ACID GASOLINE EXACTS A COSTLY TOLL WHICH YOU NEED PAY NO LONGER

...Lost Mileage-Declining Motor Performance
Unnecessary Repair and Upkeep Cost, Etc., Etc.

Because the damage caused to your motor by acid gasoline is not visible at the time... it is none the less real, serious and costly. Acid in gasoline is not a new discovery... it is as old as gasoline itself. Its elimination from the crude oil has always been the big, perplexing problem of the refiner.

You may say "acid gasoline has never hurt my motor", and you may be sincere in thinking so. The fact is, however, you've paid the bills for damage caused by acid gasoline, as has every other motorist, for acid in gasoline is constantly exacting its hidden, costly toll.

Unfortunately, you have perhaps not known that acid in gasoline is largely responsible for declining motor performance, increasing cost of operation, and unnecessary repair and upkeep costs.

Slowly but surely acid in gasoline eats away at the unseen working parts of your motor. It corrodes the needle valve and float in the carburetor; it attacks bearings and eats into the crankcase. The result is excess gasoline consumption, reduced mileage, gradually impaired motor performance, and many upkeep and repair bills that might otherwise have been avoided.

No longer need you pay this toll of Acid Gasoline. The Violet Ray Process of Refining, protected by 7 U. S. Patents, (numbered 1625195, 1639988, 1652399, 1728156, 1769475, 1769476, 1792003,

eliminates all Naphthenic and Sulphur-Bearing Acids from...

VIOLET RAY

ACID-FREE GASOLINE

Your visible proof that there is and can be no acid in Violet Ray is supplied in the violet color of Violet Ray Gasoline. The slightest presence of acid would immediately destroy its violet color and turn the gasoline to white or straw color.

Why take chances on putting acid gasoline into your motor when you can have this infallible guarantee of Science that Violet Ray is free from acid? There is no other practical, visible test available to you. Any other gasoline (white or colored) may contain acids without your knowing it. Violet Ray cannot.
