Today it is one of the most substantial concerns engaged in the manufacture in the country and its phenomenal growth is the result of hard work on the part of its officers. We could write many columns and then not tell you all of the good that this modern industrial concern has done for this section. It has become so much a part of the everyday life of

the people of the community that many have come to regard it as a "matter of course." It is well to pause occasionally and consider what they mean to us. To maintain it means continuous encouragement of all in the community, the assured expansion of this entire section, the onward progress of industrial, commercial and social development. They are courteous and efficient to a marked degree and have surrounded themselves with employees conversant with every feature of the business, and as a result work moves along in a most satisfactory manner.
