch, Rook or Bingo.

Games may come and games may go—the refreshments go on forever! Every guest is a hungry guest and it isn't a party unless we eat. Fashion in food, however, change as often as do the games and this particular year of 1930 finds party dishes less numerous, less rich than of yore (can it be the new silhouette?) but more festive, daintier, of greater variety and choice. Neither are changing styles in methods of preparation far behind the calendar. Party food is easier to make now—the hostess is praised—for Mrs. Modern-age makes her head save her hands and feet by using directions and recipes and ingredients that are modern too.

The decorations usually consist of flowers and such clever notes as gas-filled balloons in groups of one, two, three or more attached to the tables to mark their rank. Black and white parties, with food to match are even given, and the Godey craze has swung full-fledged into the card party, with tallies, prizes and cards all in the Godey-print mood. Airplanes provide the motif for some of the successful entertaining, and the movies have inspired a "star" bridge.

The familiar use of the four suits as decorations and in the food still leads in popularity however, and many of the receipts carry out the idea of the trumps.

Here are recipes from popular hostesses whose parties are always successful:

All Trump Sandwiches

12 slices bread; 1/2 lb. soft butter; 3 oz. cream cheese; 12 pecan or walnut meats; 2 tbsps. cream or rich milk; 1 canned piloncio; 12 pitted dates.

Cut thin slices of bread in oblongs to resemble playing cards. Spread lightly with softened butter and then with cream cheese which has been rubbed to a paste with cream. Make the "spots" on the cards with diamonds or

hearts cut from canned pimiento and with clubs and spades made from nut stuffed dates cut in slices. Makes 2 dozen small sandwiches.

Grand Slam Salad

1 envelope quick-setting lemon gelatine; 1 cup boiling water; 1 cup grapefruit juice; 2 dozen after dinner mints; watercress; few drops vegetable coloring; sections from 1 No 2 can of grapefruit; 1 cup diced cucumber; sour cream or cheese dressing.

Dissolve the gelatine in the boiling water. Drain the juice from a No. 2 can of grapefruit and add it to the cooling fluid. Add a few drops of coloring and enough after dinner mints to flavor the mixture delicately. Cool.

When the jelly is the consistency of egg white, fold in grapefruit sections which have been cut in halves with the scissors and the diced cucumbers from which the seeds have been removed. Pour into one large or several small molds. When firm unmold on salad plates and surround with a wreath of watercress. Serve with sour cream dressing or cream cheese dressing. Six servings.

Queen's Tarts

1 recipe pie crust in tart shells; 1/2 cup sugar; 2 tbsps. cornstarch; 1/2 teaspoon salt; 2 egg yolks; 1 teaspoon vanilla or 1/2 tsp lemon extract; 2 cups scalded milk; 1/2 to 1 cup sliced fruit; 1 cup cream.

Mix dry ingredients, add eggs slightly beaten, and pour on gradually the scalded milk. Cook fifteen minutes in double boiler, stirring constantly until thickened, afterward occasionally. Cool and flavor. Pour into tart shells. Arrange sliced fruit or berries on top and cover with whipped cream.

Chicken or Ham Croquettes

2 1/2 cups chicken or ham, put through food chopper; 2 sprigs parsley; 1 small sliced onion; 1 cup cracker meal; 2 tbsps. cooking oil; 1 cup milk; 1 egg and 1 egg white.

Put the onion and parsley through a food chopper with the meat, add cracker meal and mix. Add beaten egg, 1/2 cup milk and cooking oil. Season to taste with salt and pepper. Shape, roll in cracker meal, then in an egg white beaten with 1/2 cup cold milk, then in the meal again, and fry in deep fat heated to 375 degrees F.

BEAUTY COMMANDMENTS

By Venus of Hollywood

Since our face powder is on our skin at least twelve hours each day it behooves us to use only the best. Most women would use only the best if they gave the matter much thought but so often they are not informed on how to choose the best. The delicacy of your skin can be absolutely destroyed by an inferior powder and today the market is flooded by powders that have a charming fragrance and an attractive box.

