Why Not Sell It?
 ON EVERY farm there is machinery, implements, stock or other things that are not being used and should be turned into money to be used for other purposes.
 In every home there is furniture, trunks and other articles, that might also be sold. The money could be put to use, or in a bank to draw interest. Why not sell such things now?
 Or, perhaps, you have chickens, eggs, plants, or seed, or service of some kind that you want to find buyers for.
 ENTERPRISE WANT ADS WILL HELP YOU FIND BUYERS
 Every week these little salesmen are selling goods and services for your neighbors, and at a very low cost—10c a line the first week, and 5c a line after that.
 Look around now and have your want ad in the next issue. Phone it in if you wish.

Brother of W. G. Small Is Missing in China

No word has been received from A. G. Small, a construction engineer of the University of Nanking, China, by his brother, W. B. Small, of Multnomah. Dispatches show that Mrs. A. G. Small and child were safe aboard one of the boats.

Mr. Small had been in China 14 years and constructed several of the university buildings, the dormitory and administration buildings being erected recently. Most of the brick in these structures were taken from the old Chinese wall.

In 1912 Mr. Small visited his brother here and will be remembered by many residents.

County Repaired Sewer Connection

A crew of men were sent out by the county Monday to repair the sewer connection in front of the Multnomah Service station. A great deal of surface water comes down the hill and instead of going into the sewer has run over the highway and on to the grounds in front of the filling station, where it laid in a big pool.

Guardian Angels Did Not Stay Long Enough

The curve on the road near the Multnomah school house is a dandy place for motorists to speed up and make up lost time. It is a down grade, with just the right kind of a curve for the speed maniac and there are only three roads converging here. Most autoists stop a minute before entering the highway and only about 30 children cross the road here, so most cars come a scooting along the highway at about 30 miles an hour. But a grand surprise party met them Monday morning when two motorcycle policemen took down the names and license numbers of speeders, these guardian angels stayed on the job until 1 p. m., when well pleased with the day's haul they went in town to report. If they had only stayed until 2:30 p. m. they might have averted an accident when a car hit a little girl as she was crossing the highway in front of the Multnomah Filling station.

Will the highway commission place a stop sign here and compel all cars to come to a stop before proceeding past the school house?—A.

To Replace Wooden Span With Concrete Bridge

Work will soon commence on construction of a concrete viaduct costing \$58,500, to replace the wooden Terwilliger span. It will be erected east of the wooden structure and traffic will not be interrupted on the highway.

The plans, prepared by City Engineer Laargaard and F. T. Fowler, city bridge engineer, provide for a three-arch viaduct, the central arch being 100 feet high. The bridge will be 184 feet long with approaches 50 feet each in length. There will be a 38-foot roadway and one six-foot sidewalk.
