MONEY AFRAID

U. S. Must Finance Capital Goods Needs Until Risk-Yield Ratio Improves

NO OTHER CHOICE OPEN

By Thomas F. Woodcock
In all the pother over CWA, PWA, and other Government agencies which directly or indirectly deal with relief of unemployment, it will be well to keep clearly in mind the few simple (but most important) facts of the situation. Prominent among these are the facts to which The Wall Street Journal last October directed special attention. These were:

First, that putting men back to work was the one supremely necessary thing;

Second, that the great mass of these men now unemployed were normally employed in the production of capital or durable goods and collateral services;

Third, that production of durable goods was dependent upon capital investment.

Fourth, that private capital had for various reasons shown itself unwilling to invest itself in this way; and

Finally that Government expenditure on works other than those directly producing consumption goods would be necessary, so long as private capital lacked the confidence to resume its normal activities.

This necessity was recognized in the Administration's budget proposals and the activities of CWA, PWA, etc., are designed to meet it. The theory of the budget was that by two years from this summer normal employment and normal capital investment would have been resumed and Government would be able to lay down its temporary burden and reduce its budget to normal dimensions. That, in its simplest terms, is the general plan upon which we are proceeding.

It is therefore predicted upon the assumption that capital-owners will regain confidence enough to recommence investment in new enterprises and pick up the burden that the Government drops. Under ordinary circumstances the assumption would probably be safe to make, but circumstances, as everyone knows, are not ordinary in that certain features of NRA, together with the fundamental change in our monetary system, have introduced disturbing factors into capital's calculations. These manifestly tend to retard recovery of confidence on the part of owners.

Whether or not the NRA features represent necessary reforms in the interest of justice is irrelevant. So, too, is the question whether or not the monetary change is necessary or wise. The fact is that both have alarmed and still alarm capital-owners and it is the fact alone that is relevant in a practical sense.

Capital Cannot be Coerced

So, too, matters little or nothing—while this state of mind on the part of capital owners persists—whether CWA or PWA or any other department of Government employs the workers. One or another must do so, Government must find and spend the money that is required, for the men must be kept at work. Moreover private capital cannot be drafted; it cannot be coerced into enterprise. Dropping the rate of interest on Government bonds will not drive it to other employment until the risk-yield ratio is more satisfactory than there is in the case of "Treasures."

Only Two Courses Open

There is nothing obscure or complex in the situation. The problem is quite simple in terms but it calls for a plain "either-or" choice which we do not seem to have yet clearly recognized much less made. Either we

must make up our minds to restore enough inducement to private capital to start it enterprising on its own account or we must transfer the job of "new investment" to government. The assumption implied in the Administration's budget is that we shall do the former and do it within two years.

For its realization one of two things at least, must happen. Either the present measures which have thus far inhibited capital action must be modified or capital must change its point of view as to those measures. At the moment there is no clear sign of either development.

A Good Guide

Newspaper advertising is a speedometer as well as barometer of business. It tells how far and how fast trade is moving. Many business men will not spend money for advertising until they see some definite signs of life in business. Just now authentic buying signs appear on the horizon, and as a result merchants in most sections of the country are doing more advertising. There can be no better indications of business growth and these live merchants—the ones who are advertising—are going to make it grow more rapidly in the territory they serve. If you make them want what you have to sell and no way has yet been found that will do that as quickly—and as economically as newspaper advertising. The pendulum will swing back quicker for the fellow who advertises than it will for the one who holds off until business gets to booming again.—Moundridge (Kan.) Journal.

Criticize Deposit Guaranty

Guarantee of bank deposits is sharply criticized in a report presented at the regular monthly meeting of the Chamber of Commerce of the State of New York on February 1. The report was sponsored by the committee on finance and currency, of which Edward P. Maynard is chairman. He urged that the entire question of deposit insurance be further studied before the existing temporary plan which expires next July, be made permanent. The committee recommends that in the meantime, the temporary plan be continued two years.

Wheat Payments \$41,151,473

Washington—Benefit payments to farmers participating in the program to curtail wheat production, now comes to a total of \$41,151,473 according to an announcement made recently by the AAA.

President a Practical Forester

When President Roosevelt turned to forest conservation as one of the first of his reconstruction projects, he brought into existence the Civilian Conservation Corps of 325,000 boys and veterans. Their accomplishments have been one of the outstanding successes of the administration, according to western foresters. The President is both a scientific and practical forester himself, as well as a member of the professional Society of American Foresters.

Twenty years of personal management of his own forests on his estate in Hyde Park, New York, explains why so many of his plans for rehabilitation relate to forests, soil, and water. It will be remembered that many months before he was elected he proposed forestry work as a method of relieving unemployed.

