The Cost of Education

The growth of education cost in this country is starting, Marian K. Hart, president of the New York State Economic Council says:

"Between 1900 and 1926 the number of pupils enrolled in the U. S. schools increased 59%, the number of teachers employed increased 90%, salaries of teachers increased 700%. The amounts spent on buildings and equipment increased 1050% and the expenditures for all other school purposes increased 1130%. In the same period the population of the U. S. increased 10 1/2 percent. Students have grown faster than the population, teachers much faster than the increase of students and teachers salaries faster than the cost of physical requirements.

Here's A Man To Honor

A world that is quick to honor military genius and sometimes seems to revel in their slaughter often pauses for a celebration that is more fitting in our present civilization.

Such was the recognition given the fiftieth anniversary of Robert Koch's discovery of the microbe that causes tuberculosis which he announced to the world just fifty years ago last Thursday.

While his discovery has not led to an entire prevention of tuberculosis or presented a cure for the disease as certain as Jenner's vaccination for smallpox or Pasteur's treatment for hydrophobia, it has led to a striking decrease in the death rate from the Great White Plague.

At the time of his discovery, tuberculosis was the principal cause of death and accounted for one out of every seven fatalities. Today, in the United States, it ranks seventh and takes away only one out of every seventeen who die.

Without going into the steps taken by Dr. Koch to prove that tuberculosis was not hereditary and to be feared only by certain families, but that it was rather a contagious disease spreading from one victim to another by germs transmitted through some method of contact, we call attention to his feat establishing the presence of bacillus and indicating the precautions that should be taken to prevent its spread.

When he read his paper before the Berlin Physiological Society on March 24th, 1882, he completed a chain of proof started by Jean Villemin in 1865, when he announced that tubercles taken from consumptives would develop tuberculosis in a healthy animal. However, Villemin's fellow physicians found a loophole, suggesting that the injection might contain a substance which made a person susceptible to tuberculosis rather than the cause of the disease in itself.

Koch stopped this speculation by demonstrating that bacteria, multiplied outside the body and injected into healthy animals would produce the disease and that the bacilli could be found in these experimental animals, isolated and thus complete the circle of positive evidence.

It is worthwhile in busy life for men and women to turn aside occasionally and give thought to the great work that has been done, and is still being done, by men like Robert Koch.

The business revival may be around the corner but it has been here so long that one imagines that maybe the big business predictors are wrong and there isn't any corner.

Communities that are visited by tornadoes appreciate the work of the Red Cross. The nation should support this organization.

The average citizen rarely gives a thought to public administration until the time comes that he can't pay his taxes; then, the extent of his interest is expressed in loud yells of pain

In view of the loans being made by the R. F. C. it is funny how some financiers and business magnates fume against the word "dole" when applied to giving a poor devil and his family something to eat.

Our advice to leap year girls, is not to leap.

DANCERS CAUSE EXPLOSION

Los Angeles—Two actors were injured in an explosion when flashlight powder was ignited by sparks from their shoes while doing a tap dance on a metallic platform.

MAN CHAINED TO TREE

Berlin, Md.—Missing for five days, Charles W. Brown, 31, was found in a swamp, manacled to a tree. He was weak from hunger and exposure but told how four masked men seized him and carried him to a cellar where he was chained to the wall. Three days later, he was taken from the cellar and chained to the tree where he was found. He said his captors threatened to kill him unless he signed two statements, the nature of which were not disclosed.

\$5000 FOR DIGGING GRAVE

Sterling, Ill.—A bill asking \$5000 for digging a grave, was ruled "a little too high" by a County Judge, who allowed the grave digger \$500 but told how four masked men

Many People Wear Garbage Pile Hats

Big Industry In Reclaiming and Working Over Abandoned Straws

"Oh! Mary, did you see those perfectly darling little hats over there—, and so cheap too?"

Now young ladies, if you have been guilty of making light remarks about any of your male friends wearing ash-can hats, watch your step. You may be about to drop into the same trap, and may find yourself wearing head-gear of the same character.

Ash-can hats are not only put up and offered for sale to male wearers, but nearly as many of them find their way to female customers and if folks here have not been careful they may have in their possession right now one of these much talked of varieties of sky pieces.

Recent investigations into the ash-can hat industry revealed some very interesting facts, and brought to light a profitable line of business from old cast off hats. The larger cities are centers where the business of rehabilitating old cast-off hats has grown to considerable proportions.

A small size army of ash-can searchers are daily going through dump heaps gathering and selecting everything which can be turned into some use. Thousands of old hats of various kinds are daily found in the city's garbage piles. These hats are taken out and turned over to concerns who make a business of reselling them to other concerns who in turn convert them into what appears to be serviceable hats.

Recent investigations show that where possible these hats were washed, provided with new bands, and linings, and reblocked, as near as possible in their original shape. Old felts, old derbies and old hats of every other style are treated in this way, packed in new boxes and sold to dealers who offer them as "rejects" or "seconds" or some other marking which avoids legal entanglement.

