

C. M. Olsen Transfer & Storage Co.

Located at 247 Pine Street, Portland, is One of the Leading Transfer Firms of that Section, Being Thoroughly Equipped for Work, Storage and Shipping Anywhere

There is nothing so aggravating as a delay when you are in a hurry and the prime aggravation in this respect is the inexcusable delay of the transfer man. To avoid trouble of this kind the people of this county turn over this feature of their patronage to the C. M. Olsen Transfer & Storage Co. Realizing that one of the essentials of their trade is promptness, this regular firm maintains sufficient equipment to enable it to fill all orders with rapidity and dispatch. It does not matter whether you wish them to haul for you a small box or to move all your household furniture, for in either case they will be "on the job" at the time they promise. In addition to this they have won for themselves a reputation for careful handling of all goods entrusted to their care and this trade is always increasing. At this season they are unusually busy, so if you are contemplating moving, or expect

to be in need of a transfer man, let them know in advance. The manager is a prominent citizen of the county and deserves the support and patronage of the community. They are equipped to do all kinds of hauling and may be seen every day loading, unloading or transferring goods on the road. Another one of the features of this firm is their packing and crating department. They enjoy a large patronage in this department and are noted for their prompt and careful service. They make a specialty of Padded Lift van service for boat, train or truck. No crating necessary. Loaded at your home, unpacked in your new home. We are pleased in this edition to compliment the manager upon his service and to assure all of our readers that whatever they demand in the way of latter day transfer service it will be furnished them by the C. M. Olsen Transfer & Storage Company.

Decker Business College

This Well Known Institution which is Located at 3rd and Alder in Buyers Bldg., in Portland, Offers This and Surrounding Sections An Opportunity that is Unexcelled in any City Students from this School May Be Found Successfully Located Over the Country.

Perhaps no institution, whether local or foreign, that operates in this section is more worthy of favorable mention than this well known business college. Since the day of its foundation in 1913, to the present time their has been but one idea in the manner in which it has been conducted, and that is the improvement of living conditions and the broadening of all who are brought in contact with it in an intellectual way. For years past the importance of special training for a successful business career has been impressed upon the minds of the public. The large employers are constantly giving preference to the applicant who trained himself for some line of work connected with the business in which he is about to engage, as a result the person who is untrained watches the new man or woman go past him to some higher position that carries not only an increase in salary, but added responsibility. A business course for the child is the aspiration of every modern parent, and with such an institution as this one in our midst, the future of your child is assured, for at a very nominal cost a complete course in any business subject that may be desired can be secured. All modern methods of instruction in these courses have been introduced, and the instructors themselves have been selected with the view to making this college one of the best of its kind in this section, and in this review we take great pleasure in complimenting the Decker Business College. This modern institution has added to the growth and improvement of this section.

Lennox Top Shop

At 88 No. 11th Street, in Portland, Is an Up-to-date Auto Top Shop in Every Respect, Where They Specialize in Upholstering, Auto Top Building, Seat Covers, Etc.

It is a fact beyond question that a modern establishment of this kind is a great asset to a community such as ours. They are experts when it comes to re-upholstering your car, and there you can get it done when you want it, and when they tell you they will have it done for you. If you want any special kind of upholstery or any original ideas carried out for you, this is the place to go for anything there is to do in this line they can do. In their auto top department they have won well-merited commendation through their modern methods and excellent work turned out. There is nothing that mars the looks of a motor car to such an extent as a lumpy and worn out top. The top repairs out more quickly than any other part on your car, and after a year or two of service it is necessary to replace it with a new one. Some people think that it necessitates the purchase of an absolutely new top, but with a concern such as this one in our midst they can completely rebuild your old one and turn it out in as good shape as the day that you bought it. The manager and his assistants are men who take an interest in the city and surrounding territory and are at all times connected with propositions that will add to the growth and expansion of this part of the state. Therefore we are pleased to compliment the Lennox Top Shop in this review and advise all our readers to call on them when in need of anything in this line.
