## LEGAL NOTICES

### NOTICE TO CREDITORS

Notice is hereby given that the un-  
designed has been appointed execu-  
tor of the estate of Raleigh S. Robin-  
son, deceased, by an order made and  
entered in the County Court of the  
State of Oregon, for Washington  
County, on the 11th day of May, 1934,  
and that he has been duly qualified to  
act as such executor.

Now, therefore, all persons having  
claims against said estate are hereby  
notified and required to present them  
with the proper vouchers to the un-  
designed executor at his residence at  
R. F. D. No. 1, Tigard, Oregon, or at  
the law office of P. L. Patterson, in  
the Wells Building, Hillsboro, Ore-  
gon, within six months from the date  
of the first publication of this notice  
to-wit: Within six months from May  
17, 1934.

HARRY L. ROBINSON  
Executor of the estate of  
Raleigh S. Robinson, Deceased  
P. L. PATTERSON  
Attorney for Executor

One of the year's important meet-  
ings will be the "Mothers Night" pro-  
gram at 7:30 tonight in the Kiwanis  
club building. Every scout and every  
scout mother is expected to be there.  
After a short preliminary display and  
announcements, Scoutmaster Carl Mol-  
line of Oregon City's troop 220 will  
give a chat on summer camping and  
hiking illustrated with nearly a hun-  
dred of his own colored slides. Re-  
freshments will be served.

At the last meeting Jimmy Thomp-  
son, being the largest of the group—  
won the strenuous game of "battle  
royal." It was not an easy victory,  
however, for Al Galloway put up a  
strong defense. The game is similar  
to "rooster fight." The test in scout's  
pace was passed by two scouts, Jack  
Reeves and Orin Zimmerman.

Several local scouts have already  
signed up for Camp Meriwether this  
season. Camp starts June 27th and  
continues in two-week periods until  
August 8. In spite of a large camp  
attendance, troop 41 will be active lo-  
cally during the vacation months.  
Lisle Walker, Asst. S. M.

## 110° BELOW ZERO! BUT THE MOTOR STARTED

General Petroleum Corporation wanted to know how much torture its  
torture-tested General Mobilgas would stand. The company hasn't got  
the answer yet, but above is shown one of the most drastic tests—a motor  
buried beneath 600 pounds of dry ice which registers 110 degrees below  
zero. The motor started on the first turn after half-an-hour of this.  
W. B. Curtis, sales promotion manager for the company, is trying to locate  
the mercury which apparently has slid out the bottom of the thermometer.

Just how much torture will even a  
torture-tested gasoline and motor  
oil stand before they refuse to func-  
tion normally?

General Petroleum Corporation,  
marketers of General Mobilgas and  
Mobiloil, wanted to know; but even  
now, after one of the most spectacu-  
lar and drastic tests ever made, the  
company still isn't in possession of an  
accurate answer.

### Dry Ice Used

W. B. Curtis, sales promotion man-  
ager for General Petroleum, and Fred  
C. Davies, assistant division manager  
for Southern California, conducted the  
test by literally burying the motor of  
one of the company's automobiles in  
dry ice. This ice, made of pure li-  
quified carbon dioxide, is the coldest  
commercial refrigerant so far pro-  
duced by science, being minus 110  
Fahrenheit, or 110 degrees below  
zero.

### Motor Buried

Six hundred pounds of this material  
cut into square, four inches thick and  
a foot square, was piled around the  
entire hood and radiator of the car.  
The cold was so intense that the fen-  
ders of the automobile and the head-  
light frames whistled like a singing

kettle from the rapid contraction of  
the steel. All water had previously  
been drained from the radiator and  
water jacket to prevent cracking of  
the cylinder block; the water would  
have been frozen solid in a few  
minutes.

### Claims Proved

For half an hour the dead motor  
was left under its frigid blanket.  
Then, at a given signal from Curtis,  
Davies gave it the gun. The re-  
sponse was immediate, the engine  
started with a roar and continued  
running until shut off. Not only was  
the quick starting quality of Mobilgas  
proved conclusively, but there was  
also nothing in the motor's action  
to indicate any excessive thickening  
of the Mobiloil in the crankcase.

### Jury Present

According to the estimates of Da-  
vid A. Marcus, president of the Nu-  
Ice Co., makers of the dry ice, and  
W. H. Mund, special factory repre-  
sentative of the McClaren Rubber  
Co., who acted as a two-man jury, the  
temperature surrounding the motor,  
when it was started, was close to the  
minus 110 degree mark. No record  
of the actual engine temperature was  
obtained.

## RECIPES FOR A JUNE BRIDE

With June comes many inspirations  
for entertaining the young bride-to-be  
and what is more delightful than en-  
tertaining with the proverbial bride's  
gift shower. The gift problem is of-  
ten a puzzling one. A most accept-  
able gift for any prospective bride is  
a recipe file, compiled by her friends  
and consisting of their favorite dishes  
and consisting of their favorite dishes.

