

CIVIC DUTY AND OPPORTUNITY

This is a period when ever constructive business mind should take an active interest in civic and political affairs.

In Portland some of the most important issues known in our history are pending. These relate to the principles of the city government. There are those who are endeavoring to swing city, county and state control far into the business field. These people believe that state organizations should manage and direct most of the affairs affecting the population. They are devoted to the cause of socializing step by step the American form of government.

America has been built upon private initiative. Our founders in setting up this form of government specified as the major feature equality of opportunity. They wanted anyone with the initiative and courage to dare and do given full chance to develop his or her ability.

America has developed beyond any other nation or people while following the above practice. Our development of resources, harnessing of nature's powers and adaptation of natural opportunities to man's needs, have been one of the most amazing characters.

We were until three years ago prosperous beyond the dreams of any other people. In the hour of depression the advocate of the new order arrives and is endeavoring to capitalize the discontent of everyone and change the fundamental principles which we have followed.

In a situation of this character it is exceedingly important to have men and women in office who are trying to build something substantial and worthwhile rather than those who would tear down everything that has been done by others, should discuss civic and political.

It is my view that business men affairs more thoroughly than ever before and exercise their most profound judgment in choosing officers to fill public places.