Nexer select a face powder that is heavy. Remember that the function of face powder is to keep the skin from shining and to give a soft pretty glow—it is not designed to completely cover up the skin. A heavy powder will always clog the pores, which results in enlarged pores and skin blemishes. It is far better to powder more often with a powder that is constructive to healthy functioning of the skin than to use some of the heavy powders that many women of today favor.

Scientifically created powder never contains starch, rice flour, nor lead. These ingredients are destructive to skin beauty and should be avoided. Insist on knowing the ingredients that you are going to use on your skin for twelve hours daily. Choose your powder for the good ingredients in it rather than the staying qualities of it. Remember that your skin must be always protected by good powder.

The next most important factor in your selection of powder after you have determined which brand is the best, is the shade for you. Any line that is enough interested in producing an ideal powder will help you to secure the proper blend. They will always have a number of shades from which to work and if you will outline your skin tones they will blend you samples until they have given you just the right shade, for both day and evening wear.

Avoid cheap powders as the manufacturer can not give you the fine imported ingredients that are necessary to produce the ideal powder unless he can sell his article for a fair price. It is far better to spend a bit too much and secure a perfect powder that will improve your appearance than to pay a bit too little and receive a powder that will produce much havoc that it will take much time and money to repair the damage. The average woman uses about one ounce of powder each month. Good powder generally sells for fifty cents an ounce, so the daily cost of using good powder is less than two cents per day. Any intelligent woman should be willing to spend less than a postage stamp would cost each day to improve her greatest asset, her skin.

If you feel the need of more individual counsel, I will be glad to have you take up your problem with me. Just write, Venus of Hollywood, care of this newspaper, enclosing a self addressed and stamped envelope.

OREGON INDUSTRIAL REVIEW

Elk City—Road in district No. 19, starting at this place, being graded.

Medford—Crater National forest road crew completed building new road on west side of Fish lake and Lake o' the Woods road.

Baker—New fire truck to be purchased.

Corvallis—New culvert installed in place of old and dangerous bridge at highway end of Park Drive.

La Grande—Dairymen met here to discuss organizing new cooperative association.

Portland—Contracts for expenditure of about \$420,000 in road construction awarded by State Highway Commission here.

Carlton—Yamhill River bridge repaired at cost of \$4,241.

Lebanon—Gas service available here.

New construction calling for expenditure of about \$250,000 being carried out in western Oregon by Pacific Greyhound lines.—Greater Oregon, Albany, Cottage Grove—New Army building under construction at cost of \$90,000.

Albany—Ground broken for \$60,000 women's building at Albany college.

Salem—Oregon-Washington Pulp & Paper Co. to expand at cost of \$60,000.

The Dalles—Four beacon lights between Portland and this place, now in operation for night plane flying.

Glendale—New sawmill of Lystul-Lawson Lumber Co. nearing completion at eastern edge of city.

Albany—New gymnasium will be dedicated in January.

Hood River—First indoor miniature golf course opened by Charles Carson.

Rainier—DuBois-Kettinger mill resumes operations.

Grants Pass—\$300,000 worth of contracts let for construction of water system here.

Salem—Salem Community Hotel, capitalized at \$200,000, filed articles of incorporation to erect hotel on property on Court St.

Tillamook—Work to start on Natural Gas Corporation of Oregon plant which will cost about \$60,000.

Salem—17 new buildings at Camp Clatsop will be built immediately.

Chiloquin—Construction of new fish ladder over Sprague River dam completed.

THANKSGIVING FARE CUTS ANNOUNCED BY RAILROADS

Persons planning visits home or elsewhere for the Thanksgiving holiday will be given the benefit of special low roundtrip railroad fares on various lines operating in the west, according to joint announcement by Southern Pacific, Santa Fe, Western Pacific and the Sacramento Northern railroads today.

