Babson Says---

Continued from Page 1

the country and with inventories low Figures from pivotal industries indicate that business will be better in the weeks to come. The steel industry, for instance, has taken a sensational upturn in the past month. Operations are now at 55 percent of capacity against only 45 percent a month ago.

Most Industries Picking Up
Other industries, while not moving ahead so spectacularly as steel, have turned up in the last few weeks. The number of freight cars moving over the country's railroads are practically at the best figure for 1939. Electric power consumption is rising after a two months' dip. Automobile assemblies have been disappointing so far, but new model production is scheduled to get under way in July—a full month earlier than a year ago. Lumber operations are almost 50 per cent ahead of 1938 at this time, reflecting the encouraging gain in home building.

In fact, construction has been the backbone of the 1938-39 business improvement. Activity is 40 per cent above a year ago and well above June, 1937, when a general business was running close to its ten-year peak. There is a tremendous trek of population from city to suburbs and to country towns. Remodeling and new building in some suburbs is almost of boom proportions. Commercial and industrial building, however, is very quiet with the exception of government-sponsored projects.

Business Best in North
At the present time, business is best in the Northern and Northeastern States. My map, which shows business conditions in every city and every state at all times, has changed in recent months. I find that of the twenty-three "gold", or good, states this month, all but four are east of the Mississippi and north of the Ohio river, or on the Pacific Coast. Certain farm areas in the south east, south and south west where business was booming a few months ago, are now experiencing quite a slowing down.

I do not look for this situation to continue, however, because farm prices are now improving. Quotations today are equal to, or slightly higher than, a year ago. Crops are not expected to be quite so large this year. With the government's efforts to eliminate surpluses, plus the \$1,300,000,000 benefit program, farm income in the next few months should top the 1938 level by 10 per cent, barring any unforeseen weather developments. So farmers can be added to the city workers as potentially better retail buyers this Summer.

Dollars Must Go to Work
The huge wads of cash choking the treasuries of banks and insurance companies is another factor which keeps me bullish. There is more money available for investment today than ever before in the history of this country. The credit expansion potentialities stagger the imagination. America's problem, of course, is to put this money to work. It is just as necessary to get these dollars employed as it is to get our 10,000,000 jobless back to work. We cannot accomplish one task without accomplishing the other. These dollars will not go into use until confidence is restored. Confidence must be built on honesty, industry, and thrift. Only "righteousness exalteth a nation." Business should be better this Fall than it was this Spring. Moreover, it should be better than in the Fall of 1938. However, I foresee no real prosperity until there is a change in the goals and principles of the American people.

- STRAWS IN BUSINESS WIND**
1. Pivotal steel industry busier.
 2. Most industries feel upturn.
 3. Building best in ten years.
 4. Stocks of goods on hand low.
 5. Retail trade at good level.
 6. Sensitive commodity prices rising.
 7. Farm income higher than in 1938.
 8. European picture quieter.

NO AGE LIMIT

What of it, if he is getting up in years? Many a man is at his best after youth has been left behind. At 75 Ford still makes good automobiles. Against many a man in being competent. While youth is necessary in business, age has had its experience and the judgment of men over 50 is an assistance in the efforts of the young man. There is not an age limit to be put on man's usefulness. The era of the young would be sad indeed without the experience of age to guide it. Business in the hands of the old would become laggard and dull, but all business would perish suddenly. Both the mind of the aged and the energy of the young have their uses here.

No man is a failure who is enjoying life.
