## Valley Used Car Man Enthusied by Business

At last we have contacted a business man who is very enthusiastic about business conditions. Don C. Galbreath of the Independent Motors, of 1446 West Burnside, Portland, reports that his company sold a large number of used automobiles in the past thirty days. The cars were all in the medium price bracket.

Some of the Independent Motor Companies success may be found in the class of merchandise they are selling and the way they take care of their customers after they buy. It has often been the case of used car people never wanting to see the buyer after he leaves with the car. However this is not the case of the Independent Motors as they want the buyer to come back whether it is with a complaint or a compliment. The Independent Motor Company have their own complete service outfit. They have two master mechanics and a body and fender man. It is the company's intention to turn out only good merchandise and to stand behind it after the car is sold. These facts are probably the answer for the company reporting business as excellent. Galbreath wishes to remind the people of the community that he has special prices and terms for them.

## Babson Says---

Continued from Page 1  
nesses and expanding their present businesses? The biggest reason is our tax system. The tax handicap is so obvious I cannot understand why Congress and State and local authorities do not correct it. When business men borrow money to start new businesses and to provide new jobs, no one helps them if they fail; but when they succeed, the tax authorities take practically all the profits away from them.

These businessmen know that they can now retire with enough to provide for themselves and family even though their income has been sharply reduced. So, why take chances on a "heads you win, tails I lose" basis? Not until the capital gains tax is drastically reduced will we see new businesses started and existing businesses expanding. In addition, there are hundreds of other taxes which retard business. Some of these, however, are now being adjusted by Congress.

Furthermore, our labor laws in their present form are stifling jobs and holding back employers. The Unemployment Compensation tax of 3 per cent, the Wage and Hour Act with its over-time provisions, the one-sided Wagner Labor Act all discourage employers from expanding, or starting new businesses limiting opportunities for profitable investment of bank deposits, and handicapping the creation of new jobs for the unemployed.

Because of this, unemployment holds close to its all-time peak. Someone has to provide welfare and relief for the jobless and the government has taken over the task. So on one hand the government is discouraging employers and on the other hand is spending billions of taxpayer's money to provide for the jobless. These billions have to be met by higher and higher taxes thus making existing employers poorer, throwing more men out of jobs and further discouraging new employers.

Drink, Eat and Be Merry  
Therefore, demand for money and the opportunities for profitable investment of bank deposits are constantly becoming less-and-less. So banks have to cut their interest on deposits. This discourages people from building up reserves and encourages them to spend their money on frills and wasteful luxuries. When these people lose their jobs or get into difficulties, they have to come to the government for help, thus adding to government expenses, causing higher taxes, further discouraging employers and limiting opportunities for bank loans—and on around the vicious circle again.

I hold no brief for bankers. They have their faults just as you and I. But let us be fair about this interest rate situation. When you get your notice some time before the year is over that the interest on your account is to be cut do not blame it all on your banker. He is up against a tough problem and, as I see it he has no alternative.