Roundtrip fares between points west of Ogden and Salt Lake City, as far north as Portland, and as far south as El Paso and Albuquerque, will be offered on the basis of a fare-and-one-third, it was stated. Sale dates will be November 25 to 27, inclusive, with return limit of December 1.

Lovely Hair

Needs Hot Water

The attractive woman knows the need of hot water and plenty of it. The wise woman knows she needs a Gas Water-heater, to heat it

Portland Gas & Coke Co.

USELESS FARM AUTOMOBILE

The automobile has made it possible for us to go from state to state in less time than it once took to go from town to town. It has, by giving us a fast, economical and efficient means of transporting commodities over short distances, been of tremendous benefit to business.

But the average city dweller overlooks the fact that these fine fruits of the automobile are restricted, largely, to comparatively urban areas. Five or ten or fifteen miles away from main highways, in farming localities, we find roads over which no motor can travel during several months of each year. The residents of these sections are as completely cut off from personal and industrial contacts with the outside world as were their grandfathers. A few days or weeks of bad weather make their motor vehicles useless.

The amazing progress of the twentieth century was the result of the mechanization of all phases of industry. Agriculture has not sufficiently shared in this movement. Our farmers need good roads which are serviceable at all times of the year. Such roads can be built at low cost with the use of asphaltic materials for waterproofing the surface, and pay for themselves time and again in increased farm prosperity.

TURKEY INFORMATION

About an average market supply of turkeys was indicated by the October government turkey report and cold storage records. The 1930 turkey crop as a whole is expected to be only three per cent below last year and larger than in either 1928 or 1929, but the supply in the principal commercial turkey states shows a decrease of about 10 per cent. There is a large crop in the East-central states this year where drought made turkey raising favorable. The condition of the turkeys was said to be about the same as a year ago.

U. S. stocks of frozen turkeys on October 1, were 40 per cent less than a year ago and almost as much below average. Total poultry in cold storage was one-third less than last year and slightly below average.

WEBFOOTS AND BEAVERS WILL MEET NOVEMBER 15

Oregon State College, Corvallis, Nov. 12.—Oregon and Oregon State harrier teams will run a three-mile race just before the Webfoot and Beaver football outfits swing into action here Saturday afternoon at 1:30 o'clock. The cross country event is slated to finish on Bell field cinder path just a few moments before the football game starts.

Since the start of the cross country runs in 1916, the Webfoots have never vanquished the Beavers. The Orange team is very shy on veterans this fall, and maybe the first Lemon-Yellow victory is not far in the offing. Kenneth Chapson, captain, is the only returning letterman that the Oregon Staters can put forth. However, some promising men will turn out for the final try-out this week.

NOTICE OF FINAL ACCOUNT

In the County Court of the State of Oregon, for Marion County.

In the Matter of the Estate of John Whitworth, Deceased.

Notice is hereby given that the undersigned, Robert H. Whitworth, administrator of the estate of John Whitworth, deceased, has filed his final account in said estate, in the County Court of the State of Oregon, for Marion County, and the said Court has fixed and appointed the 14th day of November, 1930, at the hour of 10 o'clock A. M., of said day, at the County Court House, at Salem, Marion County, Oregon, as the time and place for the hearing of objections to said final account and for the settlement thereof.

First publication, October, 16, 1930. Last publication November 13, 1930.

ROBERT H. WHITWORTH, Administrator.
RALPH C. ZIMMERMAN, Aurora, Oregon, Attorney for said Administrator.

WHAT'S YOUR CAR WORTH?

Well, that depends on how she looks, how she's running and how the valves are working—that's the important thing! You can have it overhauled and painted, but if the valves are faulty and she runs like a lumber wagon—not worth much. Correct the faulty valves—give the motor more life, more snap, more go, so that she'll bark like a bull dog on a hot scent and—well, you won't want to part with her! We correct faulty valves by the KWIK-WAY System of scientific valve correction—we add real worth to your car. COME IN—let us show you—costs nothing to have a look—COME!