Some one has said that a safe place to stop when on an automobile tour is at the railroad crossing.

The folks who dump their rubbish in conspicuous places, are doing everything possible to prove that their home has no taste.

Pain Passes Off

When your head aches; when Neuralgia tortures you; when Muscular Pains make you miserable—take a Dr. Miles' Anti-Pain Pill.
Mr. Smith is one of millions who have found this easy way to prompt relief. He says:—
"I keep Dr. Miles' Anti-Pain Pills in my pocket and when I get a dull heavy feeling in my head, I take a Dr. Miles' Anti-Pain Pill and the pain passes off."
DR. MILES' ANTI-PAIN PILLS

Husband and Wife

My husband smokes cigarette before I've had breakfast and it makes me sick.—E. G. R.

WHAT DOES YOUR HUSBAND DO?

PROF. E. W. MULLER

Astrologer, Numerologist and Philosopher

618-19 Dekum Bldg. Portland, Oregon
has forecast the success of many of this country's most noted men. During the past few weeks Prof. Muller has appeared before a number of Portland clubs and has given actual demonstrations of the most marvelous system of character analysis and has answered hundreds of questions from the platform.

Prof. Muller has also been conducting classes in person and by correspondence. He makes a specialty of foretelling important future events, whether of a personal, business or professional nature.

During the past six weeks he has been offering to the public a special reduced rate of 25c for brief personal readings.

A full analysis and character delineation revealing your future basic tendencies, in marriage, vocation, health, business, travel etc., together with daily guide for the small sum of \$1.00.

Mail all remittances and inquiries to Prof. Muller.

All orders will be given my personal attention and if there should be a few days delay it will be because I am overloaded with work.

A complete course in numerology will be mailed upon receipt of \$1.00 to anyone who wishes to know more about himself, or herself, their associates or to know the meaning of names, signatures, etc.

With all orders send your correct, original name, in full, your present signature, and the day, month and year of person for whom reading is to be made.

1934 horoscope with name analysis \$1.00.

CONSTRUCTION PROGRAM GAINS GREATER ATTENTION

The Federal government has started a nation-wide farm housing survey to ascertain the potential demand for improved home facilities, the cost of providing them the development of standard specifications adapted to the needs of various areas and practical plans for financing improvements and new buildings.

It is generally known that there is tremendous unfulfilled demand for new housing, in city as well as rural areas due to the lack of building for five or six years, and to the high rate of depreciation of existing structures.

One of the great stumbling blocks to building now is that banks are unable to loan funds because of inflexible laws, and the interest rates charged by other agencies are often so high as to discourage the prospective builder. Both private and public agencies are now working on the financing

problem to develop some plan whereby money can be made available for construction at reasonable interest rates, and still earn a fair profit. There is also hope that there will be sufficient change in the banking situation to permit a little more leeway in making building loans on the basis of applicants' general character and reputation, instead of on his liquid assets only.

If a major building wave can be started, on the farms and in cities, one of the biggest steps toward recovery and stability will have been taken.

In the meantime, those who can build or repair now will be benefiting themselves and the nation by starting construction dollars rolling, for let us hope that never again can we buy or build as cheaply as today.

INQUIRY LIST

The following people have written to the State Development Department asking for information on Oregon.

Dick Janssen, Hendricks, Minn., expects to make a trip of inspection to Oregon next fall or winter and is interested in both improved and unimproved tracts in Washington county that would be suitable for dairying, sheep, fruit stock raising and general farming.

Carl Bellamy, RR No. 1, Box 167 A, El Centro, Cal., would like to have about 80 acres of improved land and enough pasture land to run about 200 head of young stock. Must have good improvements good house, barn and outbuildings also good family orchard is coming to Oregon sometime this summer.

R. E. Vering, 329 Wolf Avenue, Turlock, Cal., plans to make a trip to Oregon sometime before the first of March and is interested in securing about 100 acres or more of improved land in Western Oregon suitable for dairying and general farming.

F. William Thrum, 1682 Hlan Drive Honolulu, Hawaii is leaving for Oregon and is interested in securing about 5 acres of improved land near Portland, suitable for fruit raising. Please mail prices and descriptions of such tracts to Mr. Thrum in care of A. C. Cox, Lebanon, Oregon.

Mrs. William Schaefer 234 No. 13th Ave, Pocatello, Idaho plans to come to Oregon in July and wants 15 or 20 acres suitable for small fruit and vegetables. Must have at least 4 room house.

