W. F. CYRUS FORMS THREE NEW CLUBS

Three new clubs have been organized in the county since the first of April. These new groups have enrolled a total of more than 20 members. Every new member has their calf and the clubs have worked out a program for the years work. The new clubs are at Thatcher, Farmington and Scholls.

The Thatcher Jersey Calf Club organized with six members and L. T. Sills, local leader. The club was organized in the Thatcher school where the teacher, Mrs. Emma Bryant, allowed time from school work for the organization of the group. Every member of the club has a Jersey calf and is enrolled in club work for the first time.

The Farmington club enrolled with six members and W. T. Putnam, Jr., local leader. Jersey calves predominate in this club.

Henry Hesse is the local leader of the Scholls Calf club. He has seven boys enrolled in this group. None of the boys have had previous club experience, but are one of the most enthusiastic groups in the county. Jersey, Holstein and Guernsey calves are owned by these boys.

There are now approximately 160 boys and girls enrolled in livestock and crops club work. Some organization work is yet to be done in calf club, pig club, corn and potato club work. The livestock clubs are all planning on preparing livestock judging teams and demonstration teams as a part of their club program for the year.

LATEST IN FAGEOL TWIN COACH'S SEEN ON ROAD

The Pacific Stages, Inc., have been trying a new Fageol "Twin Coach" on the early morning and evening peak load schedules between Portland and Aloha.

The coach resembles a street car and is very roomy inside also having much more head room than the regular type cars. Larger carrying capacity is provided by placing the driver's seat at the extreme front end, thus leaving the space occupied by the motor on other cars.

The motors are mounted in the center of the car under the floor. Two 130 horsepower motors are used and operating by controls located in front of the car.

Seats are provided for forty passengers. Baggage racks are inside the car over the seats. Air brakes are used to insure safety as well as comfort. The car is especially adapted to use where the volume of traffic is exceptionally heavy.

The county federation of woman's clubs will meet at Metzger Friday, April 26 and a feature will be a club institute at which each club of the county has been given a topic for the paper. Sadie Orr Dunbar of Portland will give an address.

BEAVERTON TO OPEN BASEBALL SEASON SUNDAY

Zurcher claimed he did not see the car. Damage to Filen's car amounted to only about \$10. This is the first accident to the school buses in six years.

Enterprise Annual Cooking Matinees May 14-16 at Beaver Theatre

The ladies of Beaverton and surrounding territory will be glad to know that tentative arrangements for the Annual Cooking Matinees are now under way. Cooking Matinees are the newest means of acquainting women with the latest, inexpensive recipes and modes of food preparation. Everyone has her favorite recipes and her familiar way of doing things but a new way of making apple pie or a dinner that is all cooked in one dish makes a decided hit with both husbands and wives.

As an extra treat this year Grace Anderson, formerly Home Economics expert of the Seattle Post Intelligence, and Elizabeth Reger, Gasrange specialist for the Portland Gas & Coke Co. will conduct the classes. Miss Anderson has had a great deal of experience in Seattle in demonstrating foods and cookery, and it is rumored that her hands and tongue click simultaneously. So few people can talk while they are cooking and remember to put the baking powder in the biscuits or the salt in the pie crust, but Miss Anderson manages to get in all the ingredients and tells the reason why at the same time. With her pleasing personality and expert ability along Home Service lines, combined for the purposes of entertainment and instruction, this Spring's Series of classes promises to be bigger and better than ever. Miss Anderson's complete understanding of plain and fancy food preparation, coupled with her unusual ability of clear, concise recipe explanation, insures for the ladies attending an enjoyable series of profitable lectures.

While she is new to this particular territory, her pleasing personality and desire to serve the ladies of the community will, no doubt, make a great many friends for her. Miss Anderson leaves a trail of friends behind her wherever she goes. She has a most sympathetic understanding of the problems of the housewife of today and is always willing to help in any way possible. She has offered to give any help or recipes to ladies who may wish to have them, and advises that one bring her special problem to the first lecture so that they may be discussed with her that day or the next.

Miss Reger has had many years experience demonstrating Gasranges and in teaching women in their own homes how to use them. She is especially a past master in the art of making angel food cakes in Smooth-top Gasranges, and has never had a failure.

Miss Elizabeth Cutbert, Domestic Science instructor in the Girls' Polytechnic school of Portland will assist, and will be remembered from previous years.

They have arranged a program which we believe will be interesting to everyone and will contain new, delicious, tested recipes and several old favorites modernized. All the recipes they intend using have been tested many times and each has been perfected to the nth degree. Each one will be useful and popular, and some are especially expensive. Even the most expensive food articles can be ruined in the baking and the expensive ones have an undisputed flavor when carefully prepared. More time and longer cooking processes often have to be employed but money is actually saved in the cost of food materials.

Their specialty will be short cuts for the housewife and the adoption of modern methods in home cooking. Specially made little implements and simple, "saving tricks" are what save much time and expense in baking and sewing. Bowl scrapers often pay for themselves in one cake, by scraping the bowl out as slick as a whistle and not a speck left for even the cook to clean up. Cutting the shortening into the flour, for biscuit or pie crust with a regular chopper

saves an incredible amount of time. Fingers seem to have gone out of style where pie crust is concerned, and forks and knives are too slow when one is in a hurry.

They will help you take the drudgery out of cooking with hints and helpful suggestions. Real drudgery comes when a person has made the same dessert for ten years or cooked the same meat, potato and gravy dinner for even half that time. Housewives do not realize that eating may become a near-drudgery when a person has to eat the same kind of food day after day, changing only a little with the season. Spring does bring its rhubarb and summer its strawberries but the winter months bring the time when each one must be on the lookout to vary her menu and routine of work. It is much more fun to luke and eat apples that have a little orange rind mixed with the raisins or when the apples have been cooked in cider. It's a pleasure to fix them when they are unusual. In just those simple ways these ladies will take the drudgery out of cooking and send it flying out of the window. Changing the filling in the cream puffs, serving a new accompaniment with the same old salad, improving the lemon pie, all help to make a change in the dispositions of family and cook.

Cooking the way mother used to cook is a forgotten phrase except with the men. If every lady cooked exactly the same way her mother did there would be no use for recipes and new ideas. Luckily, most people are looking for something new and even though mother was a marvelous cook she probably didn't have to hurry through the preparation of dinner as so many modern mothers have to. Our modern hurry and scurry has at last come into the kitchen and to save time is to make it. The quicker a person can get through dinner, the sooner she can get out with the family. Families appreciate good food, but not when the preparation takes mother from their midst.

These ladies have had unexcelled success in their previous demonstrations and the two matinees to be given here are expected to be the biggest that these ladies have had for some time. Large crowds are expected at each matinee and ample provision is being made to accommodate everyone. It is advised that ladies come early to obtain the choice seats. The kitchen will be set up on a platform so that everyone can see it but it is the ones in front who will be able to catch the little things that help make flavor and lightness.

SHATTUCK STATION RESIDENT DIES SUDDENLY

W. E. Sawdey of Shattuck station, died Wednesday morning at 8:30. Mr. Sawdey supplied milk to some of his neighbors and had just completed his deliveries and joyfully called to a man digging in a nearby field to watch his spade as it was getting hot and with these words passed out of life. Mr. Sawdey's death is a shock to the community. He had resided at Shattuck for a number of years. He leaves a widow Georgia M. Sawdey and a daughter Elizabeth Sawdey. Funeral arrangements had not been made at the time the paper went to press.
