While feed scarcity, through destruction of oats ordered by the New Deal continues in the Middle West, plump Canadian cattle are shown here arriving at the Buffalo, N. Y., end of the Peace bridge from Fort Erie, Can.

The name stands for quality, reliability and progress in the contracting lines in this section of the country and as the advances of the periods have marked very many improvements, he has adopted these late scientific products as rapidly as they were approved by the trade.

He has won a very warm place in the heart of the public through the very excellent work executed in every branch of the business. The public has come to understand that a contract for this class of work goes by specifications and a satisfactory job is certain.
