OREGON REFERENCE BOOK READY FOR DISTRIBUTION

The initial volume of "Who's Who in Oregon" is just off the press and is ready for distribution throughout the state. The book is the first venture of its kind ever attempted in Oregon and is published by the Oregon City Enterprise, nearly two years having been spent in its compilation and editing. There are about 2,800 biographical sketches in the book, which carries no advertising nor pictures, but is restricted to actual reference material concerning prominent men and women of Oregon.

Lewis A. McArthur, author of "Oregon Geographic Names," has written a foreword for the book, which is bound in maroon leather and lettered in gold. The publishers state that not a single sketch has been paid for and that the volume represents a successful effort to issue an Oregon biography free from puff.

"Who's Who in Oregon" consists of 242 pages, including a table of abbreviations, an introduction, preface, and interesting information about the state. The edition has been restricted to 1,600 copies, of which 1,200 have been ordered by subscribers.

TUALATIN

Extensive improvements have been started on the tract of land known as the Tualatin park which was purchased by a party of Portlanders last season. The company is incorporated for \$30,000.00 and the officers are: president, Chris Reims; vice-president, J. P. Zukas; treasurer, John Voleske and secretary, Miss Palola. 80 rods of the tract border on the river. Chris Reims and Mike Janis are members of the building committee and F. L. Webber of Garden Home is one of the nine trustees and a member of the purchasing committee. A large frame building is now being erected to be utilized as a recreational hall for the summer.

Mr. and Mrs. J. H. Schooley recently of Portland have purchased a five acre tract in the Compton-Kohlman district and moved this week.

Mrs. L. S. Harding is quite ill and a trained nurse, Mrs. Mitchell of Portland caring for her.

Miss Trixie J. Johnson is recovering from that juvenile malady—the mumps.

Mr. and Mrs. E. C. Richardson attended the bridge and five hundred party at the Metzger Community house Friday night. There were nineteen tables in the play. Four prizes were awarded and refreshments served. The Woman's club sponsored the affair.

Avoid Gas Oven Rust

Rust in the oven of a gas range can be avoided if the door is left slightly open for a moment after the burners are lighted. The open door permits the escape of the moisture produced by combustion and prevents its too rapid condensation on the sides of the oven. A further protection for both the oven lining and the burners is an occasional application of oil or grease to form a moisture-proof film. The substance used should be free from salt, and should be applied while the metal is warm.

WESTERN GAS USED BY DURANT DEMONSTRATORS

Durant dealers and private owners throughout the Western territory engaged in a series of demonstrations of power, speed and durability during the past week, and, according to Scherbel, the official gasoline used in order to make all tests standard was the product of the Western Oil and Refining Company.

According to the testimony received by the company from Arthur "Art" Blodgett, driver of the Durant Six-Sixty four-door sedan used in the hill climb events in Oakland Calif., and Glenn Rushmore, who piloted the Durant Six-Sixty sport roadster over San Francisco's famous test hills.

"In order to enable a motor car to perform at its peak, the fuel used must not only be of high quality but it must burn cleanly and be highly combustible," Rushmore said. "That Western Gasoline meets the requirements of present day internal combustion high speed motors was conclusively shown in our San Francisco events. Practically every important test hill here was topped by Durant Six-Sixty with Western Gasoline in the tank."

"Western Gasoline should be given great credit for the part it played in our 'Durant Record Making Week' in the Eastbay," said Blodgett. "In surmounting the well known grades here, the motor of the Durant Six-Sixty operated smoothly and efficiently with this fuel."

HOME POINTERS

If the liquor from pickled peaches is saved it can be used to advantage in mince pies or sauces. Creamed butter added to honey

that has been whipped makes a good syrup to use on waffles.

After freezing ice cream if the ice is emptied into a sack, nearly all of the salt will remain after the ice melts and can be used again.

Pears that are too hard for serving plain may be cooked until tender, pressed through a sieve and the pulp used for soup.

Left over plain lemon jelly dessert may be cut up into cubes and mixed with fresh vegetables for a salad.

Although high priced now this season's rhubarb can be canned to advantage as it is of good quality, and if canned now it makes a high quality article for the familyarder.

The rhubarb is cut into pieces 1 to 1 1/4 inches long. It is then put into a strainer and blanded in boiling water for two minutes before filling jars. After the jars are filled a 40 per cent syrup is added, which is made by using four parts of sugar to six parts of water. Put the covers loosely and set into water and boil for 15 minutes. Then remove, seal and cool.

Mr. and Mrs. Tom Miller and family attended a family reunion on Sunday at the home of one of Mrs. Miller's sisters, Mrs. E. T. Green at Lents, Oregon. There were twenty five present.

COMPARE

the delivered price as well as the list price in considering automobile values. Chevrolet's delivered prices include only reasonable charges for delivery and financing.

If you are considering the purchase of an automobile, you owe it to yourself to check the new Chevrolet Six against any other car—value for value and price for price!

Here, in the price range of the four, is offered a smooth, powerful, six-cylinder valve-in-head motor—which delivers better than 20 miles to the gallon of gasoline—and whose smooth, quiet, velvety operation, with its complete lack of drumming and vibration, is a revelation. Here are beautiful bodies by Fisher—with fittings by Fernstedt...rich, deep-tufted upholstery and adjustable driver's seat. And throughout the entire chassis are found numerous examples of advanced engineering—such as quiet, non-locking 4-wheel brakes...ball bearing steering mechanism...and automatic acceleration pump.

But no mere recital of features can give you any conception of Chevrolet's value leadership. So we urge you to come in and see for yourself why over 500,000 people have chosen the new Chevrolet Six since January 1st!

CAMEL CIGARETTES

WHY CAMELS ARE THE BETTER CIGARETTE

Camels are made of the choicest tobaccos grown.

The Camel blend of Domestic and Turkish tobaccos has never been equaled.

Camels are mild and mellow.

They do not tire the taste.

They leave no cigarette after-taste.

Camels have a delightful fragrance that is pleasing to everyone.