Preparing meals for two is always  
a problem, not only in actual food  
preparations but also in marketing.  
The quantities of staple groceries to  
buy, the size of cans and packages,  
the size of cooking utensils are all  
problems to be worked out before  
forethought in meal planning can be ac-  
complished.

Individual taste in foods must be  
considered too. There seems to be  
some proof for the saying that men's  
appetites are different from women's.  
For instance, men are likely to drink  
more milk than women drink—which  
is so much better for the men. Women  
should drink more milk as milk is  
recognized as our most important  
food for maintaining health and is  
NOT a fattening food. But women  
usually eat more salads than men,  
which is so much better for the wo-  
men, especially when the salads are  
made of raw fruits or vegetables.

All of these problems can be made  
easier if thought is put into the re-  
cipe file for the young bride.

A recipe that will tempt the appo-  
lites of young newly-weds is:

Molded Fish with Shrimp Sauce  
1 cup cold left-over fish salmon or  
whitefish.

2 eggs  
1 tsp lemon juice  
Salt  
Pepper  
1/2 tsp grated onion  
1/2 cup cream  
Shred the fish and pound with a po-  
tato masher or a wooden spoon until  
smooth. Add one unbeaten egg and  
pound again until paste-like, then the  
other egg and the seasoning. Add the  
cream or milk and stir until smooth.  
Turn the mixture into a well buttered  
small casserole. Set casserole into a  
pan of hot water and bake in moder-  
ate oven (350 F) until knife inserted  
in the center comes out clean. Baking  
should not require longer than 25  
minutes. Unmold and serve with  
shrimp sauce.

### Shrimp Sauce

2 tbsp. butter  
2 tbsp flour  
1/2 tsp salt  
Dash pepper  
1 cup milk  
1/2 lb fresh shrimp

Prepare a white sauce of the butter,  
flour, salt, pepper, and milk. Stir  
constantly while cooking to keep  
smooth. Add the anchovy sauce, if  
it is at hand and the shrimps. Re-  
heat and serve.

DALLAS—Various strains and  
grades of Grimm alfalfa are to be  
compared in an alfalfa nursery plan-  
ted on the Miles Davis farm near  
Suver recently by County Agent J. R.  
Beck. Thirteen different lots of seed  
were planted, some of which were  
grown in Polk county, and the rest in  
various parts of Idaho, Montana and  
Eastern Oregon.

EUGENE—Cecil Peerce, of Spring-  
field, who has completed brooding  
chicks for this year, is enthusiastic  
about the results obtained with the  
Oregon Bottom heat electric brooder  
developed at the Oregon State college  
experiment station, reports County  
Agent O. S. Fletcher. This new type  
brooder, which can be constructed at  
home with little difficulty, has attrac-  
ted a great deal of interest among  
poultrymen throughout the state.

CORVALLIS—Among several new  
clover varieties being tried out on the  
Oregon experiment station this year  
by Harry Schoth associate agrono-  
mist of the U. S. D. A., is one called  
"Sulla" clover, which is believed to  
have considerable possibilities for this  
section, particularly as a forage crop.  
It grows rather tall and stiff stemmed,  
much like sweet clover, and the stalks  
are decidedly sweet. This is said to  
be the first planting of the variety in  
the northwest, and it is too early to  
make definite recommendations con-  
cerning it.

THE DALLAS—W. L. Rowland,  
Elmer Root and W. R. Wilcox, all of  
Mosier, have established codling moth  
traps in their orchards this year, thus  
cooperating with County Agent W.  
Wray Lawrence in furnishing all  
growers with prompt information as  
to the timing of sprays for these  
moths. The traps are watched closely  
and all catches reported to Mr. Law-  
rence, who in turn sends out spraying  
notices to other orchardists of the  
county.