The hats which cannot be reblocked in their original shape are very often trimmed into fifty shapes for women's hats and offered for sale on the cheaper counters of stores which deal in this class of goods.

Other hats which are too badly damaged to be converted into hats are cut into stripes out of which is made various kinds of trimming to be used on the women's hats which have to be converted.

These hats are usually treated with powder of some kind which gives the felt a finish, but which is not lasting, and the ash-can variety can be thumbed as one means of identification by a cloud of dust which rises therefrom.

There is usually a decided odor which accompanies all of these hats for in the cleaning process, thousands of them are washed in the same cleansing fluid, and while they are freed of dirt to some extent, they never lose the smell of the garbage pile where they were reclaimed.

So you ladies who are marveling over your 69 cents hat and you gentlemen who are pointing with pride to your 89 cents sky piece, in an effort to demonstrate that this class of goods can be purchased at great bargains and it is not necessary to spend \$7 or \$10 for a hat, give your new head piece the once over; thump it a little and watch for the dust, look closely at the label on the inside and note the small lettering and then as a final test place the hat to your nose and get a whiff of its peculiar odor, and then be convinced that you are wearing somebody's old cast off hat which once rested in an ash can, then on a garbage pile in some large

Eating Plenty of Onions

In spite of the decidedly bad odor onions impart to one's breath, millions of people annually consume onions.

The onion is a member of the lily family, and is well distributed throughout the world. As far back as written history covers, onions are recorded. It is a very important item in the daily diet of people in the Orient, where it probably has reached its greatest production and consumption.

Evidently onions have great health-giving qualities, as they are highly prized in the densely populated countries like China, where the mass of people still live with little regard to the laws of sanitation.

Somewhat or other onions do add a dash of flavor that makes them an indispensable ingredient in innumerable dishes that delight the most epicurean taste.

Famous chefs have been known to remark that without onions their art would be colorless—and we would add, odorless.

Figures show that there is a gradual increase in per capita consumption of onions in America, and it looks like they will continue to be a very popular food.

Piping Milk and Sweets

Running fresh milk through pipe lines from the dairy farm to the community milk station or concentration points might be a possibility of the future, according to a statement made recently at a convention

city of the east, and later found its way to concerns who reconditioned it for sale at the remarkable low price.

Even then you are running a dangerous risk from disease, which may cost you considerably more than if you had purchased a standard priced hat at a price which you know carries genuineness.

CHURCH NOTICES

METHODIST CHURCH

Rev. L. C. Poor, Minister
Sunday School at 10 a. m.
Preaching at 11 a. m.
Preaching at 7:30 p. m. by the minister, subject: "The Three Greatest Maxims."
day at 7:30 p. m.
Quarterly conference next Tuesday Aid Wednesday.
Midweek service Wednesday at 8 p. m.

CONGREGATIONAL CHURCH

Charles F. Clarke, Pastor
Last Sunday was a very inspiring day at the Congregational Church beginning with a Sunrise Service conducted by the young people of the Endeavor society. The special Easter program in the Sunday School was unusually good. At the morning service there was twelve who united with the church on confession of faith. The Endeavor society held a special meeting at their usual time. The beautiful cantata "Hail Victor" was finely rendered by the choir. The floral decorations were of the high order expected from our very energetic and efficient flower committee. Next Sunday all the usual services will be held. The Sunday School at 9:45, morning service at 11 with a sermon by the pastor on "The Desire to See Jesus", the Christian Endeavor societies meet at 6:30 and there will be a special service at 7:30 at which the young people will present a play "Mary Magdalene."

CHURCH OF CHRIST

G. W. Springer, Minister
The young people are having an April fool party in the basement of the church next Friday evening.
Last Sunday morning, every one enjoyed the Easter program during the Sunday school hour.
Next Sunday morning Mr. Springer will preach on the topic "Requirements of Prayer." The evening topic will be "An Ancient Message for a Modern World."

ST. CECELIA CHURCH

Sunday Masses 7:40 and 10 a. m.
Sunday Christian Doctrine 8:30 a. m. and 9:30 a. m.
Saturday Confession 3:30 p. m.
4:30 p. m. 7:30 p. m. and 9:00 p. m.
Weekly Mass 8:20 a. m.

SCHOOLS METHODIST CHURCH

Alexander Hawthorne, Pastor
Sunday, April 3, 1932

The public is heartily invited to the services of this friendly church with its program of hearty singing and gospel preaching.

Church worship opens promptly at 10 a. m. Sermon by the pastor subject "Three Gardens." The choir directed by Mrs. L. M. Hesse will sing "How Sweet the Thought," violinist Thomas Stretcher, organist, Mrs. J. M. Stretcher.

A glowing Sunday School under the superintendency of Harold Christensen. Various and capable teachers.

