

Tigard Union High School Opens Doors September 8th

Tigard Union High School will open on September 8th, with the following staff: Myrtle Mullen, Mathematics and Public Speaking; Alice Gregg, English and Dean of Girls; Nellie Wesch, Commerce; Christena Maybach, Home Economics; Florence Hunt, Girls' Physical Education, Music and Study Hall; Glenn Linn, Sciences; Fannie Weaver, Latin and Spanish; Wendell Stamps, History and Boys' Athletics, and Thomas Fowler, Principal.

The two new members of the staff are Miss Weaver and Mr. Stamps. Miss Weaver is a graduate of Linfield College and has been teaching in Wasco, Oregon, for the past two years. She was elected to fill the vacancy left by Miss Maynard who resigned in July.

Mr. Stamps is a graduate of Lom-

bard College, the school in which Paul J. Schissler of Oregon State College coached before coming to Oregon. Mr. Stamps has had two years of teaching and coaching experience.

The high school schedule is arranged so as to offer the subjects necessary for the following courses: General, College-Preparatory, Scientific and Commercial.

New buses have been provided for the transportation of the students. The routes will be announced in the next week's issue of the paper.

Mr. Fowler will be in his office on September 2, 3, 4, and 5 from 10 a. m. to 4 p. m. for the purpose of registering any student and helping them plan their year's work. He will be glad to confer with any of the parents.

TWO NEW BUSINESSES TO OPEN IN TIGARD SOON

Two new business concerns will open in Tigard in the very near future. A restaurant man from California plans to establish an eating house in the Johnson building, just as soon as the Rankins move into their new home and release the store space to be used. A new up-to-date bakery will also be settled in the Johnson building. These two concerns will be an addition to Tigard's already thriving business center and will be heartily welcomed.

Grangers Basket Picnic Set for Labor Day

The Tigard Grange will hold a basket picnic Labor Day at the home of Mr. and Mrs. W. A. Root on the Fields place. All Grangers and their friends are invited to attend. Rain or shine, you will be protected and assured a good time.

Wooden Cannon Used by Japs Against Russians

In the summer of 1895, related the Trans-Pacific Review, when a few British warships were in sight in the waters near Kyushu, the samurai of Satsuma, seeing the ships were out of gunshot from the shore, put out to the sea with several cannon. Arriving within range, they fired, but the shot failed to reach the ship. They were a little confused and fired at random but none struck. The British sailors, looking from their ship, laughed heartily at them. Suddenly a thundering boom of cannon was heard from the British ship; and in a few moments the Japanese ship was seen no more except her cannon, which were floating in the water. Those floating cannon astonished the English sailors. They were made of wood hooped with bamboo. In the Russo-Japanese war the wooden cannon were again used to blow off the enemy's wire entanglements.

New Arrivals

A number of new citizens arrived in our community this week. A daughter was born to Mr. and Mrs. Ed Bolman, Tigard, and on August 23rd a son was born to Mr. and Mrs. Joseph Johnson at Wilcox Memorial hospital, a daughter to Mr. and Mrs. Geo. Freeman, Tigard Rt 1. Dr. Mason was the attending physician.

If women only had as much beauty treatments there would be fewer divorces in this country.

A super-salesman is one who can sell a 1930 wife a sewing machine and a genius is a husband who can get her to run it.

The hardest job of the average motorist nowadays is that of keeping the wolf from the garage door.

"Low Oregon power rates enable us to meet eastern competition"

... says W. F. PRIER, President Oregon Brass Works

Conservative, fair minded and deeply interested in Oregon's welfare, Mr. Prier and his sane opinions are worth more than all the empty arguments and fallacious reasons of sincere but impractical idealists. We quote him here to give you another example of good Oregon horse sense. Civic and industrial leaders throughout the state join with Mr. Prier in this view of the Oregon power situation. Pacific Northwest Public Service Co. ("Pepco")

HORSE SENSE SERIES...NO. 3

"WE are perfectly satisfied with our power rate, otherwise we would not have invested our money in electric furnaces.

"These one-sided discussions about high power rates are doing Portland a lot of harm. The people who are doing most of the talking know least about the actual facts. I felt so strongly on this question that I recently wrote an open letter telling why we are satisfied with our rates.

"We were the first brass manufacturers west of Chicago to install electric furnaces, and now have the largest electrical installation of any company in our line west of Chicago. These furnaces cut our shrinkage in melting—the biggest waste problem in our business—about 50 per cent under our former oil burning equipment system. Then, too, electric furnaces produce a much finer grade of metal and reduce our rejections to the minimum, which is a great advantage in the cost of production.

"The privately owned power company enabled us to take early advantage of electric furnace development by keeping us informed of that development. That was just one evidence of efficiency which has been demonstrated so many times. Could we expect that efficiency from a municipally operated power plant? We could not. Furthermore, a municipally operated business cannot operate as economically as a privately owned enterprise.

"I would very much dislike to see our city enter the brass manufacturing business. Similarly I think the power business should be left in the hands of the privately owned companies who have become expert in their line.

"A number of our products are distributed nationally, in competition with the largest eastern manufacturers, where quality and price only are considered, and such items as cheap electric power enable us to meet this competition."
