**HILLSDALE**

Mr. and Mrs. B. Holrich of California spent a few days of last week visiting with the A. R. Johnston family. Mrs. Holrich and Mrs. Johnston are sisters.

Several ladies from this community attended the P. T. A. luncheon and card party at Capitol Hill Wednesday afternoon.

Mrs. Stanton Lapham and small daughter, Donna Marie are the house guests of Mrs. Lapham's parents, Mr. and Mrs. Frank Winnard.

The R. Scoffins family have recently sold their property in Hillsdale and have moved to Portland.

Mr. and Mrs. A. R. Johnston entertained a few friends Saturday evening at their home with a 500 card party. Their invited guests were Mr. and Mrs. M. C. Brickell, Mr. and Mrs. C. Collins and Mr. and Mrs. V. Beardsley.

**THE GRAND CANYON AND ITS SURVEY**

The following letter was received from Cecil D. Emmons who is now in Arizona in the forestry service:

(Continued from last week)

Sunday came and I prepared for a trip by myself. I threw a small pack on my back at two-thirty in the morning and took a few of the necessary things to make a quick breakfast and lunch and as field equipment I carried my camera and a sketch pad. With the camera I would get the perfect formation and body of the subject and sketch to get the colors as nearly true as possible.

I reached a gorge just east of the lodge and followed its stairlike bottom and was confronted by a granite cliff of columnar shape stones leaving narrow chimneys between; thru these I managed to reach the top of the highest promontory overlooking the canyon. It was quite dark when I was in the gorge and I could look up at the top of the cliff and see a new day awakening on the tops. I reached the top just in time for the sun was playing rays of purple and red on the Painted Desert. I breathed the sweet air coming from the pine, cedar and pinion. I sat down and decided, this is all I ask for.

Here was the Grand Canyon of the early morning when the light slants lengthwise from the Painted Desert. The great capes of the northern rim shoot into the picture, outlined in golden light against which their shapes gleam in hazy blues. Certain temples seem to rise slowly from the depths, or to step forward from hiding places in the opposite walls. Down on the green floor the twisting inner gorge discloses here and there lengths of gleaming water, amlit and yellow.

An hour later all is wholly changed. The dark capes have retired somewhat and now are brilliant-hued and thoroughly defined. The temples of the dawn have become remodeled and scores of others have emerged from the purple gloom. The Granite Gorge now detailed fully, displays waters which are plainly muddy even at this great distance. And now the opposite wall is seen to be convoluted, possessing headlands and intervening gulfs.

And so, from hour to hour, the spectacle develops. Midday, with sun high behind the south rim, is the time of least charm, for the opposite walls have flattened and the temples of the depth have lost their defining shadows. But as afternoon progresses the spectacles of the morning creep back, now reversed and strangely altered in outline. It is a new Grand Canyon, the same but wonderfully different.

And just after sunset the reds deepen to dim purples and the grays and yellows and greens change to magical blues. In the darkness of the moonless nights the canyon discloses unimaginable mysteries. Now darkness falls with a full moon as big as any tropical moon. Dark clouds are moving fast and the moon seems to be at speedy flight as it throws a silver, green and golden light in the depths of the clouds which are moving swiftly eastward and twisting about in time with the wind blowing through the pines. One cannot feel lonely with this crowning of the pine and quaking aspen. The abyss beneath me is still and motionless. So gripping is the appeal of a tropical moon shining over a thousand spectral forms projecting from inscrutable gloom; dreams of mountains, as in their sleep they brood on things eternal.

A chilly air and wind blowing and clouds half covering the sky revivets a storm so I descend from the high point which I spent most of the day and enter into the gorge again. I climbed onto the edge of an overhanging brink and plainly see the waters of the silvery Colorado struck by the light of a scrumptious moon. I made the trip back to the lodge just in time for I had barely hit the trail an eighth of a mile from the lodge when total darkness and a downpour of rain soon entered into the end of a perfect day.

(Continued next week)

**DURHAM.**

Last week Durham lost a baseball game to St. Anthony of Tigard. This week they play Tualatin.

Mr. and Mrs. Eli Kingston and children, of Beaverton, called on friends and former neighbors last Saturday.

L. A. Chard and family of Por-

land, former residents here, visited at the home of James Nokes Sunday afternoon.

The Boy Scouts attended Easter services in a body at the Tigard M. E. church Sunday morning.

Miss Margaret Scooborg made a trip to Bend to visit friends over the week end.

J. S. Bily and family spent Easter Sunday with relatives up the valley.

J. R. Dobson and family visited with friends and relatives at Mulloy and Wilsonville Sunday.

Albert Koch motored to Moomouth last Sunday.

S. Sackett of California and Mrs. Seifert and son, returned to their respective homes recently, after attending the funeral of Mrs. Herbert Sackett.

Geo. Wise has a new well, the old one not doing good work after putting in the new water system.

Mr. and Mrs. E. T. Appleberry were called to Wenatchee, Washington on account of the death of a mother-in-law. Mrs. Ellison is staying with the children while they are gone.

Arthur Ellison spent the last week end at the home of his mother, Mrs. U. W. Ellison.

An asphalt and steel pavement is to be tried in Paris.

**COUNTY AGENT NOTES**

Next Saturday, April sixth, between 1:30 and 2:30 p. m. County Agent McWhorter will give a talk over radio KGW on alfalfa production in Washington county. This discussion is part of the program for additional alfalfa acreage as was advised by the Agricultural Committee of the Subordinate Granges which met at Hillsboro recently. This is the second of a series of discussions on Washington county by O. T. McWhorter.

Len Guild of Farmington reports that he saved his first crop of alfalfa in 1928 for feed and sold the second and third crops which netted three tons per acre and sold baled at \$17.00 per ton. This figures out

\$51.00 gross per acre for the second and third crops of alfalfa.

She man Hyre, of Newton Station, the man who introduced alfalfa to Washington county says that he gets about \$23.00 per ton for his alfalfa hay when he feeds it to his cows and sells their products.

The soil for alfalfa should be deep with an open subsoil and deep natural drainage. Alfalfa roots deep and deep soils are a necessity for its best success.

As a general rule one ton of lime per acre applied to the plowed ground before seeding will meet the lime requirements for alfalfa. It is

far safer to use lime for the best success with alfalfa tho a few favored spots in various parts of the county are and may continue to get good alfalfa crops without lime.

Ground limerock in carload lots of 30 tons can be laid down in pooled orders in paper sacks at \$6.40 per ton on points along the Southern Pacific.

There are approximately 18 tons in orders for lime on file for here and vicinity. If additional orders are received a carload can be ordered for Tigard or Robinson Station.

About half a carload of orders are on file for delivery at Hillsboro.
