

Scholls Tile Company Essential Factor in Upbuilding of County

Washington county, as a whole, has an added business advantage by having in its midst such a very well known concern as the Scholls Tile company, whose commendable policies and inherent honest dealings have gained for them many friends, in that this concern is devoted to the development of the entire county.

One fine feature of the business is that it obtains clay within a few hundred feet of the plant at Scholls. The clay obtained from the banks of the Tualatin river is of high quality—almost without equal in the United States. It is thought that only one section, Chattanooga, Tennessee, has a clay that is equal to this in quality rating.

Back in 1905 when the plant had hardly more than opened its doors it turned out products that won the sweepstakes prize at the Lewis and Clark Centennial in Portland. Since that time the same high standard of products have been manufactured and distributed.

They insist that their services are dependable. You know you are going to get value received and courteous treatment when dealing with the Scholls Tile company, because past experience has taught you that they are personally interested in you and your building problems. Being a local concern they are able to give a service that is just a little in advance of the outside dealer, and that is indeed something well worth while. Mr. Kipple of the Hillsboro office is glad to furnish any estimates on brick and tile projects.

They leave nothing undone in their effort to provide for you the very best building and drain tiles and materials that can be had for the money.
