Beaverton Locals

J. W. Raynard, Democratic candidate for representative, was in town Wednesday. J. W. Raynard attended the meeting of the walnut growers at Newberg Tuesday. It is predicted that Oregon will withdraw from the California market agreement and combine with Washington. Petitions were circulated and freely signed advocating this change. The controversy arose over a 30 per cent withdrawal of nuts from the market last year to stabilize the price. Mrs. Tefft of Albany, spent a few days this week as a guest of Mrs. A. Rossi.

Continued from Page 1 This entire program of abortion clean-up has one main object, to eliminate contagious abortion from dairy herds. Some comments are made from time to time regarding the desirability of cleaning up of this disease from a public health standpoint. This latter is not the main object of the clean-up program. Rather, the object is to eliminate the disease as a cause of heavy economic loss on the part of the dairy farmer. In other words, its clean-up is just a dollars and cents proposition with the dairymen.

Testing of local herds will get under way as soon as a sufficient number of agreements are signed to make it possible to line up the work so that it can be done efficiently and without a lot of duplication in travel.

GENERAL PETROLEUM SAYS 8 BILLION GALLONS GAS USED IN SIX MONTHS

C. J. Barnes, Beaverton branch manager for General Petroleum, comes to the fore with the interesting fact that enough gasoline is sold yearly in the United States to take a fleet of 2,000 automobiles the distance the earth is from the sun—a mere 93 million miles. More than 8 million gallons of gasoline was used in the United States in the first six months of 1934.

The figures are offered as a means of visualizing the veritable "ocean" of gasoline being used this year by the motorists of the country. The local General Petroleum head goes on to state that one gallon of gasoline out of every ten used, or one tenth of the national total, is of the brand that General Petroleum produces—Mobilgas.

ELECT

J. W. Raynard Democrat STATE REPRESENTATIVE

I have lived on a farm in Washington County, Oregon, continuously for forty-five years during which time I was manager of a local farmers' telephone company about ten years. I shall not make a lot of promises which I know cannot be fulfilled for the purpose of securing votes, but I promise, if elected, I shall give my full time and attention to the duties of the office.

I believe in the principles of an Old Age Pension, but it should be financed by some means other than a tax on real and personal property. I believe the so-called Milk Bill, passed by the last Legislature is a move in the right direction, but I believe the producer should receive a greater portion of the price paid by the consumer than he now receives. Out of the recent increase in the price of milk, the producer has not received his just share.

Oregon has the Income Tax, the Intangibles Tax, a Gift Tax and other forms of indirect taxation, I believe these measures should be strengthened to the end that real and personal property shall bear less of the burden of taxation. A move is on foot to increase the salary of public officials and employes. I am opposed to such movement.

I desire to see Oregon benefitted in every way possible in connection with the construction of the Bonneville Dam but I do not believe this is the time to burden the State of Oregon with a great bonded indebtedness until it is definitely determined what we may expect from the Federal Government.
