A Dixie Democrat Speaks

"The business of this country has been the goat of the depression from the beginning. Naturally, business and industry were the first and most extensive interests of the country to feel the effects of the hard times. As business decreased and industry failed to function for lack of markets, labor was involved and working men and women began to lose their jobs. Then the politicians took charge and decided they could run the country successfully—not its politics alone but its business and industry. . . . The intelligent, conservative, sound-thinking people of the country do not propose to stand by while the radical and political experimenters wreck the republic." — Hendersonville (N. C.) Times-News.

It would surprise the average citizen to visit a relief headquarters and witness the number of persons who arrive for their grocery orders in automobiles. An automobile is a luxury the thrifty citizen, when financially embarrassed and forced to curtail expenditures, either sells his automobile or locks it in a garage.

Flattery is sweet food for those who can swallow it. One difficulty which confronts the Republicans at every turn is the fact that the Democrats hold the purse-strings on \$4,000,000,000 and "that are votes in them than dollars."

A recent compilation by the Civil Service Commission shows 989 persons in the New Deal drawing \$10,000 a year salary or more, and 7,223 receiving \$5,000 to \$10,000.

State House Gossip

BY ERNEST L. GRAY
Continued from Page 1

Saturday did we hear of a human requesting he be nailed to the cross to win anything. Nails must hurt terrifically in hands and heels. Surely a religious fanatic, but what nerve! He gave his name as H. J. Riggs, 35, of High Point, North Carolina.

The situation may be appropos to that of John Beckman, Portland Democratic Attorney. He had been promised a long time back the attorneyship of the state liquor control commission, but in the meantime he had solicited funds from restaurant and others for his services as lobbyists for the cocktail bill during the recent legislature. The liquor commission the past week named an attorney, but it was not Beckman. How could they name him after his actions.

While the appointment of an attorney for the commission, relieving the attorney general's office of those duties has not been questioned, the reasons given for the action has resulted in one of the major controversies the past week. The attorney general was held to be derelict in his operations for the liquor control commission which charges the attorney general refused in no uncertain terms last Saturday. The criticism by the liquor commission seems to have been indiscretion which may be hard to overlook.

The other major controversy of the week has been the University professors' report on W. J. Kerr. The more one reads about it and knows about the picture the more the report appeared uncalled for. It is the result of petty jealousies on the part of certain members of the staff at the University of Oregon. The uncalled for report gives Oregon's education another black mark just at a time when it appeared to be on the road to a fine educational set-up. Professors apparently have no more brains nor tact than kidnapers, and although the crime may not be rated as bad, it does hurt society considerably.

The NRA decision of more than a week ago is still having its ramifications. So far, other than affecting business as it generally has over the nation, the effect has not yet been seen. Perhaps the first test will be when there is a controversy over one of the marketing agreements under the state agricultural adjustment act which is tied in closely with the federal AAA.

In the meantime, Solon T. White, director of agriculture, declared he would enforce the provisions of the 11 codes in that field. The battle over the walnut code was outside the state's jurisdiction, since the federal code was operative in this field, and the much discussed strawberry code had been ousted by vote a few weeks earlier. But the Oregon codes, including the restaurant code, may run against stone walls if there is any opposition voiced.

The NRA abolition decision here was generally conceded an important one and met considerable favor. Even Governor Martin, an administration democrat, held the decision proper. He has been faced with strike problems of late, which he said was a direct reaction of labor taking advantage of the 7A clause in the NRA code. He was pleased with the defeat.

"Getting back to the fundamental basis of the constitution that this country is one of the laws and not of men," was the way a prominent member of the state attorney general's staff characterized the opinion. It was perhaps the most important decree the supreme court of the United States has ever handed down. Its ef-

fect will be seen during the next political campaign which is almost here again—only next year.

The proposal of a \$3,500,000 capitol building generally has met with favor here. It was also the consensus the building would be a dome structural type and would be located at the same site as the old one, with the main entrance facing north and south.

Fake Radio Advertising And Harmful Cosmetics

Will Be Made Objects of Attack by Grange Leaders

Among the objects which the Grange organization of the country will endeavor to obtain along the lines of needed legislation, both national and state, will be a strengthening of the Food and Drug Acts to the extent of including untruthful advertising over the radio and restrictions on the sale of injurious cosmetics. The unwarranted advertising claims made for many articles over the radio are working great hardship upon the buying public, while it is a well-known fact that many cosmetics are being offered for sale that are of decidedly injurious character, but which are not sufficiently covered by present laws.

The Grange was one of the early advocates of legislation to insure the purity of food and drugs, and in more recent years has striven hard for a truth-in-fabrics law to guarantee the quality of wool, silk and other fabrics offered for sale. The use of cosmetics has increased so tremendously in the last decade that sufficient safeguards have not been thrown around their sale and the Grange now adds to its "purity program" the matter of cosmetics.

Principally also through Grange endeavor, present laws were enacted to curb the sale of injurious patent medicines by requiring full publicity as to the contents of same; while legislation to insure the purity of seeds and the quality of fertilizers also stands largely to the credit of the Grange organization. Above everything else the latter stands for honest straightforward dealing, stripped of all camouflage and misrepresentation and its new undertakings above mentioned are fully in line with its well-known policy.