George A. Lincoln, 297 East Broadway Council Bluffs, Iowa, wants from 10 to 40 acres suitable for general farming.

W. T. Elmer, Waverly, Wn., wants 30 acres suitable for general farming and about 30 acres for pasture. Prefer the Willamette Valley.

Art N. Rueckl, Luxemburg, Wis., would like to receive information on farming land in Washington county.

Walter Anderson, 171 Prairie Ave., Wilmette Ill., wants small place suitable for fruit farming.

E. W. Gangwer, RR No. 1 Bode, Iowa, interested in land near Portland suitable for dairying.

NATIONAL FIGURES TO BE AT CO-OP COUNCIL

Several representatives of national agencies affecting cooperative marketing will be on the program of the annual meeting of the Oregon Cooperative council in Portland Tuesday and Wednesday, February 13 and 14. Walter Anderson, 171 Prairie Ave., Wilmette Ill., has just issued a call for the meeting at the request of Glenn

"Increasing Middlemen's Share Must Stop" Says Gehlhar

Max Gehlhar, Director of Agriculture, says "By 1929 the Farmer's share in the dairy dollar had dropped to 52c. By 1933 his share was further reduced to 38c. This must stop. I will not approve codes like the proposed Butter Code that further decreases the Farmer's share."

"Private butter interests demanded a quarter million dollar raise but refused to include a provision in the Code to give the farmer something too. My motto will be 'There must be something in it for the farmer or no code.'"

"The Ice Cream Code, effective February 1st guarantees the farmer a 35c per pound minimum for butterfat."

B. Marsh, of Hood River, president of the organization.

The annual banquet of the council Tuesday night when the 40 members make "roll-call" reports of the year's business, will be open to the general public, as will the entire second day's program when most of the outside speakers are to be heard. The sessions will be held at the Multnomah hotel.

Members of the council who have been in Washington, D. C., lately, report that the Oregon body has become a strong influence in the national capital, Gatlin says, and that action taken by it will be closely watched. Most of the national movements in the agricultural "new deal" will be up for discussion at the session, together with the recent Oregon developments such as the state AAA law and the new milk control board.

SEED TREATMENT PREVENTS EARLY PEAS FROM ROTTING

Treatment of early planted garden pea seed with Semesan, an organic mercury compound, has been found to insure a markedly higher germination and increased vigor of the plants.

Poor germination of peas planted in cold, wet soil in spring, or subjected to such conditions after planting, is caused mostly by rots induced by molds. Even where the plant is not entirely destroyed the growth may be

seriously impaired. Tests carried on under controlled conditions of temperature and moisture showed that the average germination of treated seed under unfavorable conditions was 90 per cent, compared with only 28 per cent among the untreated lot. Later growth records showed the treated lots to average from 100 to 350 per cent better than those untreated.

The treatment is simple and economical, costing only about a cent for each pound of seed where large lots are treated. A small quantity of the dust equal to seven times the size of a pin head is enough for the ordinary 10 cent packet of seed. Seed and powder are shaken together several minutes to insure complete coating. A full discussion of the college experiments may be had in a free Circular of information No. 90.

Two 2-minute trips to your furnace daily will keep your home a healthful 70°

You don't need special equipment to get steady, even heat from your present furnace! All you have to do is to burn Gasco Briquets! Start your fire, then add fuel only twice daily, once in the morning and again in the evening. Your house will remain completely comfortable both day and night. Our service man will be glad to show you how to get maximum efficiency.

This is because Gasco Briquets are a 100% petroleum fuel, containing no coal, coke, sawdust or foreign materials. They are scientifically shaped to allow always the correct amount of air circulation. They burn slowly and thoroughly, every particle of them a heat-producing unit. They leave no ashes or clinkers. Once started, they glow uniformly and intensely, never smolder nor waste fuel.

Steady, even heat in your home this winter will mean fewer colds, less illness and greater comfort. It will also mean a saving in your fuel bill and freedom from ash-can drudgery.

Gasco Petroleum Briquets

ASH-CAN DRUDGERY with Banish

Before your next fuel order, compare the following advantages of Gasco Briquets with those of any other solid fuel:

1. A 100% petroleum fuel—ideal for furnace, fireplace or stove. (No special equipment needed.)
2. Highest heat content of any solid fuel.
3. No banking or shaking! Hold fire day or night!
4. No ashes or clinkers to carry out.
5. One ton of Briquets gives as much heat as two cords of first-growth fir, costs less per season than best Utah and Wyoming coal.

Ask the dealer in your city for a 100-lb. trial sack at the introductory price of \$1.00.

LEWIS BROS., Beaverton 6262
