ners 15 and 20c. Open day and
night. Portland, Oregon.

Pelicans, Heavy Birds

Pelicans are heavy water birds,
have a broad, rounded wing and it
takes considerable flapping to cre-
ate enough power to lift them into
the air. The white species has the
same large bill with the great dis-
tensible pouch suspended from the
lower mandible. The legs are short
with large feet of four toes connect-
ed by a web. Nesting in colonies,
they are as sociable as the penguin,
flying in flocks and feeding togeth-
er. They favor a shallow spot for
feeding where they are able to drive
schools of small fish into a trap.
Their eggs are bluish-white when
first laid. The young birds are naked
at birth and have a short bill
which grows with surprising rapid-
ity.

Turtle Life May Reach
to Four Hundred Years

In spite of all the fun poked at his
lack of speed, the tortoise has an
enviable record for long life.

Indeed the turtles of the Gala-
pagos islands are probably among
the oldest of all living animals. And
although they are now practically
extinct because of their delicious-
ness as a food, relished alike by
buzzards and dogs and pigs, none
of them has ever been known to
die of old age. If they die, asserts
a writer in the Washington Star, it
is because they have been killed by
a human being or some other
creature, or because they have met
with some such regrettable accident
as falling off a cliff. Many of the
immense turtles of the Galapagos
islands are believed to have lived
for 300 or 400 years.

When Charles Darwin, the great
scientist, visited the islands some
years ago, he wrote:

"I frequently got on their backs
and then upon giving them a few
raps on the hinder parts of the shell,
they would rise up and walk away."
Some of them, Darwin said, were
four feet long and weighed as much
as 400 pounds.

The turtles had well-beaten paths
from the lower regions of the is-
lands to the fresh water springs in
the higher parts, Darwin declared,
and in the early days sailors are
said to have followed these trails in
search of fresh water. Although the
tortoises drink a great deal of wa-
ter, often burying their heads under
the surface on and off for two or
three days to "tank up," Darwin be-
lieved that they could live on islands
where the only fresh water supply
was the rain and the dew.

Although his pace is slow, the
turtle manages to cover several
miles a day, when migrating, be-
cause he walks tirelessly and de-
terminedly, day and night.

Art of Making Porcelain

Credited to the Chinese

Porcelain has an interesting his-
tory, many centuries old. When we
take a cup of coffee from a porce-
lain cup we are lifting an object
that took hundreds of years to cre-
ate, for, unlike Topsy, it didn't "just
grow," writes Claire Winslow in the
Chicago Tribune.

Most of us have an indistinct
name for porcelain, faience, and
stoneware. We call them china, but
this is a misnomer. Faience is an
earthenware or pottery, much more
porous and less durable than porce-
lain, and stoneware, while sturdy,
has none of the pure white color
or the plastic quality of porcelain.
Porcelain must always have one
ingredient in its composition—kaolin.
The Chinese had passed through
the various evolutionary stages of
the art of making porcelain and
were producing it as long ago as the
Yuan dynasty, 1279-1368. Abundant
supplies of kaolin, or white clay, ex-
isted in their land.

Although a few pieces of porce-
lain reached Europe by devious
routes in the early Sixteenth cen-
tury, most Europeans had not heard
of it before the days of the trading
ships in the Seventeenth and Eight-
eenth centuries. Then it was
brought in large quantities and was
considered a luxury along with the
introduction of coffee, chocolate and
tea.

Captured the Bahamas

In 1776, during the war between
Great Britain and the American col-
onies, a fleet of eight vessels was
sent by the latter to Nassau, cap-
ital of the Bahamas, with instruc-
tions to capture the large quantities
of munitions believed to be stored
there. This force under Admiral
Hopkins of the American colonies
landed a detachment on the eastern
extremity of New Providence island
and marched on Nassau. Forts Mon-
tagne and Nassau surrendered to
them without resistance, and the
new "Grand Union flag," consisting
of the Union Jack in the first quar-
ter and 13 red and white stripes to
represent the independent states,
was hoisted over Fort Nassau. The
invaders took 100 guns and a small
quantity of other war munitions.
They left the next day.

Columbus' View of Porto Rico

Christopher Columbus had the
right idea about Porto Rico, Amer-
ica's island possession at the gate-
way to the Caribbean. Returning
to Spain from his second voyage to
the new world in 1493, it is recorded,
he excitedly told the queen about the
little island of Porto Rico. She
asked him what it looked like. The
explorer crumpled a sheet of paper
and tossed it on the table. "It looks
like this, your majesty," he said.