Nation Going in Debt \$6,500 a Minute

Indicative of the present trend of thought is the recent statement of Roubin Babson, nationally known economist, on the Washington situation. He said, citing the huge relief rolls: "In other words, every two workers are supporting one idle worker. Surely we are now paying too great a price for legislation and relief. Roosevelt should now think of recovery and quit his present destructive policies." "In spite of the highest taxes in our history, the nation is going into the hole at the rate of \$281,000,000 per month, or 66,000,000 per week, or \$6,500 a minute. Never before in the history of the world has any nation so deliberately unbalanced its budget as the United States is doing at the present time."

Raleigh 4-H Club Plan Float for Rose Parade

The Raleigh 4-H Garden club is entering a float in the Rose Festival parade. This is the first time that a Washington County 4-H club has sponsored an entry in the festival. The club members and their leader, James S. Rose, of Beaverton, decided that a float entered in the Festival Parade would be a fine advertisement for Washington County club work. With this in mind they sponsored a program and raised sufficient money to make the entry. The members of the club are busy engaged in the preparation of their float, the definite plans of which are being held as a surprise for the Washington County people. The members of the club are: Jean Moltzner, Paul Georges, Kenneth Holmlund, Fred Zwahlen, Billy West, Sard Stuedler, Dick Randall, Tom Ward, H. E. Gilbert, Jr.

Reduce Without Danger

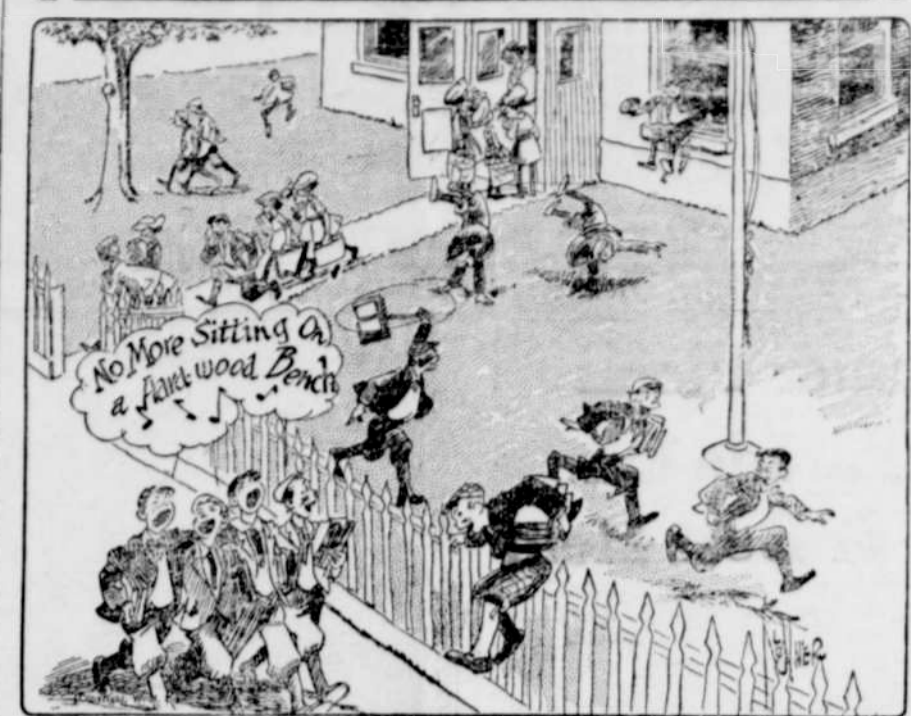

In order to meet those desiring to LOSE WEIGHT but fearing to injure their health through WRONG methods, we will give anyone presenting this ad within 10 days a complete \$2.25 treatment for \$1.00. No charge for consultation. No rigid disagreeable dieting. Call at 401 Dekum Bldg., 3rd and Wash., 10 a. m. to 9 p. m. You'll enjoy the treatment.

Busy Work Writing Checks

Announcement has been made that 1000 additional white collar workers are to be added to the Federal payroll. They will be employed as check writers in distributing the \$4,880,000,000 public works appropriation recently made available by Congress.

School's Out

State Grangers to have Monday Mixer at Session

Members of the home economics extension staff of Oregon State college have accepted an invitation from Ray W. Gill, state grange master, to provide the entertainment for the annual "Monday night mixer," to be held at McMinnville June 10, preceding the opening of the state grange convention there June 11.

This will be the third time that this organization has performed this service for the state grange, says Miss Caribel Nye, state leader of home economics extension, having put on a similar program at Roseburg last year and at Pendleton the previous year.

The program is to be held outdoors. Miss Gertrude Skow, recreation specialist, will direct the games, songs, relays and other entertainment from a central stage, with a four-way loud speaker system carrying to four groups of grangers. Each of the four groups will be assisted in the different numbers by home demonstration agents or members of county rural recreation units which receive recreational training each month under the guidance of the home economics extension staff.

