NEW COAST ROAD IS DISCUSSED

A meeting was held Tuesday evening at the L. O. O. F. hall to discuss the feasibility of a new route to the beaches. R. E. Hanna was elected chairman. The new route would go by way of Forest Grove to Glenwood, thence to Timber and Cochran and then to Moehler, where traffic could go north to Cannon Beach or south to Tillamook.

The Tillamook delegation was unable to be present, also the Hillsboro, but a number attended from Forest Grove. Postmaster Bangs of Timber was present, Messrs. Graham, Livermore, Raynard, Gray, Thornberry, Fenbo and others spoke for or against the route.

Some interesting facts were brought out it was stated that the Trask route would be shorter than the Wilson route, but the grades would make it more expensive. Also the county had already spent \$70,000 on the Wilson road, surveying, etc. and intended to make the Wilson road a market road and that while the road to Moehler looked shorter it was in reality 12 miles longer.

Mr. Broderson made a good suggestion when he thought signs should be erected near the Bertha bridge and direct travel to the Beaverton highway.

It was decided to appoint a committee of two to co-operate with other members of the chamber of commerce in other towns to further the development of roads between the different cities.

None of the routes were endorsed.

Gas Now Washes Eggs

The most favored table delicacy, the chicken, which owes its start in life to a gas-fired incubator and its final curtain-call to a gas range, has recently added another use for gas.

One new application of gas in industry is for egg washing in a large poultry producer's establishment at Portland Ore. The automatic, gas-heated egg washing machine has a capacity of 275 cases a day or 34 cases per operator. When the work is done by hand, an operator can wash but ten cases a day.

The eggs are placed in the machine and travel through steaming water and revolving brushes. They are dried by a fan and are ready for packing.
