How Many Dollars a Month Is Good Health Worth

We repeat that. How many dollars a month is Good Health worth to you, in earning power? You figure it out.

On the other hand if you are not feeling fit, not full of energy, and the old brain is not clicking on all six—you're not in either a fit mental or physical condition for maximum earning power. It is generally true, under such conditions, it is costing you more to go on as you are—than it would to consult, professionally, those who can quickly put you back on a 100 per cent health and earning power basis.

Dr. Charles E. Dodge Naturopathic Physician Respected in Our Valley

Dr. Charles E. Dodge is an asset to the professional life and health of this section. Many of our friends and neighbors have benefitted through his valuable advice and service. The practice of this well known drugless physician has increased by rapid strides, until today he is considered one of the leading professional men of Multnomah county known and highly respected throughout the Tualatin valley.

Thinking people recognize that earning power and happiness depend on good health. That poor health means decreased earning power and other accomplishments. That it is not only safer, but cheaper to bring back full earning power and a happy existence, than it is to just go along suffering and lacking the vitality to physically and mentally accomplish things. People go to Dr. Dodge's offices, 908 Guardian Bldg. 3rd and Alder, in Portland, with dragging steps and hopeless look on their faces; and come out with the smile and straightened shoulders of hope, confidence and assurance that after all life is good.

So, if things look hopeless, if you feel that lack of vitality that produces health, happiness and greater earning power we suggest you go at once to Dr. Dodge and have a talk with him. You will return home with a brighter outlook on your future, and the assurance that he can help you.

Always abreast of modern aids to health, Dr. Dodge has only recently installed a delicate and scientific electrical equipment at a cost of over \$800, known as a "Pathoclast" which diagnosis physical conditions, tune in on the living body for detection and correction of conditions that are out of tune with health; locating, diagnosing and treating them. Another scientific instrument recently installed is the "Colonic Irrigator" for correcting faulty waste elimination.