Sprays Walnut from Tower

ALBANY—J. G. Medler, of Lebanon, has solved the problem of how to completely cover the uppermost branches of his walnut trees with spray for control of walnut blight by building a tower 20 feet high, reports E. C. Mullen, county agent. The tower is drawn directly behind the spray pump, and from the top of it a man is able to spray the top branches of the trees which are difficult to reach from the ground.

Range Rotation Said Essential

CORVALLIS — Because contagious poultry diseases will carry over from year to year in the soil, poultrymen who do not have sufficient range rotation are destined to go out of business, says H. E. Cosby, extension specialist in poultry husbandry. Contamination is most likely to concentrate around the house and the feed and water troughs, Cosby said, and it is advisable to move these and clean the ground at regular intervals. If the water troughs cannot be moved, they may be set on screens or slats so that the birds will not be able to get to the wet dirt.

"God the Only Cause and Creator" is the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, June 9.

The Golden Text is "Known unto God are all his works, from the beginning of the world" Acts 15:18. Among the citations which comprise the Lesson-Sermon is the following from the Bible: "For in him we live, and move, and have our being" (Acts 17:28). The Lesson-Sermon also includes the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "The creative Principle—Life, Truth and Love—is God. The universe reflects God. There is but one creator and one creation. This creation consists of the unfolding of spiritual ideas and their identities, which are embraced in the infinite Mind and forever reflected. These ideas range from the infinitesimal to infinity, and the highest ideas are the sons and daughters of God." (p 502)

Time for First Apple and Pear Cover Spray

Apple and pear growers in the Willamette Valley should apply the first cover spray now for the control of codling moth, according to B. G. Thompson, entomologist, Oregon experiment station. For the past two evenings there has been a considerable flight of codling moths and eggs have been deposited. Under ordinary Willamette Valley weather conditions, these eggs will hatch in seven or eight days. The spray should be applied before the eggs hatch.

The recommended spray is powdered lead arsenate used at the rate of 3 pounds to 100 gallons of water. In orchards where codling moth is not a serious problem, two pounds of powdered lead arsenate to 100 gallons of water is sufficient to give control.

Calcium arsenate has been used successfully in the Willamette Valley for codling moth control. Tests carried on by the Entomology Department of the Oregon Experiment Station over a period of five years indicate that under Willamette Valley conditions calcium arsenate is only slightly less effective than lead arsenate in codling moth control.

Thoroughness of application is essential in codling moth control. The foliage as well as the entire surface of every apple and pear should be thoroughly covered with the spray solution if worm injury is to be prevented. Special care should be taken in spraying the upper portion of the tree, as more than half of the codling moth eggs are laid in the upper third of the tree.

Range Rotation Said Essential

CORVALLIS — Because contagious poultry diseases will carry over from year to year in the soil, poultrymen who do not have sufficient range rotation are destined to go out of business, says H. E. Cosby, extension specialist in poultry husbandry. Contamination is most likely to concentrate around the house and the feed and water troughs, Cosby said, and it is advisable to move these and clean the ground at regular intervals. If the water troughs cannot be moved, they may be set on screens or slats so that the birds will not be able to get to the wet dirt.

Facts About Rural Power Being Gathered Rapidly

Rapid accumulation of facts concerning rural electrification in Oregon is in progress so that the state will be prepared to receive full benefit from the administration program in this field, according to reports made at the annual meeting of the Oregon Committee on Electricity in Agriculture.

Extensive detailed surveys of 10 counties have already been made as an SERA project under the works division and supervised by F. E. Price, agricultural engineer. In addition to these comprehensive surveys made by the rural divisions of the private power companies.

All facts are being assembled and coordinated by the office of the public service commissioner, as directed recently by Governor Charles H. Martin.

Oregon faces a somewhat different problem from that of most states, it was brought out at the meeting, as in many western Oregon counties from 50 to 75 per cent of the farms already have access to power lines. The average number of farm homes served in the country as a whole is only 15 per cent.

The SERA survey workers mapped all existing lines mapped proposed extensions, estimated roughly the cost of such extensions, and questioned every prospective customer along proposed extensions regarding possible extent of use of electricity.

Most of these extensions are in more sparsely settled country with only about four or five families to the mile, making cost of distribution high. The state workers are awaiting announcement of the policy of the government in this and other respects.

New Electric Trolley On Display in Portland

The Portland Traction company is displaying their new electric Trolley Coach at the corner of Yamhill just off Broadway, where they have also placed operators in charge to show visitors through the new vehicle and to answer such questions as the public may care to ask.

The new electric trolley coach is the latest thing in mass transportation. It is operated by two trolley poles from overhead wires while the coach itself is mounted on balloon tires. This system uniquely combines the good qualities of the street car in smooth, rapid starting and stopping as well as the comfortable riding advantages of the motor bus on rubber tires.

The new electric trolley coach will operate on a regular schedule every 15 minutes between the hours of 10:30 a. m. to 4 p. m. and Mr. Lines says the Traction company is inviting the general public to come and inspect the new electric Trolley coach now and to be their guest for a FREE ride.
