Size of Stockings

In the manufacture of stockings
the size is based on the distance in
inches between a point on the toe
and a point on the heel measured in
a straight line. Size 8 is eight inches
more or less from the tip of the
toe to the end of the heel. Both
men's and women's stockings are
measured in this manner. Accord-
ing to the United States bureau of
standards, women's stockings are
measured as follows: After the
hose has been pressed and is flat
and unwrinkled, a ruler is placed
along a line in which the tip of the
toe and the bottom of the heel are
connected. The hosiery size is the
distance in inches along this line
from tip of toe to the intersection
of the ruler with the back of the
heel. Only inches and half-
inches are represented in size num-
bers. Preference is given to the
lower number. For instance, if the
exact measurement is 10¼ inches
the stocking is called size 10 rather
than 10½.