## Malted Milk

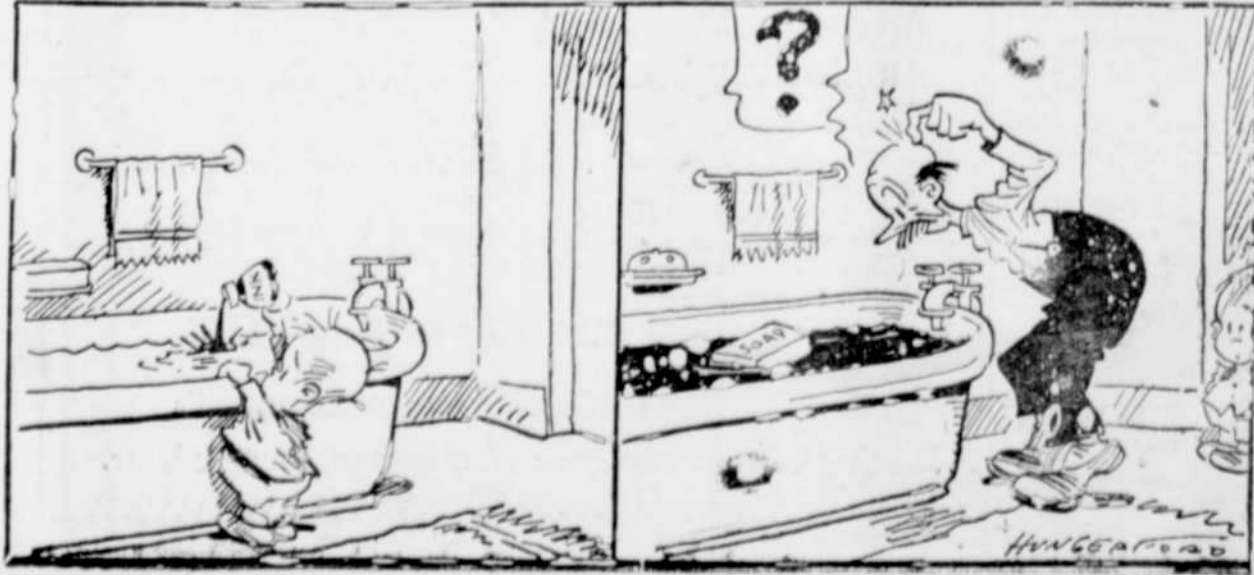

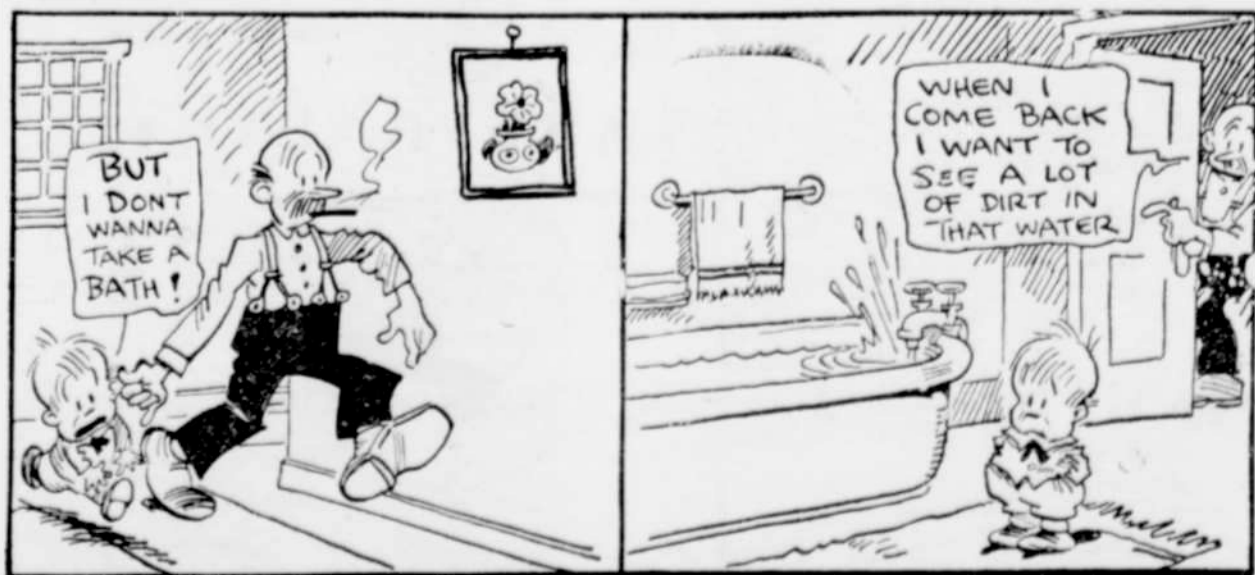

MILK is good for young and  
old. Some young people fail  
to appreciate what is good  
for them, however, and that is  
what caused the invention of  
malted milk. In a recent issue  
of Hygeia, published by the  
American Medical Association,  
Mrs. Doris W. McCray says of this  
healthful beverage:  
"The true purpose of malted  
milk is to add flavor and nutri-  
tive value to fresh whole milk or  
to skimmed milk in order to make  
it a more pleasing beverage.  
Evaporated milk, diluted to the  
proportions of fresh milk and  
flavored with malted milk, makes a  
nutritious beverage. An appetiz-  
ing hot beverage is made by using  
water, when milk is not available,  
and a larger amount of malted  
milk. The normal child should  
have his daily quart of fresh milk,  
or its equivalent in other forms  
of milk, such as dried milk and  
malted milk used in beverages,  
puddings and soups, regardless  
of the use of other nutritious ad-  
ditions to the milk and to the diet.

### Can Be Used Alone

"Dry malted milk is delicious  
when it is sprinkled over break-  
fast cereal. One tablespoonful of  
the plain malted milk added to  
a cupful of hot tomato bouillon  
imparts a delicate characteristic  
flavor. Malted milk added to  
coffee, tea or postum is delicious.  
In camp, it may temporarily take  
the place of fresh cream.

"A plain baked or boiled cus-  
tard is delicious when it is fla-  
vored with malted milk, and rice  
pudding may be flavored with  
malted milk and filled with dates  
for variation."  
These are only a few extracts  
from this interesting article  
which tells much more about the  
malted milks which have received  
the Seal of Acceptance of the  
Committee on Foods of the  
American Medical Association.