Epworth League evening service 8 o'clock, the motto of the League is "Look up and lift up. The aim of the League is to win the young to Christ.

of engineers in Chicago.

Already pipe lines as much as a mile in length carry the maple sap from sugar places to sap houses on some enterprising New Hampshire farms, according to C. H. Herr, extension forester in northern New Hampshire.

In many instances each tree is connected with the main pipe system and probably cows will be milked into receptacles leading to pipe lines. We are more or less familiar with the methods of piping oil and natural gas long distances, but this is the first time we have learned of a literal flow of "milk and honey."

Sugar makers piping sap are using tin tubing in sections grooved to fit well, while probabilities are mill-pipe lines will be lined with glass, porcelain, or similar material that can be very readily steamed and cleaned and made sanitary.

Minerals in Farm Lands

Because in past years good agricultural lands have been making profit and money for their owners, no real effort has been made to think of finding other wealth on the farms. However, there will now be a wide investigation of the mineral riches of farm lands.

The Bureau of Agricultural Eco-

nomics of the Department of Agriculture is authorized to determine the extent and value of mineral resources in farm lands. Back of this there is a plan to advance the value of farm lands by forming mineral acreage pools.

LEGAL NOTICES

NOTICE OF SHERIFF'S SALE ON FORECLOSURE IN THE CIRCUIT COURT OF THE STATE OF OREGON FOR WASHINGTON COUNTY

C. M. Prink, plaintiff, vs. Mazie Hays, Jesse Hays, J. W. Copeland Yards, a corporation, Commodore Barney, Howard Welgle, W. J. McCready Lumber Company, and Verne D. Snider, defendants.

NOTICE IS HEREBY GIVEN, that by virtue of an Execution, Order and Decree of Sale, issued out of and under the seal of the Circuit Court of the State of Oregon for the County of Washington, dated 11th day of March, 1932 in the above entitled suit, and pursuant to the commands of said writ that on the 18th day of April, 1932, at the hour of 10:00 a. m. at the East front door of the Court House in Hillsboro, Washington County, Oregon, I will sell at auction to the highest bidder for cash all the right, title, and interest which the plaintiff and defendants had on September 3, 1927, or which they have since acquired in the following described real property in Washington County, Oregon, to-wit:

Beginning at a point on the west line of lot Ten in Alton Addition to

Beaverton-Reedville Acreage 174.12 feet south of the northwest corner of said lot Ten, and running thence south on the west line of said lot Ten, 101.9 feet to a point; thence north 89° and 8' East 124.75 feet to a point; thence south 126 feet to the south line of said lot Ten; thence south 81° and 37' East 126.87 feet to the southeast corner of said lot Ten; thence north on the east line of said lot Ten 254.12 feet to a point; thence south 89° and 8' West 250 feet to the place of beginning, and containing one acre.

Said sale will be made subject to redemption per the statutes of the State of Oregon.

Dated March 11th, 1932.

J. W. CONNELL,

Sheriff of Washington County, Oregon.

Date of first publication March 18, 1932.

Date of last publication April 15, 1932.

These Recipes Will Utilize Left-overs In Welcome Ways

By JOSEPHINE GIBSON
Director, Heinz Food Institute

MEAT remaining from last night's roast and bits of vegetables in the refrigerator need not appear on today's table in a form in which they will be recognized. They may be served in almost numberless dishes so flavorful and tempting that the family will enthuse about them. By adding a flavorful sauce, or by combining with another food an entirely new dish may be made. Vegetables offer possibilities for sandwiches and salads and the meats for meat pie, or delicious hash. Try these recipes for thrifty, flavorful dishes. They will bring welcome variety to your table.

Delicious Hash: Combine one cup grated cheese, two cups Rice Flakes, one egg, one teaspoon Worcestershire Sauce and a dash of pepper. Place a generous layer in a buttered baking dish, add a layer of chopped cooked ham and repeat, using remaining ingredients. Bake in moderate oven (350° F.) until cheese is melted and the top slightly brown (about 15 minutes). If left-over ham is not available, use thin slices of cold boiled, or baked ham.

Vegetable Salad Sandwiches: Mix one large tomato, finely diced 1/2 medium sized cucumber, finely diced 2 tablespoons minced onion, 1/2 medium size green pepper, minced, 8 to 10 Stuffed Spanish Olives, 2 cups shredded lettuce, and salt to taste, and spread between slices of whole wheat bread which have been spread with Mayonnaise Salad Dressing. Cut into rectangles, but do not remove crust. Serve with meat, egg or bean salad.

Baked Bean and Egg Salad: Place 2 cups Oven Baked Beans in a sieve and wash with boiling water, then cool. Add 3 chopped hard cooked egg whites, 6 Preserved Sweet Gherkins, chopped, 1 small chopped onion and 1/2 teaspoon salt. Moisten with Mayonnaise and serve in crisp lettuce cups. Garnish with Mayonnaise and egg yolks, pressed through a sieve. Serve very cold. Serves 4.
