COWS FROM AURORA MAKE FINE RECORD

More than 124 tons of milk testing 5.50 per cent butterfat were produced by the 41-cow purebred Jersey herd of Frank Clark of Aurora, during a recently completed 365 day test.

The Clark herd's total production was 248,879 pounds of butterfat with 28 of the Jerseys actually milking throughout the year, the records show. The average milk yield was 7,401 pounds and the average butterfat yield was 406.97 pounds per cow. The herd was milked twice daily.

The record, made under supervision of the dairy department of the Oregon State college, is authenticated in a herd improvement registry certificate issued by the American Jersey Cattle club, national organization of Jersey cattle breeders.

The highest individual producer was the 6-year-old cow, Rinda Eagle Sheila, with 8,655 pounds of milk and 553.98 pounds of butterfat in 334 days in milk.

New players who should improve the club will be Bill Hanauska, right handed pitcher from Willamette U., John Dimich, former O. S. HAWK in the WIND By Helen Topping Miller © D. Appleton-Century Co. WNU Service.

But he gave her a one-sided grin and tramped off, his two sandwiches in his coat pocket.

At the mill office he found Virgie already at her desk, with Lucy and Daniels standing about, their faces worried.

"Come along in," Virgie ordered as he opened the door. "You'll have to know about this. Seven men quit this morning."

"The Spains—and the two Andersons," Lucy added. "Billy Mount and his boy and Lucius." Her eyes were sorrowful and accusing. Her manner said louder than words, "This is your fault." Daniels was fiddling nervously with the bunch of keys in his fingers. For an instant Branford Wills got the impression that Daniels was evading, that there was something defensive in his manner, but he put that aside. They were all worried, Virgie most of all.

"That West Virginia stuff has to go through," she said. "We'll have to have somebody to tend the decker." For twenty years Billy Mount had tended the great machines, taken a fierce pride in the texture of the pulp that rolled through the presses.

"Could I do it?" Wills volunteered. "I have ordinary intelligence. I think I could do what Billy Mount could do."

"I need you outside," Virgie said. "With the Andersons gone we'll need somebody to get stuff in."

"But—why should those fellows quit?" Wills asked. "There's no other place for them in town. You treated them well—"

"They probably had reasons—fairly good reasons." Daniels was a trifle dry.

"Look here—if I'm in any way responsible for this—" Wills began vigorously, but Virgie waved a hand.

"Sit down—and keep your head on and your shirt-tail in! I'm responsible for this. Wallace Withers wants to buy this mill. Somehow or other he's working against me. How, I don't know yet. But I will know. It's a fight. Wallace says he'll put me out of business if I don't sell. Maybe he will—but he'll have a merry little time doing it. If you people want to stick with me—"
