M. B. Fisch Auto Sheet Metal Works

Located at 105-107 No. 15th St in Portland, Render an Efficient Service in High Grade Body, Fender and Radiator Repairing. Distributor for U. S. Certrige Radiator Cores.

This is indeed an age of specialists and with motor driven vehicles becoming more common each year, the necessity for specialists to keep them in proper running order becomes more evident. We have the motor expert, the battery expert, the ignition expert, and various other experts. For years one of the essential features of the proper performance of an automobile was given very little attention. We refer to the radiator.

Although your motor may be in perfect running order and other parts of your car in the best of condition, if you do not have proper circulation for the water your car is soon out of commission. Consequently the radiator expert is coming into prominence.

How long have rust and scale, that are forming continuously in the cylinder block, been collecting in the slender cooling channels of the radiator core?

How many different kinds of water containing various alkalis and other chemical impurities, have gone into your radiator? What chemical reactions are biting into the metal leaving it pitted and weakened, with salt deposits that resist circulation?

With the advent of the radiator expert it is a very simple thing to have your radiator permanently repaired in such a way that instead of damaging your car you are improving its working qualities. The Fisch Auto Sheet Metal Works make a specialty of recovering and rebuilding your old radiator, which does away with the expense of getting a new radiator. This is why we are glad to refer you to this firm which makes a specialty of radiator work it can guarantee. We would suggest that, if you are having trouble with the radiator on your car, you take it to them and take advantage of their expert service.

SMITH NAMED AS HONOR STUDENT AT U. OF O.

University of Oregon, Eugene, October 7, M. Donald Smith, of Beaverton, has been named an honor student at the University of Oregon by the honors council. A total of 291 students, comprising the thirty per cent who hold the highest scholastic records, were selected as honors students and were awarded honors privilege.

Honors privileges, if the student takes advantage of them, allow him to enroll in honors courses, enables him to come in closer contact with his professors and permits him to do individual work. He is exempt from much of the routine work of classes and is given intensive and highly specialized work to do. A student may enroll in general honors, which means that he may do honors work in three courses, or he may choose to do it in only one course.

QUICK MARKET SERVICE PROVIDED OVER RADIO

Market reports received by leased wire and put on the air less than a half hour later is an every-day occurrence now over the Oregon State college radio, KOAC, since the coordination of the federal leased wire market system with the economic department of the extension service.

The spot market news has been expanded now to include reports from Portland and other primary market on livestock, crops, fruits and vegetables, dairy produce, and poultry. The broadcasts are regular features now from KOAC starting at 12:45 and 6:45 o'clock each day except Sunday. A similar broadcast though not as complete is made from KGW in Portland in the early afternoon, from material supplied by the federal bureau in Portland and assembled by the extension service.
